<b>Preface</b> . . . . .	ix
<b>Introduction</b> . . . . .	xi
<b>Chapter 1. Evolution of Structural Analysis and Design</b> . . . . .	1
1.1. History of design. . . . .	2
1.2. From empirical rules and intuition to FEM . . . . .	6
1.3. From FEM to AI. . . . .	8
<b>Chapter 2. Metaheuristic Algorithms</b> . . . . .	11
2.1. A brief history of the development of metaheuristic algorithms . . . . .	12
2.2. Generalities about metaheuristic algorithms . . . . .	14
2.3. Evolutionary algorithms . . . . .	17
2.3.1. Genetic algorithms . . . . .	17
2.3.2. The differential evolution algorithm. . . . .	18
2.4. Swarm intelligence . . . . .	19
2.4.1. Particle swarm optimization . . . . .	20
2.4.2. The flower pollination algorithm. . . . .	22
2.4.3. The bat algorithm . . . . .	23
2.5. Other metaheuristic algorithms . . . . .	24
2.5.1. Simulated annealing . . . . .	24
2.5.2. Teaching–learning-based optimization . . . . .	26
2.5.3. Harmony search. . . . .	27
2.5.4. The Jaya algorithm . . . . .	28

<b>Chapter 3. Application of Metaheuristic Algorithms to Structural Problems</b>	31
3.1. Objective function . . . . .	32
3.1.1. Weight . . . . .	32
3.1.2. Cost . . . . .	33
3.1.3. Response . . . . .	35
3.1.4. Effectiveness . . . . .	37
3.1.5. CO <sub>2</sub> emissions in construction . . . . .	38
3.2. The design constraints . . . . .	38
3.2.1. Stress . . . . .	40
3.2.2. Deformations . . . . .	43
3.2.3. Buckling . . . . .	45
3.2.4. Fatigue . . . . .	46
3.2.5. Design regulation rules . . . . .	46
<b>Chapter 4. Applications of Metaheuristic Algorithms in Structural Design</b>	49
4.1. Generalities in structural design . . . . .	49
4.2. Sensibility analyses and reliability . . . . .	50
4.3. Types of structural optimization . . . . .	50
4.4. Basic structural engineering applications . . . . .	52
4.4.1. Vertical deflection minimization problem of an I-beam . . . . .	52
4.4.2. Cost optimization of the tubular column under compressive load . . . . .	56
4.4.3. Weight optimization of cantilever beams . . . . .	60
4.5. Appendix 1 . . . . .	63
4.6. Appendix 2 . . . . .	66
4.7. Appendix 3 . . . . .	69
<b>Chapter 5. Optimization of Truss-like Structures</b>	75
5.1. The optimum design of truss structures . . . . .	75
5.1.1. Analyses of truss structures . . . . .	76
5.1.2. Review of the literature on the optimization of truss structures . . . . .	78
5.2. Numerical applications in the optimization of truss structures . . . . .	79
5.2.1. A 5-bar truss structure optimization problem . . . . .	79
5.2.2. A 3-bar truss structure optimization problem . . . . .	82
5.2.3. A 25-bar truss structure optimization problem . . . . .	85
5.2.4. A 72-bar space truss optimization example . . . . .	88
5.2.5. A 200-bar planar truss optimization example . . . . .	89

---

5.3. Tensegrity structures . . . . .	93
5.4. Appendix 1 . . . . .	94
5.5. Appendix 2 . . . . .	97
<b>Chapter 6. Optimization of Structures and Members . . . . .</b>	<b>101</b>
6.1. Optimum design of RC beams. . . . .	102
6.2. Optimum design of RC spread footings . . . . .	112
6.3. Optimum design of RC columns . . . . .	118
6.4. Optimum design of RC frames . . . . .	126
6.4.1. The first example: two-span two-story RC frame . . . . .	132
6.4.2. The first example: two-span two-story RC frame . . . . .	133
6.5. Optimum design of RC cylindrical walls . . . . .	136
6.5.1. Optimum design of axially symmetric RC walls . . . . .	136
6.5.2. Optimization of post-tensioning forces for cylindrical walls . . . . .	138
6.5.3. Optimization of post-tensioned axially symmetric cylindrical RC walls . . . . .	141
<b>Chapter 7. Optimization in Structural Control Problems . . . . .</b>	<b>143</b>
7.1. Optimum design of tuned mass dampers (TMD). . . . .	144
7.1.1. Time domain-based optimization of TMDs . . . . .	147
7.1.2. Frequency domain-based optimization of TMDs . . . . .	152
7.2. Optimum design of base isolation systems . . . . .	174
<b>Chapter 8. Applications of Metaheuristic Algorithms to Structural Analysis . . . . .</b>	<b>181</b>
8.1. Fundamentals of the method . . . . .	181
8.2. Applications to structures, generalities . . . . .	185
8.3. Applications to trusses and truss-like structures . . . . .	185
8.4. Applications to plates . . . . .	189
8.5. Further studies on the analysis of structures with TPO/MA . . . . .	193
<b>Future Trends . . . . .</b>	<b>195</b>
<b>References . . . . .</b>	<b>199</b>
<b>Index . . . . .</b>	<b>217</b>
