<b>Introduction</b> . . . . .	xi
<b>Chapter 1. System, Equipment and Software</b> . . . . .	1
1.1. Introduction . . . . .	1
1.2. Impact on dependability. . . . .	1
1.3. Command and control system . . . . .	3
1.4. System . . . . .	6
1.5. Development process . . . . .	10
1.6. Safety: from system to software . . . . .	13
1.7. Software application. . . . .	16
1.7.1. What is software? . . . . .	16
1.7.2. Generic, specific or dedicated . . . . .	16
1.7.3. Various types of software . . . . .	16
1.7.4. Various types of uses . . . . .	17
1.8. Conclusion . . . . .	17
1.9. Glossary . . . . .	18
<b>Chapter 2. Software Application</b> . . . . .	21
2.1. Introduction . . . . .	21
2.2. Software versus software applications . . . . .	21
2.3. Software application in its context . . . . .	24
2.3.1. General framework . . . . .	24
2.3.2. Reusability, maintainability and continuous service. . . . .	25
2.3.3. Modular architecture . . . . .	27
2.4. Generic software and parameterized software. . . . .	29

2.5. Module and component . . . . .	32
2.6. Reused component and COTS . . . . .	37
2.7. Product line. . . . .	38
2.8. Conclusion . . . . .	40
2.9. Glossary . . . . .	41
<b>Chapter 3. Principle of Dependability . . . . .</b>	<b>43</b>
3.1. Introduction . . . . .	43
3.2. Dependability . . . . .	44
3.2.1. Basic concepts. . . . .	44
3.2.2. Dependability constraints . . . . .	45
3.2.3. Methods . . . . .	49
3.2.4. Example of a constraint . . . . .	50
3.2.5. Classification of faults . . . . .	53
3.2.6. Adaptation to software applications . . . . .	54
3.3. Description of software errors . . . . .	57
3.4. Safety critical software . . . . .	60
3.4.1. Prevention of faults . . . . .	60
3.4.2. Elimination of faults . . . . .	61
3.4.3. Tolerance to faults . . . . .	61
3.4.4. Prediction of faults . . . . .	62
3.4.5. Review . . . . .	63
3.5. Conclusion . . . . .	63
3.6. Glossary . . . . .	64
<b>Chapter 4. Safety Management of a Software Application . . . . .</b>	<b>65</b>
4.1. Introduction . . . . .	65
4.2. General approach . . . . .	66
4.3. Danger, undesirable events, accidents, risks. . . . .	67
4.3.1. Definitions. . . . .	67
4.4. System safety. . . . .	72
4.4.1. Definition . . . . .	72
4.4.2. Safety management . . . . .	75
4.4.3. Safety integrity . . . . .	82
4.4.4. SIL management . . . . .	84
4.4.5. Safety integrity level . . . . .	86
4.4.6. Overall safety cycle. . . . .	89
4.5. Safety Assurance Plan. . . . .	94
4.6. Safety case . . . . .	94
4.6.1. Structure of the safety case. . . . .	94

4.6.2. Exported constraints . . . . .	95
4.6.3. Product. . . . .	96
4.7. Reliability, availability and maintainability . . . . .	97
4.7.1. Requirement. . . . .	97
4.7.2. Problems specific to using off-the-shelf components. . . . .	98
4.7.3. FDM plan . . . . .	99
4.8. Critical systems . . . . .	99
4.9. Conclusion . . . . .	99
4.10. Appendix 1 – Safety Assurance Plan (SAP) . . . . .	99
4.11. Glossary . . . . .	100
<b>Chapter 5. Safety of a Software Application . . . . .</b>	<b>103</b>
5.1. Introduction . . . . .	103
5.2. General approach . . . . .	105
5.2.1. Software reliability . . . . .	105
5.2.2. Availability . . . . .	107
5.2.3. Maintenance. . . . .	107
5.2.4. Safety . . . . .	108
5.2.5. Impact of the software . . . . .	110
5.3. Safety level . . . . .	110
5.4. Safety demonstration activity of a software application . . . . .	111
5.4.1. Safety analysis . . . . .	111
5.4.2. Code analysis . . . . .	117
5.4.3. Compliance with safety requirements . . . . .	119
5.4.4. Fault analysis . . . . .	119
5.5. Conclusion . . . . .	120
5.6. SSAP template . . . . .	121
5.7. Glossary . . . . .	122
<b>Chapter 6. Technique to Manage Software Safety . . . . .</b>	<b>125</b>
6.1. Introduction . . . . .	125
6.2. Techniques for software safety . . . . .	126
6.2.1. Introduction . . . . .	126
6.2.2. Error management . . . . .	126
6.2.3. Error recovery. . . . .	129
6.2.4. Defensive programming . . . . .	135
6.2.5. Double execution of a software application . . . . .	142
6.2.6. Data redundancy . . . . .	150
6.3. Other diversities . . . . .	153
6.3.1. Temporal diversity . . . . .	154

6.3.2. Memory allocation diversity . . . . .	154
6.4. Conclusion . . . . .	154
6.5. Glossary . . . . .	155
<b>Chapter 7. Assessment and Certification.</b> . . . . .	<b>157</b>
7.1. Introduction . . . . .	157
7.2. Product . . . . .	158
7.3. Assessment . . . . .	158
7.4. Certification . . . . .	161
7.4.1. Product certification . . . . .	161
7.4.2. Assessment and software certification . . . . .	163
7.4.3. Cross-acceptance . . . . .	165
7.4.4. Change management . . . . .	166
7.4.5. Tests . . . . .	167
7.5. Conclusion . . . . .	169
7.6. Glossary . . . . .	169
<b>Chapter 8. Different Sectors and Various Normative Referentials</b> . . . . .	<b>171</b>
8.1. Introduction . . . . .	171
8.2. E/E/PE system . . . . .	171
8.2.1. Introduction . . . . .	171
8.2.2. Certification . . . . .	173
8.2.3. Safety levels . . . . .	173
8.2.4. Sub-standards . . . . .	174
8.2.5. Software safety . . . . .	175
8.3. Railway sector . . . . .	175
8.3.1. Introduction . . . . .	176
8.3.2. Certification . . . . .	179
8.3.3. Safety versus availability . . . . .	179
8.3.4. Software safety . . . . .	180
8.3.5. IRIS . . . . .	183
8.4. Aeronautics. . . . .	184
8.4.1. Introduction . . . . .	184
8.4.2. Software safety level . . . . .	186
8.4.3. Certification . . . . .	186
8.5. Space sector . . . . .	186
8.6. Nuclear sector . . . . .	187
8.7. Automobile sector . . . . .	188
8.7.1. ISO 26262 . . . . .	188
8.7.2. Safety demonstration . . . . .	189
8.7.3. Software safety . . . . .	190

---

8.7.4. Certification . . . . .	190
8.8. A few constraints . . . . .	190
8.9. Safety level . . . . .	190
8.10. Conclusion . . . . .	191
8.11. Glossary . . . . .	191
<b>Chapter 9. Quality Management . . . . .</b>	<b>195</b>
9.1. Introduction . . . . .	195
9.2. Continuous improvement . . . . .	196
9.3. Quality management as well as quality control . . . . .	197
9.4. Quality management. . . . .	197
9.4.1. Introduction . . . . .	197
9.4.2. ISO 9000. . . . .	197
9.4.3. ISO 9001. . . . .	198
9.4.4. Others . . . . .	200
9.4.5. Quality Assurance Manual . . . . .	205
9.4.6. Project quality . . . . .	206
9.5. What is quality of a software application? . . . . .	207
9.6. Development of a software application . . . . .	208
9.7. Software quality . . . . .	208
9.7.1. Characteristics of a software application . . . . .	209
9.7.2. Quality objective . . . . .	210
9.8. Measurement of complexity of a software application . . . . .	213
9.9. Development cycle . . . . .	213
9.9.1. Introduction . . . . .	213
9.9.2. Various lifecycles. . . . .	214
9.9.3. V cycle. . . . .	216
9.9.4. Verification and validation. . . . .	218
9.10. Vocabulary and mode of expression . . . . .	219
9.11. Organization . . . . .	220
9.11.1. Introduction . . . . .	220
9.11.2. Organization type . . . . .	220
9.11.3. Skills management . . . . .	222
9.12. Configuration management . . . . .	225
9.13. Safety assurance management. . . . .	227
9.14. Software Quality Assurance Plan . . . . .	229
9.15. Defect management . . . . .	231
9.16. Maintenance of a software application . . . . .	233
9.17. Conclusion . . . . .	234
9.18. Appendix A – Structure of an SQAP . . . . .	235
9.19. Glossary . . . . .	236

<b>Chapter 10. Requirement Management</b> . . . . .	239
10.1. Introduction . . . . .	239
10.2. Requirement acquisition phase . . . . .	240
10.2.1. Introduction . . . . .	240
10.2.2. Elicitation of requirements . . . . .	241
10.2.3. Analysis process and documentation . . . . .	249
10.2.4. Verification and validation of requirements. . . . .	256
10.3. Specification of requirements . . . . .	258
10.3.1. Characterization of requirements. . . . .	258
10.3.2. Characterization of requirements specification . . . . .	264
10.3.3. Expression of requirements. . . . .	264
10.3.4. Validation of requirements . . . . .	269
10.4. Implementation of requirements . . . . .	269
10.4.1. Processes . . . . .	269
10.4.2. Verification . . . . .	269
10.4.3. Traceability . . . . .	271
10.4.4. Change management . . . . .	275
10.5. Requirement management . . . . .	278
10.5.1. Activities . . . . .	278
10.5.2. Two approaches to requirement management. . . . .	279
10.5.3. Implementation of tools. . . . .	279
10.6. Conclusion . . . . .	281
10.7. Glossary . . . . .	281
<b>Conclusion</b> . . . . .	283
<b>Bibliography</b> . . . . .	285
<b>Index</b> . . . . .	295
