Contents

Foreword ix

Preface xiii

Part 1. Requirements Engineering 1

Chapter 1. The Requirements Engineering Process 3

1.1. Background and main definitions 3
1.2. Requirements engineering process 10
1.2.1. Requirements engineering and ISO 15288 processes 11
1.2.2. Requirements engineering and ISO 29110 processes 14
1.2.3. Problem versus solution 18
1.3. Requirements engineering process and modeling 19
1.4. Engineering processes and project management 26

Chapter 2. A Method for Requirements Engineering 31

2.1. Proposal of a requirements engineering method 31
2.1.1. Requirement diagram 36
2.1.2. Block definition diagram 38
2.1.3. Use case diagram 38
2.1.4. State machine diagram 39
2.1.5. Sequence diagram 39
2.1.6. Activity diagram 40
2.2. Define the system framework 40
2.2.1. Goal 40
2.2.2. Define the system framework using SysML 41
2.2.3. Systematization and verification 43

2.3. Define the system life cycle 43
2.3.1. Goal 43
2.3.2. Define the system life cycle using SysML 44
2.3.3. Systematization and verification 45
2.4. Define contexts. 45
2.4.1. Goal 45
2.4.2. Define contexts using SysML 45
2.4.3. Systematization and verification 47
2.5. Define uses 47
2.5.1. Goal 47
2.5.2. Define uses using SysML 49
2.5.3. Systematization and verification 52
2.6. Describe the use scenarios 53
2.6.1. Goal 53
2.6.2. Describe the use scenarios using SysML 53
2.6.3. Systematization and verification 62
2.7. Define functional requirements 62
2.7.1. Goal 62
2.7.2. Define functional requirements using SysML 65
2.7.3. Systematization and verification 67
2.8. Define non-functional requirements 67
2.8.1. Goal 67
2.8.2. Define non-functional requirements using SysML 68
2.8.3. Systematization and verification 70
2.9. Ensure traceability. 72
2.9.1. Goal 72
2.9.2. Ensure traceability using SysML. 72
2.9.3. Systematization and verification 75
2.10. Conclusion 75

Part 2. Case Study, Application of the Method 77

Chapter 3. Definition of Stakeholders' Needs 79

3.1. Case study 79
3.1.1. Context of the case study 80
3.1.2. Structure of the SysML project 81
3.1.3. Presentation of the results 84
3.2. Definition of needs 85
3.2.1. Define the system framework. 85
3.2.2. Define the system life cycle. 86
3.2.3. Define contexts 87
3.2.4. Define uses. 89

3.2.5. Describe the use scenarios. 92
3.2.6. Define functional requirements. 92
3.2.7. Define non-functional requirements 95
3.2.8. Ensure traceability 95
3.3. Stakeholder needs definition documents. 98
3.3.1. Use a document template 98
3.3.2. Use a list of needs 119

Chapter 4. System Requirements Engineering 125

4.1. Case study 125
4.1.1. Structure of the SysML project. 125
4.1.2. Presentation of the results 126
4.2. Definition of system requirements 126
4.2.1. Define the system framework. 126
4.2.2. Define the system life cycle. 127
4.2.3. Define contexts 127
4.2.4. Define uses. 128
4.2.5. Describe the use scenarios. 132
4.2.6. Define functional requirements. 135
4.2.7. Define non-functional requirements 136
4.2.8. Ensure traceability 136
4.3. System requirements analysis document. 139
4.4. Requirements management 161
4.4.1. Fundamental elements 162
4.4.2. Management workflows 168
4.4.3. Use in student projects 173

Chapter 5. Integration with Other Methods 175

5.1. Context 175
5.2. Integration with the Harmony SE method 175
5.2.1. Modification of the project structure 176
5.2.2. The Harmony SE method and requirements engineering 176
5.2.3. Definition of stakeholders' needs 178
5.2.4. Analysis of system requirements. 179
5.2.5. Conclusion. 180
5.3. Integration with the Arcadia method 180
5.3.1. The Arcadia method and requirements engineering. 181
5.3.2. Definition of stakeholders' needs 182
5.3.3. Analysis of system requirements. 183
5.3.4. Conclusion. 185

5.4. Integration with the CESAM method 186
5.4.1. The CESAM method and requirements engineering 186
5.4.2. Definition of stakeholders' needs 187
5.4.3. Analysis of system requirements 189
5.4.4. Conclusion 189
