<b>Introduction . . . . .</b>	ix
<b>Chapter 1. Steel Corrosion in Reinforced Concrete . . . . .</b>	
1.1. Introduction . . . . .	1
1.2. General corrosion theory concepts . . . . .	4
1.2.1. Reversible electrode . . . . .	4
1.2.2. Uniform corrosion system . . . . .	10
1.2.3. Localized (or galvanic) corrosion system . . . . .	19
1.3. Specific features of steel corrosion in concrete . . . . .	22
1.3.1. Passivation of steel in concrete . . . . .	22
1.3.2. Corrosion initiation . . . . .	23
1.3.3. Evolution of the corrosion process with corrosion duration . . . . .	41
1.3.4. Natural corrosion and accelerated corrosion under electrical field . . . . .	41
<b>Chapter 2. Scale and Structural Effects on the Corrosion of Reinforced-Concrete Reinforcements . . . . .</b>	
2.1. Introduction . . . . .	43
2.2. Influence of cracks on the corrosion process . . . . .	44
2.2.1. Service cracks and their opening . . . . .	44
2.2.2. Service cracks and damaging of the steel-concrete interface . . . . .	46
2.2.3. Service cracks and their influence on liquid, ionic and gaseous transfers . . . . .	48
2.2.4. Service cracks and their influence on the corrosion mechanism . . . . .	48

2.3. Standard-based approach concerning the influence of service cracking on reinforcement corrosion in reinforced concrete . . . . .	51
2.4. Defects and damaging of the steel-concrete interface . . . . .	53
2.5. Influence of “structural” (concrete casting) defects on the corrosion process: experimental results . . . . .	56
2.6. Steel reinforcement of structures with several reinforcement layers and macro-cell corrosion process (localized corrosion) . . . . .	59
2.7. Conclusion . . . . .	61
<b>Chapter 3. Which Parameter to Quantify Corrosion Intensity? . . . . .</b>	<b>63</b>
3.1. Introduction . . . . .	63
3.2. Degree of local corrosion, defined as the loss of cross-section on a reinforcement (localized corrosion, LC) . . . . .	65
3.3. Degree of corrosion defined as the average loss of cross-section on a reinforcement (generalized corrosion, GC) . . . . .	70
3.4. Pitting factors: $pf_s$ , $pf_g$ , $pf_{lc}$ . . . . .	71
3.4.1. Can localized corrosion (LC) be described by a statistical law? . . . . .	72
3.4.2. Field of variation of pitting factor ( $pf_s$ ) . . . . .	74
3.5. Conclusion: corrosion quantification . . . . .	76
<b>Chapter 4. <i>In situ</i> Corrosion Diagnosis . . . . .</b>	<b>77</b>
4.1. Introduction . . . . .	77
4.2. Determining steel reinforcement . . . . .	78
4.3. Corrosion diagnosis using electrochemical techniques . . . . .	78
4.3.1. Corrosion diagnosis using a potential mapping of the reinforcements . . . . .	78
4.3.2. Corrosion diagnosis based on a linear polarization resistance measurement . . . . .	81
4.4. Quantification of corrosion rate by recording the cracks created by reinforcement corrosion . . . . .	87
4.4.1. Rate of local corrosion triggering corrosion-induced cracks . . . . .	87
4.4.2. Recording corrosion crack openings . . . . .	90
4.4.3. Correlation between corrosion crack openings and maximum LOCAL corrosion (localized corrosion, LC) . . . . .	93

---

4.4.4. Correlation between corrosion crack openings and generalized corrosion (GC) across a length neighboring the spacing between the service cracks, or the shear stirrups in the absence of service cracks . . . . .	95
4.4.5. Example of corrosion diagnosis based on a visual examination of the concrete surface. . . . .	97
<b>Chapter 5. Effects of Reinforcement Corrosion on the Mechanical Behavior of Reinforced Concrete . . . . .</b>	<b>105</b>
5.1. Introduction . . . . .	105
5.2. Effect of corrosion on the mechanical behavior of reinforcement steel . . . . .	106
5.2.1. Mechanical behavior of non-corroded steel . . . . .	106
5.2.2. Mechanical behavior of corroded steel . . . . .	108
5.3. Effect of corrosion on steel-concrete bond . . . . .	115
5.3.1. Bond between non-corroded steel and concrete . . . . .	115
5.3.2. Bond between corroded steel and concrete . . . . .	116
5.4. Effect of corrosion on the bending mechanical behavior of reinforced-concrete beams . . . . .	121
5.4.1. Effect of corrosion on behavior at ULS: yielding load, bearing capacity and deflection at failure . . . . .	121
5.4.2. Effect of corrosion on behavior at SLS: modification of deflections in service, redistribution of forces by steel yielding . . . . .	127
5.5. Effect of corrosion on mechanical behavior with regard to the shear force of reinforced-concrete beams. . . . .	130
<b>Chapter 6. Prediction of Bearing Capacity and Behavior in Service of Corroded Structures . . . . .</b>	<b>135</b>
6.1. Introduction . . . . .	135
6.2. Framework for assessing the actual (residual) behavior of a corroded structure . . . . .	136
6.3. Phenomenological study of the behavior of a reinforced-concrete beam under bending, before and after corrosion . . . . .	136
6.4. Assessment of the actual (residual) bearing capacity of a corroded structure. . . . .	138
6.4.1. Behavior before corrosion. . . . .	138
6.4.2. Behavior after corrosion . . . . .	145
6.4.3. Numerical application for corroded beam Bs04, compared to a control beam, BsT . . . . .	149

6.5. Assessment of behavior in service (bending stiffness and deflections) of a corroded structure . . . . .	157
6.5.1. Bending stiffness before corrosion. . . . .	158
6.5.2. Bending stiffness after corrosion. . . . .	162
6.5.3. Numerical application for corroded beam Bs04, compared to a control beam, BsT . . . . .	166
6.6. Conclusion . . . . .	173
<b>Chapter 7. Predicting the Service Life of Structures . . . . .</b>	<b>175</b>
7.1. Introduction. . . . .	175
7.2. Corrosion initiation . . . . .	176
7.3. Corrosion propagation . . . . .	177
7.4. Prediction of the occurrence of corrosion cracks: duration, $t_c$ . . . . .	182
7.5. Prediction of the growth in corrosion cracks in relation to the corrosion duration . . . . .	183
7.6. Service-life prediction . . . . .	185
7.6.1. Service Limit States . . . . .	186
7.6.2. Ultimate Limit States. . . . .	189
7.6.3. Predicting service life . . . . .	191
<b>Chapter 8. Repair and Maintenance of Reinforced-Concrete Structures . . . . .</b>	<b>193</b>
8.1. Introduction. . . . .	193
8.2. Prevention and cathodic protection. . . . .	194
8.2.1. General principals . . . . .	194
8.2.2. Standards-approach context. . . . .	197
8.2.3. Discussion . . . . .	198
8.3. Realkalinization and Dechlorination . . . . .	201
<b>Appendix . . . . .</b>	<b>203</b>
<b>Bibliography . . . . .</b>	<b>207</b>
<b>Index . . . . .</b>	<b>221</b>
