<b>Introduction . . . . .</b>	ix
<b>Chapter 1. Inspection of Structures: Methodologies . . . . .</b>	1
1.1. Bridges . . . . .	1
1.1.1. General information . . . . .	1
1.1.2. Regulatory documents . . . . .	4
1.1.3. Human resources . . . . .	6
1.1.4. Material resources . . . . .	6
1.1.5. The project file . . . . .	8
1.1.6. How an inspection is carried out . . . . .	9
1.1.7. The inspection report . . . . .	10
1.1.8. Points to look out for . . . . .	11
1.1.9. Classification example . . . . .	11
1.2. Structures for the retention and transportation of liquids . . . . .	11
1.2.1. General information . . . . .	11
1.2.2. Regulatory documents . . . . .	14
1.2.3. Human resources . . . . .	14
1.2.4. The material means . . . . .	15
1.2.5. The project file . . . . .	16
1.2.6. How the inspection is carried out . . . . .	16
1.2.7. The inspection report . . . . .	17
1.2.8. Points to look out for . . . . .	19
1.3. Storage structures for petroleum products . . . . .	24
1.3.1. General information . . . . .	24
1.3.2. How the inspection is carried out . . . . .	27
1.3.3. Specificities for this type of structure . . . . .	28
1.3.4. Points to look out for . . . . .	31

1.4. Maritime structures . . . . .	34
1.4.1. General information . . . . .	34
1.4.2. Principles of the CSV method . . . . .	36
1.4.3. Determination of the strategic index SI . . . . .	38
1.4.4. Frequency of visits . . . . .	39
1.4.5. Defining the priorities . . . . .	39
1.4.6. Summary of the CSV method. . . . .	40
1.4.7. Points to look out for. . . . .	41
1.5. Silos . . . . .	50
1.5.1. General information . . . . .	50
1.5.2. Reminder on the regulations for the mechanical operation of silos . . . . .	51
1.5.3. Principle of inspection . . . . .	52
1.5.4. Follow-up file . . . . .	55
1.5.5. Inspection procedure . . . . .	55
1.5.6. The inspection report. . . . .	56
1.5.7. Points to look out for. . . . .	57
1.6. Gantry, metal hanger and high masts. . . . .	59
1.6.1. General information . . . . .	59
1.6.2. Principle of inspection . . . . .	59
1.6.3. The inspection report. . . . .	60
1.6.4. Points to look out for. . . . .	61
<b>Chapter 2. Concept of Resistance of Materials: Application to Reinforced Concrete . . . . .</b>	<b>67</b>
2.1. General information on reinforced concrete . . . . .	67
2.2. Concrete material . . . . .	68
2.2.1. Cement . . . . .	68
2.2.2. Aggregates . . . . .	69
2.2.3. Mixing water . . . . .	69
2.2.4. Admixture . . . . .	69
2.2.5. Mechanical properties of concrete . . . . .	70
2.2.6. Eurocode 2 provisions for concrete . . . . .	74
2.3. Steels . . . . .	81
2.3.1. The mechanical properties of steels . . . . .	81
2.3.2. Steel-concrete bonding. . . . .	85
2.4. Concept of strength of materials. . . . .	87
2.4.1. Compression/traction. . . . .	88
2.4.2. Pure flexion . . . . .	89
2.4.3. Shear stress . . . . .	91
2.4.4. Torsion . . . . .	93

---

<b>Chapter 3. Pathology of Structures . . . . .</b>	95
3.1. Pathology of concrete structures . . . . .	95
3.1.1. Cracking . . . . .	95
3.1.2. The degradation of concrete. . . . .	106
3.2. The pathology of masonry structures. . . . .	139
3.2.1. General information . . . . .	139
3.2.2. Major disorders that may affect masonry . . . . .	139
3.3. The pathology of composite material structures . . . . .	145
3.3.1. General information on composite materials. . . . .	145
3.3.2. Main pathologies of composite materials. . . . .	150
<b>Chapter 4. Techniques for Repairing Civil Engineering Works . . . . .</b>	161
4.1. Repair of concrete structures. . . . .	161
4.1.1. The glued metal plates technique . . . . .	161
4.1.2. The technique of glued composite fabrics or plates. . . . .	170
4.1.3. The technique of additional prestressing . . . . .	178
4.1.4. The shotcrete technique . . . . .	183
4.1.5. Repair of superficially degraded concretes . . . . .	191
4.2. Protection of concrete structure . . . . .	198
4.2.1. Cathodic protection of reinforcements . . . . .	198
4.3. Underground recovery . . . . .	203
4.3.1. Principle of the technique . . . . .	203
4.3.2. Regulations . . . . .	203
4.3.3. Principle for sizing of reinforcements . . . . .	203
4.3.4. Implementation of reinforcements . . . . .	204
<b>Chapter 5. Inspection and Maintenance of Structures in the United States: Methodologies . . . . .</b>	209
5.1. Engineering structures . . . . .	209
5.1.1. General information . . . . .	209
5.1.2. Regulations . . . . .	210
5.1.3. Human resources . . . . .	211
5.1.4. Material resources . . . . .	211
5.1.5. The inspection report. . . . .	212
5.1.6. Points to look out for. . . . .	213
5.2. Storage structures for petroleum products . . . . .	214
5.2.1. General information . . . . .	214
5.2.2. Inspection procedure . . . . .	215
5.2.3. Points to look out for. . . . .	216

---

<b>Appendices</b>	217
<b>Appendix 1. Examples of Diagnosis on a Drinking Water Storage Structure Based on the CEMAGREF Method</b>	219
<b>Appendix 2. Examples of Diagnosis on a Petroleum Products Storage Tank According to the DT 92 Method</b>	251
<b>Appendix 3. Examples of Diagnosis of a Marine Structure Using the CETMEF VSC Method</b>	261
<b>Appendix 4. Inspection Report “Gantries, Metal Hangers and High Masts”</b>	305
<b>Appendix 5. Measuring Equipment</b>	315
<b>Appendix 6. Inspections of Bridges</b>	317
<b>Bibliography</b>	321
<b>Index</b>	325
