

## TABLE OF CONTENTS

<b>Preface</b> – B. JACOB, A.-M. MCDONNELL, T. PALMERLEE . . . . .	xiii
<b>International Society for Weigh-In-Motion</b> – ISWIM Executive Board . . . . .	xvii
<b>Panel Discussion 1: Enforcement Using WIM</b> . . . . .	xix
<b>Panel Discussion 2: WIM for Infrastructures</b> . . . . .	xxi
<b>Session 1: WIM Algorithms, Technology and Testing</b> . . . . .	1
An Experimental Wireless Accelerometer-Based Sensor System for Applications to WIM and Vehicle Classification – R. BAJWA, E. COLERI, C. FLORES, R. RAJAGOPAL, R. KAVALER, P. VARAIYA, B. WILD . . . . .	3
Hidden Markov Modeling for Weigh-In-Motion Estimation R. ABERCROMBIE, E. FERRAGUT, S. BOONE . . . . .	13
Automatic Vehicle Classification for WIM Systems – P. BURNOS . . . . .	22
Experimentation of a Bridge WIM System in France and Applications to Bridge Monitoring and Overload Screening – F. SCHMIDT, B. JACOB. . . . .	33
Analysis of B-WIM Signals by Statistical Tools S.-S. IENG, A. ZERMANE, F. SCHMIDT, B. JACOB . . . . .	43
Bridge Weigh-In-Motion by Strain Measurement of Transverse Stiffeners E. YAMAGUCHI, Y. OGAMI, Y. MATSUKI . . . . .	53
Field Verification of a Filtered Measured Moment Strain Approach to the Bridge Weigh-In-Motion Algorithm Z. ZHAO, N. UDDIN, E. O'BRIEN . . . . .	63
Strategies for Axle Detection in Bridge Weigh-In-Motion Systems E. O'BRIEN, D. HAJIALIZADEH, N. UDDIN, D. ROBINSON, R. OPITZ. . . . .	79
Using strips to Mitigate the Multiple-Presence Problem of BWIM Systems A. ŽNIDARIČ, I. LAVRIČ, J. KALIN, M. KRESLIN . . . . .	89

Experimental Testing of a Multiple-Sensor Bridge Weigh-In-Motion Algorithm in an Integral Bridge – J. DOWLING, A. GONZÁLEZ, E. O’BRIEN, B. JACOB . . . . .	99
Traffic-1: User Tailored Measuring System for Road Traffic Parameters P. BURNOS, J. GAJDA, R. SROKA, M. STENCEL, T. ŽEGLEŇ . . . . .	109
<b>Session 2: WIM for Enforcement</b> . . . . .	119
WIM Systems in Chile, a Successful Experience – R. DIAZ . . . . .	121
ANPR-MMR and WIM for Detection of Overloaded Vehicles L. RAFALSKI, M. KARKOWSKI, C. DOLEGA, J. WROBEL . . . . .	129
One Year “WIM Direct Enforcement” Experiences in Czech Republic E. DOUPAL, I. KRIZ, R. STAMBERG, D. CORNU . . . . .	141
Integration of Weigh-In-Motion Technology into NIST’s <i>Handbook 44</i> D. MIDDLETON . . . . .	152
<b>Session 3: WIM Standard, Calibration, Data Quality and Management.</b> . . . . .	163
Standardization of Weigh-In-Motion in Europe B. JACOB, H. VAN LOO . . . . .	165
Testing and Certification of WIM Systems D. CORNU, C. WUETHRICH . . . . .	176
Modern Calibration and Verification Techniques of WIM data C. SCHILDHAUER, R. SIK . . . . .	187
Enhanced Autocalibration of WIM Systems – P. BURNOS . . . . .	197
Data-based WIM Calibration and Data Quality Assessment in South Africa G. DE WET . . . . .	209
Evaluation of Several Piezoelectric WIM Systems – J. LEAL . . . . .	218
Improvement of Weigh-In-Motion Accuracy by Taking into Account Vehicle Lateral Position – E. KLEIN, D. STANCZYK, S.-S. IENG . . . . .	228
Findings from LTPP SPS WIM Systems Validation Study D. WALKER, O. SELEZNEVA, D. J. WOLF . . . . .	237
Weigh-In-Motion Data: Quality Control, Axle Load Spectra, and Influence on Pavement Design J. I. RODRIGUEZ-RUIZ, R. A. TAREFDER . . . . .	248

Quality Control of Alabama Weigh-In-Motion Data from Data User Perspective And Development of MPEDG Traffic Inputs D. MAI, R. E. TUROCHY, D. H. TIMM. . . . .	258
The Metamorphosis of LTPP Traffic Data D. WALKER, D. CEBON . . . . .	272
Checking WIM Axle-Spacing Measurements – M. SLAVIK, G. DE WET . . . . .	282
Designing WIM Data Aggregating Systems – V. JANES, E. KLEIN, S. ROMON, F. SCHMIDT, H. PHAM DOAN . . . . .	292
Assessment of Weigh-In-Motion (WIM) Systems: A Nationwide Survey H. ZELELEW, K. SENN, A. PAPAGIANNAKIS . . . . .	305
<b>Session 4: WIM Implementation, ITS, Traffic Monitoring, Safety and Environment . . . . .</b>	<b>315</b>
High Speed Weigh-in-Motion in the UK – A. LEES. . . . .	317
Trends in HGV Performance in the Main Greek Road Network: Lessons to Learn – G. MINTSIS, C. TAXILTARIS, S. BASBAS, M. KARLAFTIS. . . . .	326
Environmental Impact of Heavy Vehicles Based on Noise, Axle Load and Gaseous Emissions – L. D. POULIKAKOS, K. HEUTSCHI, P. SOLTIC . . . . .	336
Bringing Heavy Vehicle On-Board Mass Monitoring to Market C. KONIDITSIOTIS, S. COLEMAN, D. CAI . . . . .	348
Application of the Center of Gravity Measurement Based on the Dynamic wheel Loads Measurements of Vehicles – K. SOMEYA, H. OKUDA, T. SHINDO, Y. MOCHIZUKI, N. SAKAI . . . . .	366
Sensors Test at their Possible Failure in the Array and its Reduced Topologies for the Accurate WIM Methods – A. CEROVSKÁ, M. OSTRIHOŇ, S. URGELA . . . . .	377
Applications from a Centralized System of WIM A. JAUREGUIBERRY, B. GEROUDET. . . . .	385
<b>Session 5: Application of WIM to Bridges . . . . .</b>	<b>395</b>
A Dual Purpose Bridge Health Monitoring and Weigh-In-Motion System for a Steel Girder Bridge – R. E. CHRISTENSON, S. MOTAREF, A.-M. H. MCDONNELL . . . . .	397

WIM-Based Simulation Model of Site Specific Live Load Effect on the Bridges – A. S. NOWAK, P. RAKOCZY . . . . .	409
Modeling Traffic Loads on Bridges – A Simplified Approach Using Bridge-WIM Measurements – A. ŽNIDARIČ, M. KRESLIN, I. LAVRIČ, J. KALIN . . . . .	418
Use of Weigh-In-Motion Data for Site-Specific LRFR Bridge Rating Z. ZHAO, N. UDDIN . . . . .	429
A Combined Weigh-In-Motion and Structural Health Monitoring System on a Wisconsin-Michigan Border Bridge – D. E. KOSNIK . . . . .	440
Weigh-In-Motion on the Köhlbrand Bridge in the Port of Hamburg F. WEISS, T. SPINDLER . . . . .	450
Assessing Confidence Intervals of Extreme Traffic Loads for Bridges X. Y. ZHOU, F. SCHMIDT, B. JACOB. . . . .	462
Portable Bridge WIM Data Collection Strategy for Secondary Roads B. ENRIGHT, C. LEAHY, E. O’BRIEN, J. KEENAHAN . . . . .	473
<b>Session 6: Application of WIM to Pavements . . . . .</b>	<b>483</b>
Applications of Weigh-In-Motion in Pavement Engineering L. D. POULIKAKOS. . . . .	485
Pavement Damage due to Dynamic Load – Brazilian Road Deterioration Test with MS-WIM – G. G. OTTO, L. MOMM, A. MATTAR VALENTE . . . . .	493
Evaluating the Role of Weigh-In-Motion in Mechanistic Pavement Analysis S. YOUSIF, C. BERTHELOT, R. KELLN, R. SOARES, R. HANSON, T. BERGAN . . . . .	503
An Appraisal of Mass Differences Between Individual Tyres, Axles and Axle Groups of a Selection of Heavy Vehicles in South Africa M. DE BEER, I. SALLIE . . . . .	514
<b>Index of Authors . . . . .</b>	<b>525</b>
