Introduction xi

List of Notations xxv

Chapter 1. Specification of Shared Objects 1

1.1. Introduction 1
1.2. Sequential specifications 3
1.2.1. Abstract data types 3
1.2.2. Sequential specifications 5
1.2.3. Updates and queries 7
1.2.4. ADT composition 10
1.3. Concurrent histories 12
1.3.1. Definition 12
1.3.2. Asynchronous processes communicating by messages 15
1.3.3. Modelization as of concurrent histories 17
1.4. Consistency criteria 18
1.4.1. The consistency criteria set 18
1.4.2. Consistency criteria composition 19
1.5. Conclusion 22

Chapter 2. Overview of Existing Models 23

2.1. Introduction 23
2.2. Strong consistency 26
2.2.1. Sequential consistency 26
2.2.2. Linearizability 29

2.2.3. Strong consistency computability 31
2.2.4. Other strong criteria 33
2.3. Transactional systems 34
2.3.1. Serializability 34
2.3.2. Other criteria 36
2.4. Eventual consistency 36
2.4.1. Eventual consistency 36
2.4.2. Implementation and strong eventual consistency 38
2.4.3. Intention 42
2.4.4. Principle of Permutation Equivalence 42
2.4.5. Concurrent specifications 43
2.5. Shared memory 45
2.5.1. PRAM memory 45
2.5.2. Cache consistency and slow memory 47
2.5.3. Processor consistency 48
2.5.4. Causal memory 49
2.5.5. Other memory models 51
2.6. Conclusion 52

Chapter 3. Update Consistency 53

3.1. Preamble 53
3.2. Introduction 55
3.3. Consistency criteria 58
3.3.1. Update consistency 58
3.3.2. Strong update consistency 59
3.3.3. Case study: the shared set 62
3.4. Generic implementations 64
3.4.1. The UC_∞ algorithm for strong update consistency 64
3.4.2. UC_0 algorithm 66
3.4.3. The $UC[k]$ algorithm 69
3.5. Conclusion 74

Chapter 4. Causal Consistency 77

4.1. Preamble 77
4.2. Introduction 77
4.3. Causality as a consistency criterion 82
4.3.1. Causal order and temporal cones 82
4.3.2. Weak causal consistency 85
4.3.3. Causal convergence 86
4.4. Causal consistency 88
4.4.1. Definition 88
4.4.2. Case study: causal memory 93

4.4.3. Implementation 95
4.5. Specific behaviors 98
4.6. Conclusion 100

Chapter 5. Weak Consistency Space 103

5.1. Introduction 103
5.2. Weak criteria 106
5.2.1. Definitions 106
5.2.2. Validity and state locality 108
5.3. The structure of the weak criteria space 110
5.3.1. Primary and secondary criteria 110
5.3.2. Plurality of decomposition 116
5.4. Hierarchy of abstract data types 118
5.4.1. Memory 118
5.4.2. Commutative data types 120
5.5. Which criterion should be used? 122
5.6. Conclusion 124

Chapter 6. CODS Library 127

6.1. Introduction 127
6.2. Overview 129
6.2.1. Initialization of the network 131
6.2.2. Sequential specification 131
6.2.3. Consistency criterion 132
6.2.4. Composition of objects 133
6.2.5. Transactions 134
6.2.6. Named transactions 134
6.2.7. Anonymous transactions 136
6.3. Defining new criteria 137
6.4. Conclusion 140

Conclusion 141
