Foreword	xi
Acknowledgments	xiii
Introduction	xv
Part 1. Hazards, Risks and Disasters	1
Chapter 1. From Hazard to Disaster	3
1.1. Hazard, vulnerability and risk	3
1.2. Disaster	4
Chapter 2. Earth and Fire	7
2.1. Earthquakes	7
2.1.1. Japan, principal seismic country	8
2.1.2. The effects of earthquakes	9
2.2. Volcanoes	13
2.2.1. Japan, principal volcanic country	14
2.2.2. Volcanic risks	16
2.2.3. The benefits of volcanoes	17
Chapter 3. Air and Water	21
3.1. Strong winds	21
3.1.1. Typhoons, spring winds and tornados	22
3.1.2. Risks related to wind	24
3.1.3. The benefits of wind	24

3.2. Rainfall and snowfall	25
3.2.1. Intense rains and flood risk	25
3.2.2. Snow	31
3.3. Heat waves	33
3.3.1. The heat island phenomenon	33
3.3.2. Damage related to heat.	34
Part 2. Risk Management	37
Chapter 4. Disaster Prevention	39
4.1. Concepts related to disaster prevention	39
4.2. Laws, plans and budgets	40
4.3. Business continuity plans.	43
Chapter 5. Risk Mitigation	45
5.1. Hazard-proof buildings and residences	45
5.1.1. In modern Japan.	45
5.1.2. The present day	46
5.2. Securing critical infrastructure	51
5.2.1. A predominantly overhead electrical grid	52
5.2.2. The gas distribution network	53
5.2.3. A water distribution system that is difficult to replace	54
5.2.4. Securing shinkansen high-speed lines.	54
5.3. The battle against fires	56
5.3.1. A variable risk.	56
5.3.2. Tokyo: a giant tinderbox.	58
5.3.3. Taking into account the risk of factory fires	59
5.4. The fight against flooding	59
5.4.1. The fight against coastal flooding	59
5.4.2. The fight against flood rains	64
5.5. The fight against mass movements	66
5.6. The fight against heat islands	67
5.7. The safety of nuclear power plants	69
5.7.1. Establishing new regulations	70
5.7.2. Confronting volcanic eruptions.	71
5.7.3. Facing earthquake shocks and tsunamis	72
5.7.4. Facing heavy rains	73

Chapter 6. Disaster Preparedness	75
6.1. Prevention maps and signage	76
6.2. Protection measures and storage	80
6.3. Training, exercises and commemorations	82
6.3.1. School education on disaster prevention	82
6.3.2. Education on disaster prevention for everyone	84
6.3.3. Commemorations	87
6.4. Risk awareness	88
6.4.1. Among Japanese people	88
6.4.2. Among foreigners	89
Chapter 7. Prediction, Monitoring, Warning and Preventive Evacuation	91
7.1. Long-term forecasting	91
7.1.1. Forecasting earthquakes: an impossible dream?	91
7.1.2. Eruptions: limited forecasting	93
7.1.3. The long-term forecasting of meteorological phenomena	95
7.2. Monitoring and short-term forecasting	96
7.2.1. Meteorological monitoring and forecasting	97
7.2.2. Monitoring waterways	98
7.2.3. Monitoring mass movements	99
7.2.4. The detection of seismic and tsunami waves	99
7.2.5. Monitoring volcanic activity	100
7.3. Warnings	102
7.3.1. Earthquake warnings	102
7.3.2. Tsunami warnings	104
7.3.3. Warning in case of volcanic eruption	105
7.3.4. Warnings in case of meteorological phenomena	107
7.3.5. The new emergency warning system	109
7.4. Preventive evacuation	111
7.4.1. Before a violent earthquake	111
7.4.2. Hesitation to evacuate after a violent earthquake in anticipation of tsunami or a fire	112
7.4.3. In case of risk of intense rainfall: to evacuate or not to evacuate?	114
7.4.4. Evacuating in the face of volcanic dangers	116
7.4.5. People requiring special attention	119
7.4.6. Relocation	120

Part 3. Disaster Management	121
Chapter 8. Crisis Management	123
8.1. Mobilization of the authorities.	124
8.1.1. Crisis management centers	124
8.1.2. Mobilization of rescue teams	125
8.1.3. Management of dead bodies	133
8.2. Mobilization of residents	135
8.2.1. Neighborhood communities and local associations	135
8.2.2. The actions of volunteers	136
8.3. The circulation of information.	137
8.3.1. Social networks	137
8.3.2. Rumors	138
8.3.3. Media coverage	140
8.4. Evacuation	143
8.4.1. The initial period in the evacuation centers.	144
8.4.2. Mental health	145
8.4.3. Temporary care of non-residents.	146
Chapter 9. Restoration and Reconstruction	149
9.1. Rebuilding the lives of disaster victims	149
9.1.1. Life in evacuation centers	149
9.1.2. Security in devastated areas.	151
9.1.3. Settlement in temporary housing.	152
9.1.4. Prolonged stays in temporary housing.	154
9.1.5. Financial tools for reconstructing the lives of disaster victims	155
9.1.6. Moral and psychological support.	158
9.2. Restoration and reconstruction of infrastructure	160
9.2.1. Responsibilities and financing	161
9.2.2. Waste management.	162
9.2.3. Restoration of vital infrastructure	164
9.2.4. Restoration of public institutions: the example of schools.	168
9.2.5. Restoration of businesses	168
9.2.6. Managing reconstruction costs	169
9.3. Demographic and economic development.	170
9.4. Political consequences	172
9.5. Memory	173

Conclusion	177
Appendix	179
