| Abstract | vii |
| Foreword | xi |
| Preface | xv |
| Introduction | xxiii |
| Chapter 1. Industry 4.0: Definition and the Acceleration of Innovations | 1 |
| 1.1. General framework | 1 |
| 1.2. Application areas | 5 |
| 1.3. Dissemination of Industry 4.0 and the disciplines that contribute to its development | 7 |
| 1.4. Artificial intelligence | 13 |
| 1.4.1. General framework | 13 |
| 1.4.2. Current limitations of AI | 24 |
| 1.4.3. Learning with AI | 27 |
| 1.5. The Internet of Things | 30 |
| 1.6. Additive manufacturing | 36 |
| 1.7. Robotization and automation | 44 |
| 1.8. Current situation of Industry 4.0 | 48 |
| 1.8.1. Positioning | 48 |
| 1.8.2. Industry 4.0 indicators | 51 |
| 1.8.3. Some remarks | 53 |
| Chapter 2. Disciplinary Boundaries | 67 |
| 2.1. A return to the notion of the boundary object | 67 |
| 2.1.1. From the idea to its processing | 68 |
| 2.1.2. The issue of convergence | 74 |
| 2.2. Interdisciplinarity | 85 |

| | |
|---|-----|
| Chapter 3. Technical Progress and Quality of Life at Work | 95 |
| 3.1. General framework | 95 |
| 3.2. Between acceptance and rejection, and between attractions and fears of technological progress | 103 |
| 3.3. New organizations and new disorganizations | 109 |
| 3.3.1. Co-working spaces | 113 |
| 3.3.2. Connected workers | 113 |
| 3.3.3. An obligation to train throughout life | 114 |
| 3.3.4. The specific case of additive manufacturing | 115 |
| 3.4. Environmental aspects | 117 |
| Chapter 4. Elements of Foresight and Possible Effects of Conceivable Scenarios | 133 |
| 4.1. Major trends | 137 |
| 4.2. Four scenarios | 159 |
| 4.2.1. Introduction | 160 |
| 4.2.2. The four scenarios | 161 |
| 4.2.3. Blocking factors and probable scenario(s) | 167 |
| 4.3. Possible effects on the development of the “Industry 4.0” concept | 170 |
| 4.3.1. Reminders on creative innovation | 171 |
| 4.3.2. Scenario–Industry 4.0 relationships | 178 |
| Chapter 5. What Can Be Done? | 193 |
| 5.1. The administrative path | 193 |
| 5.2. Effects on work based on the current inertial civilizational model | 196 |
| 5.2.1. A preconclusion | 202 |
| 5.3. New organizations | 207 |
| 5.4. Ways of resourcing European, national and/or individual innovation | 212 |
| 5.4.1. Industry 4.0 and research | 212 |
| 5.4.2. Disciplinary convergence | 214 |
| 5.5. Convergences | 217 |
| 5.5.1. A “bad” example of convergence: NBIC convergence | 217 |
| 5.5.2. What about “silent” technologies? | 224 |
| 5.5.3. The “boiling frog” fable | 227 |
| 5.6. Encouraging transformative, risky and interdisciplinary research | 229 |
| Conclusion | 235 |
| References | 249 |
