Preface	xi
Chapter 1. Introduction to Environmental Management and Services	1
Thi Kim Oanh NGUYEN, Quoc Tuan LE, Thongchai KANABKAEW, Sukhuma CHITAPORPAN and Truong Ngoc Han LE	
1.1. Introduction	1
1.2. Environmental components	2
1.2.1. Lithosphere	3
1.2.2. Atmosphere	3
1.2.3. Hydrosphere	4
1.2.4. Biosphere	5
1.3. Environmental pollution	6
1.3.1. Air pollution	6
1.3.2. Water pollution	7
1.3.3. Soil pollution	8
1.3.4. Biological pollution	8
1.4. Environmental quality management	9
1.4.1. Air quality management: technical tools and data management	9
1.4.2. Water quality management	11
1.4.3. Biosphere reservation and management	12
1.5. Data services for the environment	14
1.6. References	15

Part. Environmental Case Studies	17
Chapter 2. Air Quality Monitoring with Focus on Wireless Sensor Application and Data Management	19
Tan Loi HUYNH, Sathita FAKPRAPAI and Thi Kim Oanh NGUYEN	
2.1. Introduction	20
2.2. Development of air pollution monitoring techniques.	20
2.2.1. Conventional air pollution monitoring	21
2.2.2. Sensing technology for air monitoring	25
2.3. Wireless sensor network for air monitoring	28
2.3.1. Case studies of application of wireless sensors for air quality monitoring	29
2.3.2. AIT case study 1	30
2.3.3. AIT case study 2	32
2.3.4. Influencing factors of low-cost sensor performance in air pollution monitoring	35
2.4. Summary: toward application of cloud computing for air quality monitoring data management	36
2.5. References	36
Chapter 3. Emission Inventories for Air Pollutants and Greenhouse Gases with Emphasis on Data Management in the Cloud	41
Thi Kim Oanh NGUYEN, Nguyen Huy LAI, Didin Agustian PERMADI, Nhat Ha Chi NGUYEN, Kok SOTHEA, Sukhuma CHITAPORPAN, Thongchai KANABKAEW, Jantira RATTANARAT and Surasak SICHUM	
3.1. Introduction	42
3.2. Methodology for development of EI database.	43
3.2.1. Framework of EI development.	43
3.2.2. Calculation of EI	44
3.2.3. Sources of data	45
3.3. Case studies	52
3.3.1. Southeast Asia (SEA).	52
3.3.2. Vietnam inland domain.	56
3.3.3. Bangkok Metropolitan Region, Thailand	59
3.3.4. Forest fire emissions from Nakhon Si Thammarat, Thailand	60
3.3.5. Phnom Penh (PNH), Cambodia	63
3.4. Summary and conclusion	65
3.5. References	65

Chapter 4. Atmospheric Modeling with Focus on Management of Input/Output Data and Potential of Cloud Computing Applications 73

Thi Kim Oanh NGUYEN, Nhat Ha Chi NGUYEN, Nguyen Huy LAI and Didin Agustian PERMADI

4.1. Introduction	74
4.1.1. Atmospheric modeling	74
4.1.2. Roles of modeling in air quality management	75
4.1.3. Existing modeling systems	76
4.2. Model architecture of chemistry transport model	80
4.2.1. Conceptual framework and structure	80
4.2.2. Data flow and processing	83
4.3. Output data processing	85
4.3.1. Output data processing	85
4.3.2. Model performance evaluation	86
4.4. Potential applications of cloud computing in atmospheric modeling	87
4.4.1. Current status of cloud computing applications in atmospheric modeling	87
4.4.2. Potential applications of cloud computing in air quality modeling	88
4.5. Case studies of air pollution modeling in Southeast Asia	89
4.5.1. Modeling air quality in Vietnam	89
4.5.2. Modeling air quality in the Bangkok Metropolitan Region	93
4.5.3. Modeling air quality in the Southeast Asia domain	96
4.6. Summary and conclusion	99
4.7. References	100

Chapter 5. Particulate Matter Concentration Mapping from Satellite Imagery 103

Thi Nhat Thanh NGUYEN, Viet Hung LUU, Van Ha PHAM, Quang Hung BUI and Thi Kim Oanh NGUYEN

5.1. Introduction	103
5.2. Relation of aerosol optical thickness, meteorological variables and particulate matter concentration	104
5.2.1. Data collection	105
5.2.2. Outlier detection	105
5.2.3. Data integration	105
5.2.4. Correlation analysis	106
5.2.5. Validation of satellite-derived AOD and ground-measured AOD	107
5.2.6. Relation of particulate matter concentration and meteorological variables	108
5.2.7. Relation of particulate matter concentration and satellite-derived AOD	111

5.3. PM _{2.5} mapping from moderate resolution satellite images	114
5.3.1. Data collection	114
5.3.2. Multiple variable regressions	115
5.3.3. Data interpolation	115
5.3.4. Evaluation metrics	116
5.3.5. Predictor variables and model selection.	116
5.3.6. Interpolation model	117
5.3.7. Map validation results	118
5.4. PM ₁₀ mapping from high resolution satellite images	119
5.4.1. Dataset	119
5.4.2. Radiometric normalization	120
5.4.3. Relative Aerosol Optical Depth Extraction	121
5.4.4. Least square fitting	123
5.4.5. PM ₁₀ estimation from SPOT images	124
5.5. Conclusion	127
5.6. References	127
Chapter 6. Comparison and Assessment of Culturable Airborne Microorganism Levels and Related Environmental Factors in Ho Chi Minh City, Vietnam	131
Tri Quang Hung NGUYEN, Minh Ky NGUYEN and Ngoc Thu Huong HUYNH	
6.1. Introduction	131
6.2. Materials and methods	132
6.2.1. Studying sites	132
6.2.2. Sampling	133
6.2.3. Identification of microorganisms	134
6.2.4. Statistical analysis	134
6.3. Results and discussions	135
6.3.1. Results of environmental factors in Ho Chi Minh City	135
6.3.2. Results of monitoring on culturable microorganism levels in ambient air	136
6.3.3. Comparison and assessment of environmental factor effects on culturable microorganism levels.	139
6.3.4. Principal component analysis of microorganism groups	146
6.4. Conclusion	149
6.5. References	150
Chapter 7. Application of GIS and RS in Planning Environmental Protection Zones in Phu Loc District, Thua Thien Hue Province	155
Quoc Tuan LE, Trinh Minh Anh NGUYEN, Huy Anh NGUYEN and Truong Ngoc Han LE	
7.1. Introduction	155

7.2. Materials and research methods	157
7.2.1. Materials	157
7.3. Research methods	158
7.3.1. Research approach	158
7.3.2. Research methods	158
7.3.3. Results and discussion	160
7.3.4. Environmental protection planning map	161
7.4. Conclusion	164
7.5. References	164
Chapter 8. Forecasting the Water Quality and the Capacity of the Dong Nai River to Receive Wastewater up to 2020.	165
Quoc Tuan LE, Thi Kieu Diem NGO and Truong Ngoc Han LE	
8.1. Introduction	165
8.2. Materials and methods	166
8.2.1. Assessing the water quality and partitioning the receiving zone	166
8.2.2. MIKE 11 modeling	167
8.3. Results and discussion.	167
8.3.1. The water quality of the Dong Nai River	167
8.3.2. Waste sources to the Dong Nai River	168
8.3.3. Waste load to Dong Nai river	169
8.3.4. Forecasting load to the Dong Nai River in 2020	170
8.3.5. Water quality forecasting.	172
8.3.6. Partition for water receiving of the Dong Nai River	173
8.4. Conclusion	173
8.5. Appendix	174
8.6. References	175
Chapter 9. Water Resource Management	177
Imeshi WEERASINGHE	
9.1. Introduction	177
9.1.1. The hydrological cycle	178
9.1.2. Hydrological models	179
9.2. Hydrological models for water resource management	179
9.2.1. Soil and Water Assessment Tool (SWAT)	180
9.2.2. Geographical information systems (GIS) and the SWAT model	181
9.3. Setting up of a SWAT model for the Blue Nile basin	181
9.4. Scenario analysis using SWAT	184
9.4.1. Management scenarios	185
9.4.2. Land use scenarios	185
9.4.3. Climate change scenarios	185

9.5. Cloud computing and SWAT	186
9.6. References	186
Chapter 10. Assessing Impacts of Land Use Change and Climate Change on Water Resources in the La Vi Catchment, Binh Dinh Province	191
Kim Loi NGUYEN, Le Tan Dat NGUYEN, Hoang Tu LE, Duy Liem NGUYEN, Ngoc Quynh Tram VO, Van Phan LE, Duy Nang NGUYEN, Thi Thanh Thuy NGUYEN, Gia Diep PHAM, Dang Nguyen Dong PHUONG, Thi Hong NGUYEN, Thong Nhat TRAN, Margaret SHANAFIELD and Okke BATELAAN	
10.1. Introduction	191
10.1.1. Background of the study/related literature	192
10.1.2. Description of study area	195
10.1.3. Land use/land cover	197
10.2. Materials and methodology	198
10.2.1. Brief description of the SWAT model	198
10.2.2. Materials	200
10.2.3. Data collection	200
10.2.4. Methodology	203
10.3. Primary results	203
10.3.1. The automatic hydro-meteorology	203
10.3.2. Assessing water discharge in the La Vi catchment using the SWAT model	205
10.4. Conclusion	206
10.5. Acknowledgments	206
10.6. References	207
Conclusion and Future Prospects	211
Dominique LAFFLY and Yannick LE NIR	
List of Authors	215
Index	219
Summaries of other volumes	221
