<b>Preface</b> . . . . .	xv
<b>Chapter 1. Basic Concepts</b> . . . . .	1
1.1. Introduction. . . . .	1
1.2. Definition of terms . . . . .	1
1.2.1. Risk . . . . .	1
1.2.2. Time definitions. . . . .	2
1.2.3. Failures and repairs. . . . .	4
1.2.4. IEC 61508 terms . . . . .	8
1.3. Definition of parameters . . . . .	10
1.3.1. Reliability . . . . .	10
1.3.2. Maintainability . . . . .	12
1.3.3. Availability and production availability. . . . .	12
1.3.4. Dependability . . . . .	13
1.3.5. Definitions used by maintenance engineers . . . . .	13
1.3.6. Definitions used in the refinery industry . . . . .	14
1.4. The exponential law/the constant failure rate . . . . .	14
1.4.1. Reliability . . . . .	14
1.4.2. Validity. . . . .	15
1.4.3. Oil and gas industry . . . . .	16
1.5. The bathtub curve . . . . .	16
1.5.1. Meaning . . . . .	16
1.5.2. Useful life and mission life . . . . .	18
1.5.3. Validity. . . . .	18
1.5.4. Oil and gas industry . . . . .	18
<b>Chapter 2. Mathematics for Reliability</b> . . . . .	21
2.1. Introduction. . . . .	21
2.2. Basis of probability and statistics . . . . .	22

2.2.1. Boolean algebra . . . . .	22
2.2.2. Probability relations . . . . .	22
2.2.3. Probability distributions . . . . .	24
2.2.4. Characteristics of probability distributions . . . . .	24
2.2.5. Families and conjugates . . . . .	26
2.3. Formulae and theorems . . . . .	27
2.3.1. Combinatorial analysis. . . . .	27
2.3.2. Central limit theorem. . . . .	28
2.3.3. Chebyshev's inequality . . . . .	28
2.3.4. Laws of large numbers. . . . .	28
2.3.5. Supporting functions and distributions . . . . .	29
2.3.6. Bayes' theorem . . . . .	30
2.4. Useful discrete probability distributions . . . . .	32
2.4.1. Binomial distribution. . . . .	33
2.4.2. Poisson distribution. . . . .	33
2.5. Useful continuous probability distributions . . . . .	35
2.5.1. Exponential distribution . . . . .	35
2.5.2. Uniform distribution . . . . .	36
2.5.3. Triangular distribution . . . . .	37
2.5.4. Normal distribution. . . . .	38
2.5.5. Log-normal distribution . . . . .	40
2.5.6. Weibull distribution . . . . .	43
2.5.7. Gamma distribution . . . . .	44
2.5.8. Beta distribution . . . . .	45
2.5.9. Chi-squared distribution . . . . .	46
2.5.10. Fisher-Snedecor distribution . . . . .	46
2.6. Statistical estimates . . . . .	47
2.6.1. Estimates. . . . .	47
2.6.2. Calculation of point estimate . . . . .	47
2.6.3. Calculation of confidence interval . . . . .	50
2.6.4. Heterogeneous samples . . . . .	52
2.6.5. Implementation . . . . .	53
2.7. Fitting of failure distribution. . . . .	53
2.7.1. Principle . . . . .	53
2.7.2. Median rank method . . . . .	54
2.7.3. Implementation . . . . .	55
2.8. Hypothesis testing . . . . .	57
2.8.1. Principle . . . . .	57
2.8.2. Existing tests. . . . .	58
2.8.3. Implementation . . . . .	58
2.9. Bayesian reliability . . . . .	60
2.9.1. Definition . . . . .	60
2.9.2. Use of Bayes' theorem. . . . .	61

---

2.9.3. Bayesian inference . . . . .	61
2.9.4. Selection of the prior probability distribution . . . . .	62
2.9.5. Determination of the posterior probability distribution. . . . .	62
2.9.6. Bayesian credibility interval . . . . .	64
2.10. Extreme value probability distributions . . . . .	65
2.10.1. Meaning. . . . .	65
2.10.2. The three extreme value probability distributions . . . . .	65
2.10.3. Use in the industry . . . . .	66
<b>Chapter 3. Assessment of Standard Systems . . . . .</b>	<b>67</b>
3.1. Introduction. . . . .	67
3.2. Single item . . . . .	67
3.2.1. Availability . . . . .	68
3.2.2. Number of failures . . . . .	69
3.3. System reliability . . . . .	70
3.3.1. Series systems . . . . .	70
3.3.2. Parallel systems . . . . .	72
3.4. Specific architectures . . . . .	73
3.4.1. Method of analysis . . . . .	73
3.4.2. Redundant item system . . . . .	74
3.5. On-guard items. . . . .	76
3.5.1. Unrevealed failures. . . . .	76
3.5.2. Full formula . . . . .	77
3.5.3. Optimum proof test duration . . . . .	79
<b>Chapter 4. Classic Methods . . . . .</b>	<b>81</b>
4.1. Introduction. . . . .	81
4.2. Failure Mode and Effects Analysis . . . . .	81
4.2.1. Conventional Failure Mode and Effects Analysis/Failure Mode, Effects and Criticality Analysis . . . . .	81
4.2.2. Functional/hardware FMEA . . . . .	84
4.2.3. Case study . . . . .	84
4.3. Fault trees. . . . .	89
4.3.1. Conventional fault trees . . . . .	89
4.3.2. Fault tree extensions . . . . .	93
4.3.3. Facilities provided by software packages. . . . .	94
4.3.4. Case study . . . . .	94
4.4. Reliability block diagrams . . . . .	98
4.4.1. Conventional RBDs . . . . .	98
4.4.2. RBD extension . . . . .	102
4.4.3. Facilities provided by software packages. . . . .	103
4.4.4. Case study . . . . .	103

---

4.5. Monte Carlo method . . . . .	104
4.5.1. Principle . . . . .	104
4.5.2. Use for production availability and reliability . . . . .	106
4.5.3. How many runs are enough? . . . . .	107
<b>Chapter 5. Petri Net Method . . . . .</b>	<b>109</b>
5.1. Introduction. . . . .	109
5.2. Petri nets . . . . .	110
5.2.1. Definition . . . . .	110
5.2.2. Mathematical properties . . . . .	111
5.2.3. Petri net construction. . . . .	112
5.2.4. GRAFCET. . . . .	117
5.3. IEC 62551 extensions. . . . .	117
5.3.1. Extensions to structure. . . . .	117
5.3.2. Modified execution rules . . . . .	120
5.4. Additional extensions . . . . .	121
5.4.1. Extensions to structure. . . . .	121
5.4.2. Modified execution rules . . . . .	122
5.5. Facilities provided by software packages . . . . .	123
5.5.1. Additional extensions to structure . . . . .	123
5.5.2. Modified execution rules . . . . .	123
5.5.3. Petri net processing. . . . .	123
5.5.4. Results . . . . .	123
5.6. Petri net construction . . . . .	124
5.6.1. Petri net modeling . . . . .	124
5.6.2. Minimizing the risk of error input . . . . .	124
5.6.3. Petri net checking. . . . .	124
5.6.4. Petri net validation . . . . .	125
5.7. Case study . . . . .	125
5.7.1. System description . . . . .	125
5.7.2. Petri net model . . . . .	126
<b>Chapter 6. Sources of Reliability Data . . . . .</b>	<b>133</b>
6.1. Introduction. . . . .	133
6.2. The OREDA project . . . . .	133
6.2.1. History . . . . .	133
6.2.2. Project management and organization. . . . .	135
6.2.3. Description of OREDA 2015 handbooks . . . . .	135
6.2.4. Use of the data tables. . . . .	137
6.2.5. Use of the additional tables . . . . .	141
6.2.6. Reliability database and data analysis software . . . . .	143
6.2.7. Data collection software. . . . .	144

---

6.3. The PDS handbook . . . . .	144
6.3.1. History . . . . .	144
6.3.2. Description of the handbook . . . . .	145
6.3.3. Use of the handbook . . . . .	145
6.4. Reliability Analysis Center/Reliability Information Analysis Center publications . . . . .	145
6.4.1. History . . . . .	145
6.4.2. Non-electronic Part Reliability Data handbook . . . . .	146
6.4.3. FMD . . . . .	146
6.4.4. NONOP . . . . .	146
6.4.5. Use of the publications. . . . .	146
6.5. Other publications . . . . .	147
6.5.1. EXIDA handbooks . . . . .	147
6.5.2. Electrical items . . . . .	147
6.5.3. Pipelines . . . . .	148
6.5.4. Flexibles . . . . .	149
6.5.5. Miscellaneous . . . . .	149
6.6. Missing information. . . . .	150
<b>Chapter 7. Use of Reliability Test and Field Data . . . . .</b>	<b>151</b>
7.1. Introduction. . . . .	151
7.2. Reliability test data . . . . .	151
7.2.1. Principle . . . . .	151
7.2.2. Test organization . . . . .	152
7.2.3. Assessment of failure rate. . . . .	152
7.3. Field data . . . . .	154
7.3.1. Principle . . . . .	154
7.3.2. Data collection organization . . . . .	155
7.3.3. Assessment of failure rate. . . . .	155
7.3.4. Assessment of probability to fail upon demand . . . . .	156
7.3.5. Assessment of MRT . . . . .	156
7.3.6. Case study . . . . .	156
7.4. Accelerated tests . . . . .	157
7.4.1. Principle . . . . .	157
7.4.2. Example . . . . .	158
7.4.3. Highly accelerated tests . . . . .	159
7.5. Reliability growth . . . . .	159
7.5.1. Principle . . . . .	159
7.5.2. Main models. . . . .	159
<b>Chapter 8. Use of Expert Judgment. . . . .</b>	<b>163</b>
8.1. Introduction. . . . .	163
8.2. Basis . . . . .	164

8.2.1. Definitions . . . . .	164
8.2.2. Protocol for expert elicitation . . . . .	164
8.2.3. Role of the facilitator . . . . .	165
8.3. Characteristics of the experts . . . . .	166
8.3.1. Definition . . . . .	166
8.3.2. Selection . . . . .	166
8.3.3. Biases . . . . .	167
8.3.4. Expert weighting . . . . .	168
8.3.5. Expert dependence . . . . .	169
8.3.6. Aggregation of judgments . . . . .	169
8.4. Use of questionnaires . . . . .	169
8.4.1. Conditions of use . . . . .	169
8.4.2. The Delphi method . . . . .	170
8.4.3. Case study . . . . .	171
8.5. Use of interactive group . . . . .	173
8.5.1. Number of experts . . . . .	173
8.5.2. Procedure . . . . .	173
8.6. Use of individual interviews . . . . .	174
8.6.1. Conditions of use . . . . .	174
8.6.2. Case study . . . . .	174
8.7. Bayesian aggregation of judgment . . . . .	175
8.7.1. Form of information provided by experts . . . . .	175
8.7.2. Assessment of failure rate (or MTBF) . . . . .	176
8.7.3. Assessment of probability of failure upon demand . . . . .	177
8.8. Validity of expert judgment . . . . .	177
<b>Chapter 9. Supporting Topics . . . . .</b>	<b>179</b>
9.1. Introduction . . . . .	179
9.2. Common cause failures . . . . .	179
9.2.1. Introduction . . . . .	179
9.2.2. Definition . . . . .	180
9.2.3. Defenses against CCF . . . . .	181
9.2.4. CCF modeling with the beta-factor method . . . . .	182
9.2.5. CCF modeling with the shock method . . . . .	185
9.2.6. Extension of the beta-factor model: the PDS method . . . . .	188
9.2.7. Field data . . . . .	189
9.2.8. Impact of CCF on system reliability . . . . .	190
9.2.9. Impact of testing policy on CCF . . . . .	191
9.2.10. Impact of CCF on system production availability . . . . .	194
9.2.11. Benchmark on CCF assessment . . . . .	194
9.3. Mechanical reliability . . . . .	195
9.3.1. Characteristics . . . . .	195

---

9.3.2. Stress-strength interference . . . . .	195
9.3.3. Empirical reliability relationships . . . . .	197
9.3.4. Comparison with system (constant failure rate) approach . . . . .	199
9.4. Reliability of electronic items . . . . .	199
9.4.1. Characteristics . . . . .	199
9.4.2. MIL-HDBK-217 . . . . .	200
9.4.3. UTE-C-80811 . . . . .	201
9.4.4. Other reliability data books . . . . .	201
9.4.5. EPRD . . . . .	203
9.4.6. Effect of dormancy period. . . . .	203
9.4.7. Common cause failures . . . . .	203
9.4.8. Comparison of provisions . . . . .	204
9.4.9. Use in the oil and gas industry . . . . .	205
9.5. Human reliability . . . . .	205
9.5.1. Human factors . . . . .	205
9.5.2. Human reliability in the nuclear industry . . . . .	205
9.5.3. Evaluation of HRA techniques . . . . .	206
9.5.4. Human reliability in the oil and gas industry. . . . .	206
<b>Chapter 10. System Reliability Assessment . . . . .</b>	<b>209</b>
10.1. Introduction . . . . .	209
10.2. Definition of reliability target . . . . .	209
10.2.1. Absolute reliability target . . . . .	209
10.2.2. Risk target . . . . .	210
10.3. Methodology of system reliability study . . . . .	211
10.3.1. Overall description . . . . .	211
10.3.2. Step 1: system analysis . . . . .	212
10.3.3. Step 2: qualitative analysis . . . . .	212
10.3.4. Step 3: quantitative data selection . . . . .	212
10.3.5. Step 4: system reliability modeling . . . . .	214
10.3.6. Step 5: synthesis . . . . .	214
10.4. SIL studies . . . . .	214
10.4.1. Introduction . . . . .	214
10.4.2. SIL assignment . . . . .	214
10.4.3. SIL demonstration. . . . .	217
10.5. Description of the case study. . . . .	217
10.5.1. Origin of the risk . . . . .	217
10.5.2. Description of the standard SIF . . . . .	219
10.5.3. Risk assessment . . . . .	219
10.6. System analysis. . . . .	220
10.6.1. Description of HIPS functioning . . . . .	220
10.7. Qualitative analysis . . . . .	221

10.7.1. FMEA . . . . .	221
10.7.2. CCF analysis . . . . .	223
10.8. Quantitative data selection . . . . .	225
10.8.1. Selection of reliability data . . . . .	225
10.8.2. Collection of proof test data . . . . .	225
10.8.3. CCF quantification . . . . .	226
10.9. System reliability modeling . . . . .	226
10.9.1. Building of system reliability model . . . . .	226
10.9.2. System reliability calculation . . . . .	226
10.10. Synthesis . . . . .	232
10.10.1. Conclusions . . . . .	232
10.10.2. Recommendations . . . . .	233
10.11. Validity of system reliability assessments . . . . .	234
10.11.1. Reports . . . . .	234
10.11.2. Conclusions . . . . .	234
<b>Chapter 11. Production Availability Assessment . . . . .</b>	<b>235</b>
11.1. Introduction . . . . .	235
11.2. Definition of production availability target . . . . .	235
11.2.1. Absolute production availability target . . . . .	235
11.2.2. Economic target . . . . .	235
11.3. Methodology . . . . .	236
11.3.1. Events considered in production availability assessments . . . . .	236
11.3.2. Overall description . . . . .	236
11.3.3. Step 1: system analysis . . . . .	238
11.3.4. Step 2: quantitative data selection . . . . .	238
11.3.5. Step 3: production availability assessment . . . . .	238
11.3.6. Step 4: synthesis . . . . .	238
11.4. System analysis . . . . .	239
11.4.1. Determination of system running modes . . . . .	239
11.4.2. Item failure analysis . . . . .	242
11.5. Quantitative data selection . . . . .	244
11.5.1. Selection of reliability data . . . . .	244
11.5.2. Collection of operational data . . . . .	245
11.6. Production availability assessment . . . . .	246
11.6.1. Building of production availability model . . . . .	246
11.6.2. Production availability calculations . . . . .	246
11.7. Synthesis . . . . .	248
11.7.1. Main results . . . . .	248
11.7.2. Additional economic parameters . . . . .	249
11.7.3. Flared gas . . . . .	251
11.7.4. Other results . . . . .	253

---

11.7.5. Recommendations. . . . .	256
11.8. Uncertainty on the reliability parameters. . . . .	256
11.9. Validity of production availability assessments. . . . .	257
<b>Chapter 12. Management of Production Availability and Reliability</b> . . . . .	<b>259</b>
12.1. Introduction . . . . .	259
12.2. Principles of dependability management. . . . .	260
12.2.1. Dependability property management. . . . .	260
12.2.2. Phasing of the management . . . . .	260
12.2.3. Lifecycle costing and dependability . . . . .	261
12.3. Technical specifications. . . . .	262
12.3.1. Contents. . . . .	262
12.3.2. Reliability specification . . . . .	262
12.3.3. Production availability specification . . . . .	263
12.4. Reliability and production availability program . . . . .	264
12.4.1. Contents. . . . .	264
12.4.2. Reliability program . . . . .	266
12.4.3. Production availability program . . . . .	267
12.5. Validation of system reliability . . . . .	267
12.5.1. Reliability data collection . . . . .	267
12.5.2. Random failures . . . . .	268
12.5.3. Common cause failures . . . . .	268
12.6. Validation of production availability . . . . .	268
12.6.1. Useful life . . . . .	268
12.6.2. Reliability data. . . . .	269
12.6.3. Production data . . . . .	269
12.6.4. Use of production availability model . . . . .	269
<b>Appendices</b> . . . . .	<b>271</b>
<b>Appendix 1. Notations and Abbreviations</b> . . . . .	<b>273</b>
<b>Appendix 2. Markov Chain</b> . . . . .	<b>283</b>
<b>Appendix 3. Comparison of Modeling Methods</b> . . . . .	<b>293</b>
<b>Appendix 4. Solutions of Exercises</b> . . . . .	<b>301</b>
<b>Bibliography</b> . . . . .	<b>315</b>
<b>Index</b> . . . . .	<b>323</b>
