Introduction	xi
Imad SALEH, Mehdi AMMI and Samuel SZONIECKY	
Chapter 1. Internet of Things (IoT): Concepts, Issues, Challenges and Perspectives	1
Imad SALEH	
1.1. Introduction	1
1.2. The connected object (CO)	2
1.3. Internet of Things: definition	3
1.3.1. Applications	5
1.4. Steps and technologies in the IoT ecosystem	5
1.4.1. IoT architecture	6
1.5. From the IoT to the Internet of Everything (IoE)	9
1.6. IoT and Big Data	10
1.7. Cloud computing applied to Big Data and the IoT	13
1.8. Data science and the IoT	13
1.9. Stakes and challenges of the IoT	14
1.9.1. Technological challenges	14
1.9.2. Societal challenges	15
1.9.3. Environmental challenges	16
1.9.4. Confidence in the IoT	16
1.9.5. Challenges for businesses	16
1.9.6. Challenges for researchers	17
1.10. Opportunities and threats in the IoT ecosystem	17
1.11. IoT security	18
1.12. Blockchain and the IoT	20
1.12.1. Definition	20
1.12.2. Operation	20

1.12.3. Applications	22
1.13. Conclusion	22
1.14. References	24
Chapter 2. Deep Learning Approach of Raw Human Activity Data	27
Hamdi AMROUN, M'Hamed (Hamy) TEMKIT and Mehdi AMMI	
2.1. Introduction	27
2.2. State of the art	29
2.3. Experimental configuration	33
2.4. Analysis of the activity	34
2.4.1. Neural network architecture	34
2.5. Results	41
2.6. Discussion	42
2.7. Conclusion	44
2.8. References	44
Chapter 3. Study and Development of a Smart Cup for Monitoring Post-stroke Patients' Activities at Home	53
Mehdi AMMI, Mehdi BOUKALLEL, Margarita ANASTASSOVA, Hamdi AMROUN and Maxence BOBIN	
3.1. Introduction	53
3.2. Related work	55
3.2.1. Upper limbs motor assessment tools	55
3.2.2. New platforms for stroke assessment	56
3.2.3. Activity analysis and monitoring	56
3.2.4. Tasks and rehabilitation exercises for strokes	57
3.3. Design concept	58
3.3.1. Task identification	58
3.3.2. Monitored information	59
3.3.3. Sensory feedback	61
3.4. Implementation of the prototype	61
3.4.1. Grasping force detection	62
3.4.2. Liquid level detection	62
3.4.3. Orientation detection	63
3.4.4. Relative position detection	63
3.5. Data processing	64
3.5.1. Orientation calculation	64
3.5.2. Tremor detection	65
3.5.3. Activity recognition	67
3.6. Planned studies	72
3.6.1. Studies with therapists	72

3.6.2. Studies with patients	72
3.7. Conclusion and perspectives	72
3.8. References	73
Chapter 4. Enabling Fast-prototyping of Connected Things using the WiNo* Family	77
Adrien VAN DEN BOSSCHE, Réjane DALCÉ and Thierry VAL	
4.1. Introduction	77
4.2. Context	79
4.3. State of the art	80
4.4. Introducing the WiNo* family	85
4.4.1. WiNoRF22 and TeensyWiNo	87
4.4.2. WiNoLoRa	89
4.4.3. DecaWiNo	90
4.4.4. Summary of WiNo nodes	92
4.5. Results and examples of use	93
4.5.1. WiNo and TeensyWiNo	93
4.5.2. WiNoLoRa	97
4.5.3. DecaWiNo	98
4.5.4. Summary and comparative analysis	99
4.6. Conclusion and outlook	100
4.7. Acknowledgments	101
4.8. References	101
Chapter 5. Multi-standard Receiver for Medical IoT Sensor Networks	105
Tarak ARBI and Benoit GELLER	
5.1. Introduction	105
5.2. General context	106
5.2.1. OFDM	106
5.2.2. Characteristics of IEEE 802.11a/b/g/n/ac standards	107
5.3. The IEEE 802.15.6 standard	109
5.3.1. The WBAN frame	110
5.3.2. Specificities of the WBAN physical layer	111
5.4. Physical layer design	114
5.4.1. Frame synchronization	114
5.4.2. Frequency synchronization	115
5.4.3. Time synchronization	117
5.5. Simulation results	118
5.6. Conclusion	120
5.7. References	120

Chapter 6. Ambient Atoms: a Device for Ambient Information Visualization	123
Sébastien CROUZY, Stan BORKOWSKI and Sabine COQUILLART	
6.1. Introduction	123
6.2. Previous research	125
6.2.1. Dedicated ambient displays that do not integrate a display screen	125
6.2.2. Generic ambient displays that do not include a display screen	126
6.3. Ambient Atoms: user's point of view	126
6.4. Ambient Atoms: hardware and software components	127
6.4.1. Hardware: microcontroller	127
6.4.2. Hardware: LEDs	128
6.4.3. Software	129
6.5. Ambient Atoms: prototype applied to the housing information visualization	130
6.6. Future research and conclusion	133
6.7. Acknowledgments	134
6.8. References	134
Chapter 7. New Robust Protocol for IoV Communications	137
Lylia ALOUACHE, Nga NGUYEN, Makhlof ALIOUAT and Rachid CHELOUAH	
7.1. Introduction	137
7.2. Latest developments	138
7.2.1. Architecture of the IoV	138
7.2.2. Communication obstacles	139
7.2.3. Related work	140
7.3. Multi-criterion routing protocol	145
7.3.1. Applications and services	146
7.3.2. Multi-criterion routing protocols in IoV communications	148
7.4. Conclusion and perspectives	159
7.5. References	161
Chapter 8. Interconnected Virtual Space and Theater: A Research–Creation Project on Theatrical Performance Space in the Network Era	165
Georges GAGNERÉ, Cédric PLESSIET and Rémy SOHIER	
8.1. Introduction	165

8.2. A multidisciplinary experiment involving live performance and digital art	166
8.2.1. Defining avatar and mocapto	166
8.2.2. System description	167
8.2.3. From Kinect to Perception Neuron: a new mobility	168
8.3. Acting relationship between the mocapto and the avatar.	170
8.3.1. Controlling the avatar's spatial disposition	170
8.3.2. The mocapto's reference space: the Ninja Theory example	171
8.3.3. A closer look at the articulation of the reference spaces	173
8.3.4. Mobility of the mocapto in their performance space.	174
8.4. From mocapto to avatar from a technical perspective	175
8.4.1. Two-stage motion retargeting.	175
8.4.2. Avatar movement: combination of multiple sources	177
8.4.3. Combination with independent behavior: pathfinding	179
8.4.4. An architecture oriented toward interconnected objects	181
8.5. A practical application that raises new questions.	183
8.5.1. New experimentation spaces for actors, directors and digital artists.	183
8.5.2. The problem of visual composition for augmented scenes.	184
8.5.3. Redefining the role of the digital artist	187
8.6. Conclusion	188
8.7. References	188
Chapter 9. Mobile Telephones and Mobile Health: a Societal Question Under Debate in the Public Domain.	191
Brigitte JUANALS	
9.1. Introduction	191
9.2. An interdisciplinary activity sector and field of research: between connected health and connected well-being	193
9.3. "Boundary objects", socioeconomic strategies and innovative forms of sociotechnical mediation in equipped mobility	196
9.4. Mobile health-care service access systems: toward intermediation or disintermediation?	198
9.5. Forms of regulation of mobile health-care access: a legal, technical and sociopolitical issue under debate	204
9.6. Conclusion and new avenues of research	210
9.7. References	211

Chapter 10. Modeling Power to Act for an Ethics of the Internet of Things	215
Samuel SZONIECKY	
10.1. Introduction	215
10.2. Principles of ethical modeling	216
10.2.1. Theoretical principles.	217
10.2.2. Graphic principles.	218
10.3. Calculating the complexity of an ecosystem.	228
10.3.1. Existential complexity	228
10.3.2. Comparing the complexity of points of view	231
10.4. Automatic ecosystem enrichment	235
10.4.1. Constitution of raw data corpus.	235
10.4.2. Transformation of raw data	238
10.5. Conclusion	241
10.6. References	243
List of Authors	247
Index	249
