

Table of Contents

Preface	xi
J. Paolo DAVIM	
Chapter 1. Laser Rapid Manufacturing: Technology, Applications, Modeling and Future Prospects	1
Christ P. PAUL, Pankaj BHARGAVA, Atul KUMAR, Ayukt K. PATHAK and Lalit M. KUKREJA	
1.1. Introduction.	1
1.2. Laser rapid manufacturing	2
1.3. Laser rapid manufacturing system	4
1.3.1. High power laser system.	4
1.3.2. Material feeding system	5
1.3.3. CNC workstation	13
1.4. Various laser rapid manufacturing systems	13
1.5. Relevant processing parameters	16
1.6. Typical applications of LRM	24
1.6.1. Colmonoy-6 bushes	24
1.6.2. Solid and porous structures of Inconel-625.	27
1.6.3. Cemented carbide components	33
1.6.4. Erosion wear resistant surfaces	37
1.7. LRM process modeling.	41
1.8. LRM process control	51
1.8.1. Measurement of melt-pool temperature.	53
1.8.2. Measurement of track geometry	55
1.8.3. LRM process controllers.	56
1.9. Future prospects	57
1.10. Conclusion	59
1.11. Acknowledgments	60
1.12. Bibliography	60

Chapter 2. Lasers in Metal Forming Applications	69
Stephen A. AKINLABI, Mukul SHUKLA, Esther T. AKINLABI and Tshilidzi MARWALA	
2.1. Introduction.	69
2.2. Laser.	70
2.3. Metal forming – introduction	72
2.4. Laser beam forming	73
2.4.1. Principles of LBF	74
2.4.2. Parameters influencing the LBF process	75
2.5. LBF mechanisms	84
2.5.1. Temperature gradient mechanism (TGM)	86
2.5.2. Buckling mechanism	88
2.5.3. Point mechanism	89
2.5.4. Shortening or upsetting mechanism	90
2.6. Advantages and disadvantages of LBF.	91
2.7. LBF of a steel plate	92
2.7.1. Introduction	92
2.7.2. Material.	92
2.7.3. Laser system.	93
2.7.4. Experimental LBF setup.	94
2.8. Design of experiments	95
2.8.1. Taguchi design	96
2.8.2. Effect of LBF factors on the resulting curvature.	99
2.9. Sample characterization	100
2.9.1. Optical microscopy.	100
2.9.2. Microhardness.	102
2.9.3. Tensile test.	102
2.10. Conclusion	104
2.11. Bibliography	104
Chapter 3. Laser Forming of Metal Foams	109
Fabrizio QUADRINI, Denise BELLISARIO, Erica A. SQUEO and Loredana SANTO	
3.1. Introduction.	109
3.2. Scientific background.	110
3.2.1. Aluminum foam sandwich panels	110
3.2.2. Open-cell aluminum foams	111
3.2.3. Laser forming	113
3.3. Materials and experimental methods	113
3.3.1. Materials	115
3.3.2. Laser bending tests	115
3.3.3. Material analyses	117

3.4. Experimental results and discussion	117
3.4.1. Open-cell foams	117
3.4.2. Closed-cell foams (AFS panels)	120
3.4.3. The comparison	121
3.4.4. Obtaining high bending angles	123
3.4.5. Mechanical testing	124
3.4.6. Micro-structural analysis	125
3.5. Numerical modeling.	127
3.5.1. The finite element model	127
3.5.2. Laser processing simulation.	127
3.5.3. Compression test simulation	129
3.5.4. Numerical results	131
3.6. Conclusions.	134
3.7. Bibliography	135
Chapter 4. Mathematical Modeling of Laser Drilling	139
Maturose SUCHATAWAT and Mohammad SHEIKH	
4.1. Introduction.	139
4.2. Solid heating	141
4.3. Melting	145
4.4. Vaporization	151
4.5. Mathematical model of laser percussion drilling incorporating the effects of the exothermic reaction	156
4.5.1. Modeling the pulse-on heating process	156
4.5.2. Solidification during pulse-off	164
4.6. Experimental procedures for model verification	167
4.7. Results and discussion	168
4.8. Conclusion	173
4.9. Bibliography	173
Chapter 5. Laser Cutting a Small Diameter Hole: Thermal Stress Analysis	179
Bekir S. YILBAS, Syed S. AKHTAR and Omer KELES	
5.1. Introduction.	179
5.2. Modeling heating and thermal stress	181
5.2.1. Heating analysis.	181
5.2.2. Thermal stress analysis	183
5.3. Numerical simulation	184
5.4. Experimental	185
5.5. Results and discussion	186
5.6. Conclusion	201

5.7. Acknowledgements	201
5.8. Bibliography	201
Chapter 6. Modeling and Simulation of Laser Welding	203
Karuppudaiyar R. BALASABRAMANIAN, Krishnasamy SANKARANARAYANASAMY and Gangusami N. BUVANASHEKARAN	
6.1. Introduction.	204
6.2. Process mechanisms.	204
6.3. Operating parameter characteristics	206
6.4. Types	207
6.4.1. Gas laser	208
6.4.2. Solid state laser	208
6.4.3. Diode laser.	209
6.4.4. Fiber lasers.	209
6.5. Material considerations	209
6.6. Applications of laser welding	211
6.7. Strengths and limitations of laser welding.	212
6.8. Developments and advances in laser welding processes	213
6.9. Modeling and analysis of the laser welding process	214
6.9.1. Design of experiments	214
6.9.2. Box–Behnken design.	215
6.9.3. Artificial neural network.	216
6.9.4. Finite element analysis.	219
6.10. A case study.	220
6.10.1. Experimental setup	220
6.10.2. Mathematical modeling of butt joint	222
6.10.3. Process parameters interaction effect on the butt joint profile	227
6.10.4. ANN modeling	230
6.10.5. Finite element analysis.	234
6.11. Comparison of statistical analysis, the finite element method and an ANN	241
6.12. Conclusion	243
6.13. Acknowledgment.	244
6.14. Bibliography	244
Chapter 7. Lasers in Surface Engineering	247
Alberto H. GARRIDO, Rubén GONZÁLEZ, Modesto CADENAS, Chin-Pei WANG and Farshid SADEGHI	
7.1. Introduction.	248
7.2. Characteristics of laser radiation	248
7.2.1. Monochromaticity	248

7.2.2. Directionality and divergence	249
7.2.3. Coherence	249
7.3. Advantages of laser devices	249
7.4. Laser surface cladding	250
7.4.1. Introduction	250
7.4.2. Process description	251
7.4.3. Process parameters	252
7.5. Laser surface cladding by powder injection	253
7.5.1. Types of powder injection techniques	255
7.6. Energetic study of the cladding process	257
7.6.1. Energy losses due to reflection off the surface of the cladding area	260
7.6.2. Energy losses due to radiation	261
7.6.3. Energy losses due to convection	262
7.6.4. Energy used in creating and bonding the coating	263
7.7. Control parameters of laser surface cladding	264
7.8. Widely used materials and alloys	266
7.9. Laser surface treatments	266
7.9.1. Introduction	266
7.9.2. Laser hardening	267
7.9.3. Laser surface melting	267
7.9.4. Laser surface texturing	267
7.10. Laser surface texturing techniques	272
7.10.1. Melting	272
7.10.2. Vaporization	274
7.10.3. Melting and vaporization:	274
7.10.4. Melting and gas injection	276
7.10.5. Process parameters	279
7.11. Characterization of laser surface texturing	285
7.11.1. Geometry	285
7.11.2. Density	286
7.12. Bibliography	286
List of Authors	293
Index	297
