<b>Preface</b> .....	xi
Shikha MEHTA, Sanju TIWARI, Patrick SIARRY and M.A. JABBAR	

<b>Chapter 1. The Role of Semantic Hybrid Multi-Model Multi-Platform (SHM3P) Databases for IoT</b> .....	1
Sven GROPPE, Jinghua GROPPE and Tobias GROTH	

1.1. Introduction .....	1
1.2. Databases for multi-model data .....	5
1.3. Platforms .....	7
1.4. Variations of SHM3P DBMS .....	13
1.5. What are the benefits of SHM3P databases for IoT? .....	14
1.5.1. Data storage and placement .....	14
1.5.2. Data processing .....	15
1.5.3. IoT applications .....	15
1.6. Summary and conclusions .....	16
1.7. References .....	16

<b>Chapter 2. A Systematic Review of Ontologies for the Water Domain</b> .....	21
Sanju TIWARI and Raúl GARCÍA-CASTRO	

2.1. Introduction .....	21
2.2. Literature review .....	23
2.2.1. Features in the water domain .....	23
2.2.2. Semantic models in the water domain .....	24
2.2.3. A comprehensive review of ontologies in the water domain .....	24
2.3. Applications of ontologies in the water domain .....	32

2.4. Discussion and conclusion . . . . .	35
2.5. References . . . . .	36

**Chapter 3. Semantic Web Approach for Smart Health  
to Enhance Patient Monitoring in Resuscitation . . . . .** 41

Fatima Zahra AMARA, Mounir HEMAM, Meriem DJEZZAR  
and Moufida MAIMOUR

3.1. Introduction . . . . .	42
3.2. Background . . . . .	43
3.2.1. Semantic Web . . . . .	43
3.2.2. SSN (Semantic Sensor Network) ontology . . . . .	44
3.3. IoT Smart Health applications and semantics . . . . .	45
3.4. Proposed approach and implementation . . . . .	46
3.4.1. Knowledge representation . . . . .	47
3.4.2. Ontology evaluation . . . . .	51
3.4.3. Reasoning and querying . . . . .	51
3.4.4. Linked Data . . . . .	55
3.5. Conclusion . . . . .	56
3.6. References . . . . .	57

**Chapter 4. Role of Clustering in Discovery Services  
for the Semantic Internet of Things . . . . .** 61

Shachi SHARMA

4.1. Introduction . . . . .	61
4.2. Discovery services in IoT . . . . .	64
4.2.1. Directory-based architectures . . . . .	64
4.2.2. Directory-less architectures . . . . .	66
4.3. Semantic-based architectures . . . . .	67
4.3.1. Search engine-based . . . . .	67
4.3.2. ONS DNS-based . . . . .	68
4.4. Discovery services and clustering . . . . .	68
4.5. Clustering methods in IoT . . . . .	69
4.6. Conclusion . . . . .	71
4.7. References . . . . .	71

**Chapter 5. Dynamic Security Testing Techniques for the  
Semantic Web of Things: Market and Industry Perspective . . . . .** 75

Dhananjay SINGH CHAUHAN, Gaurav CHOUDHARY,  
Shishir Kumar SHANDILYA and Vikas SIHAG

5.1. Introduction . . . . .	75
-----------------------------	----

---

5.2. Related studies . . . . .	77
5.3. Background of dynamic security testing techniques . . . . .	79
5.3.1. Black Box testing techniques . . . . .	80
5.4. DAST using static analysis. . . . .	82
5.4.1. Current implementation . . . . .	82
5.5. DAST using user session. . . . .	84
5.5.1. Current implementation . . . . .	84
5.6. DAST using Extended Tainted Mode Model . . . . .	86
5.6.1. Current implementation . . . . .	87
5.7. Current issues and research directions . . . . .	88
5.8. Conclusion . . . . .	89
5.9. References . . . . .	89
<b>Chapter 6. SciFiOnto: Modeling, Visualization and Evaluation of Science Fiction Ontologies Based on Indian Contextualization with Automatic Knowledge Acquisition . . . . .</b>	93
Gerard DEEPAK, Ayush A. KUMAR and Sheeba J. PRIYADARSHINI	
6.1. Introduction. . . . .	94
6.2. Literature survey. . . . .	97
6.2.1. Formulation and modeling of ontologies for varied domains of importance. . . . .	97
6.2.2. Auxiliary automatic and semi-automatic models in ontology synthesis .	97
6.2.3. Ontology-driven systems and applications . . . . .	98
6.2.4. Automatic Knowledge Acquisition systems . . . . .	99
6.2.5. Science fiction as an independent domain of existence. . . . .	99
6.3. Modeling and evaluation of the ontology . . . . .	100
6.3.1. Ontology modeling. . . . .	100
6.3.2. Ontology visualization. . . . .	104
6.3.3. Ontology evaluation . . . . .	107
6.4. Automatic Knowledge Acquisition model. . . . .	111
6.4.1. System architecture. . . . .	111
6.4.2. Acquisition algorithm . . . . .	113
6.5. Conclusion . . . . .	119
6.6. References . . . . .	119
<b>Chapter 7. Semantic Web-Enabled IoT Integration for a Smart City .</b>	123
Ronak PANCHAL and Fernando ORTIZ-RODRIGUEZ	
7.1. Introduction: Semantic Web and sensors . . . . .	123
7.2. Motivation and challenge. . . . .	124
7.3. Literature review. . . . .	124

7.4. Implementation of forest planting using SPARQL queries . . . . .	125
7.4.1. Architecture sketch with conceptual diagram . . . . .	125
7.4.2. Implementation ontology from the dataset . . . . .	126
7.4.3. Technologies and tools. . . . .	129
7.5. Conclusion . . . . .	136
7.6. References . . . . .	136
 <b>Chapter 8. Heart Rate Monitoring Using IoT and AI . . . . .</b>	139
Kalpana MURUGAN, Cherukuri NIKHIL KUMAR, Donthu Sai SUBASH and Sangam DEVA KISHORE REDDY	
8.1. Introduction. . . . .	140
8.2. Literature survey. . . . .	142
8.3. Heart rate monitoring system . . . . .	145
8.4. Results and discussion . . . . .	149
8.5. Conclusion and future works . . . . .	152
8.6. References . . . . .	152
 <b>Chapter 9. IoT Security Issues and Its Defensive Methods . . . . .</b>	155
Keshavi NALLA and Seshu VARDHAN POTHABATHULA	
9.1. Introduction. . . . .	155
9.2. IoT security architecture . . . . .	158
9.2.1. Typical IoT architecture . . . . .	158
9.2.2. Centralized and distributed approaches over the IoT security architecture . . . . .	161
9.2.3. IoT security architecture based on blockchain . . . . .	163
9.2.4. Internet of Things security architecture: trust zones and boundaries . . . . .	164
9.2.5. Threat modeling in IoT security architecture. . . . .	168
9.3. Specific security challenges and approaches . . . . .	170
9.3.1. Identity and authentication . . . . .	170
9.3.2. Access control. . . . .	171
9.3.3. Protocol and network security . . . . .	172
9.3.4. Privacy . . . . .	172
9.3.5. Trust and governance . . . . .	173
9.3.6. Fault tolerance. . . . .	173
9.4. Methodologies used for securing the systems. . . . .	174
9.4.1. PKI and digital certificates . . . . .	174
9.4.2. Network security . . . . .	174
9.4.3. API security . . . . .	174
9.4.4. Network access control . . . . .	175

---

9.4.5. Segmentation . . . . .	175
9.4.6. Security gateways. . . . .	175
9.4.7. Patch management and software updates . . . . .	175
9.5. Conclusion . . . . .	176
9.6. References . . . . .	176
<b>Chapter 10. Elucidating the Semantic Web of Things for Making the Industry 4.0 Revolution a Success . . . . .</b>	179
Deepika CHAUDHARY and Jaiteg SINGH	
10.1. Introduction . . . . .	179
10.2. Correlation of the Semantic Web of Things with IR4.0 . . . . .	180
10.2.1. Smart machines . . . . .	181
10.2.2. Smart products. . . . .	182
10.2.3. Augmented operators. . . . .	182
10.2.4. The Web of Things . . . . .	183
10.2.5. Semantic Web of Things. . . . .	184
10.3. Smart manufacturing system and ontologies . . . . .	185
10.3.1. Vertical level integration. . . . .	185
10.3.2. Horizontal level of integration . . . . .	185
10.3.3. End-to-end integration . . . . .	185
10.4. Literature survey . . . . .	188
10.5. Conclusion and future work . . . . .	190
10.6. References . . . . .	190
<b>Chapter 11. Semantic Web and Internet of Things in e-Health for Covid-19 . . . . .</b>	195
ANURAG and Naren JEEVA	
11.1. Introduction . . . . .	196
11.2. Dataset . . . . .	197
11.3. Application of IoT for Covid-19. . . . .	198
11.3.1. Continuous real-time remote monitoring . . . . .	198
11.3.2. Remote monitoring using W-kit . . . . .	198
11.3.3. Early identification and monitoring . . . . .	198
11.3.4. Continuous and reliable health monitoring . . . . .	198
11.3.5. ANN-assisted patient monitoring. . . . .	199
11.3.6. City lockdown monitoring. . . . .	199
11.3.7. Technologies for tracking and tracing . . . . .	199
11.3.8. Tracking and tracing suspected cases . . . . .	199
11.3.9. Anonymity preserving contact tracing model. . . . .	200
11.3.10. Cognitive radio-based IoT architecture . . . . .	200

11.3.11. Analyzing reasons for the outbreak . . . . .	200
11.3.12. Analyzing Covid-19 cases using disruptive technology . . . . .	200
11.3.13. Post-Covid applications . . . . .	201
11.4. Semantic Web applications for Covid-19 . . . . .	201
11.4.1. Ontological approach for drug development . . . . .	202
11.4.2. Early detection and diagnosis . . . . .	202
11.4.3. Knowledge-based pre-diagnosis system . . . . .	202
11.4.4. Semantic-based searching for online learning resources . . . . .	203
11.4.5. Ontology-based physiological monitoring of students . . . . .	203
11.4.6. Analysis of clinical trials . . . . .	203
11.4.7. Data annotation of EHRs . . . . .	204
11.4.8. Disease pattern study . . . . .	204
11.4.9. Surveillance in primary care . . . . .	204
11.4.10. Performance assessment of healthcare services . . . . .	205
11.4.11. Vaccination drives and rollout strategies . . . . .	205
11.5. Limitations and challenges of IoT and SW models . . . . .	205
11.6. Discussion . . . . .	206
11.7. Conclusion . . . . .	206
11.8. References . . . . .	207
 <b>Chapter 12. Development of a Semantic Web Enabled Job_Search Ontology System . . . . .</b>	211
Hina J. CHOKSHI, Dhaval VYAS and Ronak PANCHAL	
12.1. Introduction . . . . .	211
12.1.1. Ontology . . . . .	212
12.1.2. Importance of ontology . . . . .	213
12.1.3. Semantic Web and its solutions . . . . .	214
12.1.4. Online recruitment scenarios . . . . .	214
12.2. Review of the related work done for online recruitment . . . . .	215
12.3. Design of “SearchAJob” ontology for the IT domain . . . . .	217
12.3.1. Ontology structure . . . . .	218
12.4. Implementing the proposed ontology . . . . .	222
12.4.1. Architecture of semantics-based job ontology . . . . .	223
12.5. Benefits of Semantic Web enabled SearchAJob system . . . . .	231
12.6. Conclusion and future scope . . . . .	232
12.7. References . . . . .	233
 <b>List of Authors . . . . .</b>	237
 <b>Index . . . . .</b>	241
