<b>Introduction</b> . . . . .	xv
<b>Part 1. The Impacts of Floods</b> . . . . .	1
<b>Chapter 1. Analysis of Major Flood Events: Collapse of the Malpasset Dam, December 1959</b> . . . . .	3
Martin BOUDOU, Annabelle MOATTY and Michel LANG	
1.1. Introduction . . . . .	3
1.2. Various approaches to major flood events . . . . .	4
1.2.1. Feedback . . . . .	4
1.2.2. Scientific reports . . . . .	5
1.2.3. Limitations of these studies . . . . .	6
1.3. The notion of “remarkable” floods . . . . .	7
1.3.1. Grid of remarkable floods . . . . .	7
1.3.2. Interest surrounding monographic studies . . . . .	7
1.4. Application of the identification method of a remarkable event: Malpasset Dam failure of December 2, 1959 . . . . .	8
1.4.1. Unfolding of the event . . . . .	8
1.4.2. Causes of the disaster . . . . .	11
1.4.3. Decisions made following the disaster . . . . .	13
1.5. Conclusion . . . . .	14
1.6. Bibliography . . . . .	15
<b>Chapter 2. Observation and Measurement of Losses Due to Flooding</b> . . . . .	21
Roland NUSSBAUM	
2.1. Why measure the impact of flooding? . . . . .	22
2.2. What are flood impacts? . . . . .	23

2.3. Measurement of economic impacts . . . . .	23
2.3.1. Stakeholders involved in measurement of impacts and the induced economy . . . . .	23
2.3.2. Share of insured losses within economic impacts . . . . .	24
2.3.3. Tools for the measurement of insured losses . . . . .	26
2.4. Development of practices for measuring impacts . . . . .	27
2.4.1. International and European framework . . . . .	27
2.4.2. National developments . . . . .	29
2.5. Conclusion and prospects . . . . .	31
2.6. Bibliography . . . . .	31
<b>Chapter 3. Flood Impacts on Loss of Life and Human Health . . . . .</b>	<b>33</b>
Freddy VINET	
3.1. Introduction . . . . .	33
3.2. Challenges of disaster epidemiology . . . . .	34
3.2.1. A major challenge for risk prevention . . . . .	34
3.2.2. Crisis management focuses on saving human lives . . . . .	34
3.2.3. What are the obstacles in fatality assessment? . . . . .	34
3.2.4. An essential and reliable indicator for the assessment of risk prevention policies . . . . .	35
3.3. Collection of flood-related mortality data . . . . .	37
3.3.1. Which fatalities should we analyze? . . . . .	37
3.3.2. International data sources . . . . .	38
3.4. Victims and circumstances surrounding flood-related fatalities . . . . .	41
3.4.1. Victim profiles . . . . .	41
3.4.2. Circumstances surrounding fatalities . . . . .	42
3.5. Modeling mortality . . . . .	43
3.6. Flood impacts on human health . . . . .	45
3.7. Conclusions . . . . .	47
3.7.1. Evolution of fatalities . . . . .	47
3.7.2. Loss of life prevention and reduction . . . . .	48
3.8. Acknowledgment . . . . .	49
3.9. Bibliography . . . . .	49
<b>Chapter 4. Flood-related Impacts on Cultural Heritage . . . . .</b>	<b>53</b>
Jocelyne DESCHAUX	
4.1. Damage to cultural heritage as a result of major historical floods . . . . .	53
4.1.1. Major historical floods . . . . .	53
4.1.2. Items included in damage reports . . . . .	56
4.2. Flood-related impacts on cultural heritage . . . . .	58

---

4.2.1. Issues . . . . .	58
4.2.2. Water-related loss. . . . .	58
4.2.3. Treatment required following flood-related damage to cultural heritage . . . . .	62
4.3. Protecting cultural heritage from flood-related impacts: risk prevention and provision . . . . .	63
4.3.1. At institution level . . . . .	64
4.3.2. Additional measures to be taken at municipal and local authority levels . . . . .	67
4.3.3. Floodplains . . . . .	67
4.3.4. Risk prevention, forecasting and intervention assistance: French National Blue Shield Committee . . . . .	68
<b>Chapter 5. Natech Events Triggered by Floods: When Floods Cause Technological Accidents . . . . .</b>	73
Eric PIATYSZEK, Alicja TARDY, Michel LESBATS and Ana Maria CRUZ	
5.1. Introduction . . . . .	73
5.2. A brief overview of flood-related Natech events and several examples . . . . .	74
5.3. Analysis of flood-related impacts on industrial sites: from floods to technological accidents . . . . .	75
5.3.1. Industrial equipment affected . . . . .	76
5.3.2. Source of damage to industrial equipment . . . . .	77
5.3.3. Links between intensity of flood risk and damage to industrial equipment . . . . .	78
5.3.4. Impacts of a Natech event triggered by a flood on an industrial site . . . . .	80
5.3.5. Natech event triggered by flood, and on-site emergency management at industrial plants . . . . .	83
5.4. Conclusion . . . . .	84
5.5. Bibliography . . . . .	84
<b>Part 2. The Knowledge of Flood Hazards . . . . .</b>	89
<b>Chapter 6. Techniques and Instruments to Aid in the Monitoring of Flood Events . . . . .</b>	91
Maria CARMEN LLASAT, Tomeu RIGO and Juan José VILLEGAS	
6.1. Introduction . . . . .	91
6.2. Estimation of the precipitation. . . . .	92
6.2.1. Estimation of precipitation through rain gauges . . . . .	92
6.2.2. Estimation of precipitation through radar . . . . .	94
6.2.3. Estimation of precipitation through satellites . . . . .	98

6.3. Hydrological control networks in hydrometeorological risk management . . . . .	99
6.3.1. Basic design criteria for gauging stations . . . . .	102
6.3.2. Hydraulic and geomorphologic criteria . . . . .	106
6.3.3. Hydrological data generation: uncertainty, errors and accuracy . . . . .	108
6.3.4. Elements to measure in a gauging station . . . . .	109
6.4. Bibliography . . . . .	111
<b>Chapter 7. Flood Hydrology Processes and Their Variabilities</b> . . . . .	115
Eric GAUME and Olivier PAYRASTRE	
7.1. Introduction . . . . .	115
7.1.1. Floods occur due to rainfall, but not exclusively . . . . .	115
7.1.2. Nature is complex and often surprising . . . . .	116
7.2. Basic principles . . . . .	116
7.2.1. Watersheds: linking rainfall and discharge . . . . .	116
7.2.2. Hydrological compartments and flow . . . . .	117
7.2.3. Characteristics of the relationship between rainfall and discharge . . . . .	118
7.3. The process of flood formation . . . . .	120
7.3.1. Infiltration and runoff . . . . .	120
7.3.2. Groundwater flow . . . . .	121
7.4. Diversity factor . . . . .	123
7.4.1. Rainfall intensity . . . . .	124
7.4.2. Watershed characteristics . . . . .	125
7.5. Conclusion . . . . .	126
7.6. Bibliography . . . . .	126
<b>Chapter 8. Hydrodynamic Modeling to Characterize Floods and Predict Their Impacts</b> . . . . .	129
André PAQUIER, Sébastien PROUST and Jean-Baptiste FAURE	
8.1. Introduction . . . . .	129
8.2. The basics of hydrodynamic modeling . . . . .	130
8.3. Data required to perform a hydrodynamic flood simulation . . . . .	132
8.3.1. Model topography . . . . .	132
8.3.2. Boundary conditions . . . . .	133
8.3.3. Flow resistance . . . . .	134
8.4. Implementation of hydrodynamic flood simulations . . . . .	138
8.4.1. 1D or 2D model? . . . . .	138
8.4.2. Calibration . . . . .	140
8.4.3. Particularities of urban floods . . . . .	143

---

8.5. Uncertainty of results from hydrodynamic simulations . . . . .	143
8.6. Bibliography . . . . .	144
<b>Chapter 9. Evolution of River Channels and Floods: A Short- to Long-Term Perspective . . . . .</b>	149
Jean-Paul BRAVARD	
9.1. Introduction . . . . .	149
9.2. General principles of river functioning . . . . .	150
9.3. Holocene metamorphosis and natural dynamics of long profiles in Western Europe . . . . .	151
9.4. Changes to long profiles and flood conditions as a result of impacts to channels: windmills, dikes and extractions . . . . .	154
9.4.1. Mills . . . . .	155
9.4.2. River channel containment . . . . .	155
9.4.3. Aggregate extraction . . . . .	158
9.5. Changes to long profiles and flooding conditions due to dam reservoirs . . . . .	160
9.5.1. Backfilling of impoundments . . . . .	160
9.5.2. Widening channels downstream of dams . . . . .	161
9.5.3. Case studies . . . . .	161
9.6. Conclusion: numerous implications for floodplains . . . . .	163
9.7. Bibliography . . . . .	163
<b>Chapter 10. Hydrogeomorphology: Recognition and Evolution of the Flood Phenomenon . . . . .</b>	167
Thomas BUFFIN-BÉLANGER, Sylvio DEMERS and Antonin MONTANÉ	
10.1. Introduction . . . . .	167
10.2. Geomorphological recognition . . . . .	169
10.2.1. River styles, morphologies and organization . . . . .	169
10.2.2. HGM mapping . . . . .	173
10.3. Evolution of the flood risk . . . . .	178
10.3.1. The geomorphological trajectory . . . . .	178
10.3.2. The evolution of the flood risk . . . . .	181
10.4. Conclusion . . . . .	184
10.5. Bibliography . . . . .	185
<b>Chapter 11. Structures for Flood Defense and Management . . . . .</b>	193
Rémy TOURMENT, Bruno BEULLAC and Daniel POULAIN	
11.1. Introduction: levees and other flood defense structures . . . . .	193
11.1.1. Retention structures . . . . .	195
11.1.2. Levees and associated structures . . . . .	196

---

11.1.3. Diversion channels . . . . .	197
11.1.4. Complementarity of arrangements . . . . .	197
11.2. History and context of levees . . . . .	197
11.2.1. The levee patrimony in France and its history . . . . .	197
11.2.2. Recent catastrophes and events in France and elsewhere . . . . .	198
11.2.3. State regulation and control . . . . .	200
11.3. Levee typology . . . . .	201
11.3.1. River, torrent and sea levees . . . . .	201
11.3.2. Various design types . . . . .	201
11.4. From the levee to the flood defense system: protected area, protection level, safety level, etc. . . . .	203
11.4.1. The protection level . . . . .	204
11.4.2. The safety and danger levels of structures and systems . . . . .	205
11.4.3. The population security level . . . . .	205
11.4.4. Typology of flood defense systems . . . . .	205
11.5. Conclusion on flood defense structures . . . . .	206
11.6. Bibliography . . . . .	207
<b>Chapter 12. Coastal Surges . . . . .</b>	209
Darren LUMBROSO	
12.1. Introduction . . . . .	209
12.2. The causes of coastal surges . . . . .	210
12.2.1. Wind speed and storm size . . . . .	211
12.2.2. Shoreline bathymetry . . . . .	211
12.2.3. Tide . . . . .	212
12.2.4. Shape of the coastline . . . . .	212
12.2.5. Atmospheric pressure . . . . .	213
12.2.6. Local features . . . . .	213
12.3. Modeling coastal surges and the extent of inundation . . . . .	213
12.3.1. The bathtub approach to modeling coastal inundations . . . . .	213
12.3.2. Multicomponent approaches to modeling coastal inundation . . . . .	214
12.4. Tsunamis . . . . .	219
12.5. Bibliography . . . . .	221
<b>Part 3. Flooded People and Lands: Human Drivers of Flood Impacts . . . . .</b>	225
<b>Chapter 13. The Contribution of Historical Data for the Understanding of Floods and Risk Prevention . . . . .</b>	227
Denis CŒUR and Michel LANG	
13.1. Introduction . . . . .	227

---

13.2. The contribution of historical data to prevention approaches . . . . .	229
13.2.1. Development of risk culture and memory . . . . .	229
13.2.2. Broadening the chronological framework to improve the estimation of reference high waters . . . . .	231
13.3. A few essential steps for using historical data . . . . .	233
13.3.1. Critical data collection . . . . .	233
13.3.2. Reenacting a past event in the present flow, stakes and vulnerability conditions . . . . .	234
13.3.3. Anticipating future evolutions likely to alter the impact of past floods . . . . .	236
13.4. Conclusion . . . . .	237
13.5. Bibliography . . . . .	237
<b>Chapter 14. Assessing Vulnerability to Flooding: Progress and Limitations . . . . .</b>	<b>241</b>
Stéphanie DEFOSSEZ, Freddy VINET and Frédéric LEONE	
14.1. How should vulnerability be defined? . . . . .	241
14.1.1. The scientific approach . . . . .	241
14.1.2. Institutional approach: damage assessment and reduction? . . . . .	245
14.2. From the individual to the territory: diagnosing vulnerability . . . . .	246
14.2.1. Diagnosing structural vulnerability: which assessment criteria? .	246
14.2.2. Human vulnerability . . . . .	249
14.2.3. Territorial vulnerability: vulnerability of a system . . . . .	250
14.2.4. Loss of accessibility: a component of territorial vulnerability . . . . .	251
14.3. Modeling vulnerability to make the concept operational? . . . . .	251
14.3.1. Determining vulnerability indexes . . . . .	251
14.3.2. An operational concept? . . . . .	253
14.4. Conclusions . . . . .	253
14.5. Bibliography . . . . .	254
<b>Chapter 15. Toward a Process of Resilience Implementation: Capacities, Models and Strategies . . . . .</b>	<b>259</b>
Damienne PROVITOLO, Damien SERRE and Laurie BOSCHETTI	
15.1. Introduction . . . . .	259
15.2. A “map” of uses of the concept of resilience in the field of risks and disasters . . . . .	260
15.3. Models for implementing flood resilience . . . . .	261
15.4. Developing spatial decision-support tools for applying resilience strategies . . . . .	270

---

15.5. Conclusion . . . . .	271
15.6. Bibliography . . . . .	271
<b>Chapter 16. Cities at Risk from Water: Between Vulnerability and Resilience . . . . .</b>	<b>275</b>
Magali REGHEZZA-ZITT	
16.1. Introduction . . . . .	275
16.2. Global cities: new “crucibles of hazard” . . . . .	276
16.2.1. The major biophysical vulnerability of megacities . . . . .	276
16.2.2. Vulnerability specific to global cities and metropolitan areas . . . . .	278
16.2.3. Unconventional crises . . . . .	279
16.3. Resilience, a new horizon for action? . . . . .	280
16.3.1. Managing a crisis well in order to recover quickly . . . . .	281
16.3.2. The essential reconstruction period: learning from the past and building back better . . . . .	282
16.3.3. Creating resilience ahead of crises . . . . .	283
16.4. Conclusion . . . . .	284
16.5. Bibliography . . . . .	285
<b>Chapter 17. Networks in the Face of Flooding . . . . .</b>	<b>287</b>
Serge LHOMME	
17.1. Introduction . . . . .	287
17.2. Infrastructures vulnerable to flooding . . . . .	288
17.3. Ideal critical infrastructures . . . . .	290
17.4. A methodological framework for studying the vulnerability of technical networks . . . . .	293
17.5. Conclusion . . . . .	294
17.6. Bibliography . . . . .	295
<b>Part 4. The Future . . . . .</b>	<b>297</b>
<b>Chapter 18. Flood Regimes: Recent Development and Future Under Climate Change . . . . .</b>	<b>299</b>
Eric SAUQUET and Michel LANG	
18.1. Observing a recent evolution in flood regimes? . . . . .	300
18.1.1. Methodological aspects . . . . .	300
18.1.2. Summary of stationarity studies . . . . .	301
18.2. Impact studies for anticipating future risks . . . . .	304
18.2.1. Methodological aspects . . . . .	304
18.2.2. Summary of impact studies . . . . .	305

---

18.3. Conclusions . . . . .	307
18.4. Bibliography . . . . .	308
<b>Chapter 19. Changes in Flood Risk: Retrospective and Prospective Approach . . . . .</b>	<b>311</b>
Freddy VINET and Nancy MESCHINET DE RICHEMOND	
19.1. Introduction . . . . .	311
19.2. Changes in land use and risk . . . . .	312
19.2.1. Long-term evolution of territories . . . . .	312
19.2.2. Long hazard return period, rapid changes in societies. . . . .	313
19.3. Changing vulnerabilities . . . . .	315
19.3.1. Reducing the flood risk: contextualizing vulnerabilities and connecting local and global . . . . .	315
19.3.2. New vulnerabilities . . . . .	316
19.4. Prospective approach: factors in the evolution of flood risk during the 21st Century . . . . .	317
19.4.1. The evolution of the hazard . . . . .	318
19.4.2. Future socioeconomic evolutions and their consequences for flood risk . . . . .	318
19.4.3. Uncertain evolutions . . . . .	321
19.5. Conclusion . . . . .	321
19.6. Bibliography . . . . .	322
<b>Conclusion . . . . .</b>	<b>325</b>
<b>List of Authors . . . . .</b>	<b>329</b>
<b>Index . . . . .</b>	<b>333</b>
