<b>Introduction . . . . .</b>	ix
<b>Chapter 1. Main Medical Imaging Techniques . . . . .</b>	1
1.1. Introduction . . . . .	1
1.2. X-ray imaging . . . . .	2
1.2.1. Definition of X-rays . . . . .	2
1.2.2. X-ray instrumentation and generation . . . . .	4
1.2.3. Applications of X-ray imaging . . . . .	7
1.2.4. Advantages and disadvantages of X-ray imaging . . . . .	14
1.3. Computed tomography . . . . .	14
1.3.1. Description of the technique . . . . .	15
1.3.2. Development of computed tomography . . . . .	16
1.3.3. Instrumentation . . . . .	17
1.3.4. Applications . . . . .	22
1.3.5. Advantages and disadvantages of computed tomography . . . . .	25
1.4. Magnetic resonance imaging . . . . .	25
1.4.1. Instrumentation . . . . .	26
1.4.2. Generation of the resonance effect . . . . .	27
1.4.3. Relaxation and contrast . . . . .	30
1.4.4. Applications of magnetic resonance imaging . . . . .	33
1.4.5. Advantages and disadvantages of magnetic resonance imaging . . . . .	36
1.5. Ultrasound imaging . . . . .	36
1.5.1. Definition of ultrasound . . . . .	36
1.5.2. Development of ultrasound imaging . . . . .	37
1.5.3. Generation of ultrasound . . . . .	38
1.5.4. Transducers . . . . .	39
1.5.5. Applications of ultrasound techniques . . . . .	42

1.5.6. Advantages and disadvantages of ultrasound imaging . . . . .	47
1.6. Comparison between the different medical	
imaging techniques . . . . .	47
1.7. Conclusion . . . . .	48
<b>Chapter 2. Medical Image Analysis and Processing . . . . .</b>	<b>49</b>
2.1. Introduction . . . . .	49
2.2. Image compression . . . . .	49
2.3. Image restoration . . . . .	50
2.4. Image enhancement . . . . .	50
2.4.1. Window and level . . . . .	51
2.4.2. Gamma correction . . . . .	51
2.4.3. Histogram equalization . . . . .	52
2.4.4. Image subtraction . . . . .	52
2.4.5. Spatial filtering . . . . .	52
2.5. Image analysis . . . . .	53
2.5.1. Texture features . . . . .	53
2.5.2. Edges and boundaries . . . . .	55
2.5.3. Shape and structure . . . . .	57
2.6. Image segmentation . . . . .	58
2.6.1. Simple methods of image segmentation . . . . .	58
2.6.2. Active contour segmentation . . . . .	60
2.6.3. Variational methods . . . . .	61
2.6.4. Level set methods . . . . .	62
2.6.5. Active shape and active appearance models . . . . .	62
2.6.6. Graph cut segmentation . . . . .	63
2.6.7. Atlas-based segmentation . . . . .	63
2.6.8. Deformable model-based segmentation . . . . .	65
2.6.9. Energy minimization-based segmentation . . . . .	65
2.6.10. Learning-based segmentation . . . . .	65
2.6.11. Other approaches . . . . .	66
2.7. Image registration . . . . .	66
2.7.1. Dimensionality . . . . .	67
2.7.2. Nature of the registration basis . . . . .	68
2.7.3. Nature of the transformation . . . . .	69
2.7.4. Transformation domain . . . . .	70
2.7.5. Interaction . . . . .	71
2.7.6. Optimization procedure . . . . .	72
2.7.7. Modalities involved . . . . .	72
2.7.8. Subject . . . . .	73
2.7.9. Object . . . . .	74
2.8. Image fusion . . . . .	74

---

2.8.1. Pixel fusion methods . . . . .	74
2.8.2. Subspace methods . . . . .	75
2.8.3. Multi-scale methods . . . . .	75
2.8.4. Ensemble learning techniques . . . . .	75
2.8.5. Simultaneous truth and performance level estimation . . . . .	76
2.9. Image understanding . . . . .	76
2.10. Conclusion . . . . .	76
<b>Chapter 3. Recent Methods of Constructing Finite Element Models Based on Medical Images . . . . .</b>	<b>79</b>
3.1. Introduction . . . . .	79
3.2. X-ray-based finite element models . . . . .	79
3.3. CT-based finite element models . . . . .	89
3.4. MRI-based finite element models . . . . .	117
3.5. Ultrasound-based finite element models . . . . .	121
3.6. Conclusion . . . . .	124
<b>Chapter 4. Main Bone Sites Modeled Using the Finite Element Method . . . . .</b>	<b>125</b>
4.1. Introduction . . . . .	125
4.2. FE modeling of the calcaneus . . . . .	125
4.3. FE modeling of phalanges . . . . .	127
4.4. FE modeling of the metatarsal . . . . .	129
4.5. FE modeling of the tibia . . . . .	131
4.6. FE modeling of the knee . . . . .	137
4.7. FE modeling of the femur . . . . .	140
4.8. FE modeling of the vertebrae . . . . .	143
4.9. FE modeling of the humerus . . . . .	147
4.10. FE modeling of the elbow . . . . .	149
4.11. FE modeling of the ulna . . . . .	149
4.12. FE modeling of the wrist . . . . .	150
4.13. Conclusion . . . . .	152
<b>Conclusion . . . . .</b>	<b>153</b>
<b>References . . . . .</b>	<b>155</b>
<b>Index . . . . .</b>	<b>179</b>
