TABLE OF CONTENTS

Section I: Physical Mechanisms of Multiple Damage 1

Multiple hierarchical scale-dependency on physical mechanisms of material damage: macromechanical, microstructural and nanochemical – G.C. Sih 3

Surface layers and inner interfaces as functional subsystems of solid – V.E. Panin, S.V. Panin and A.V. Panin 37

Microstructural evolution in dual-phase steels at high strain-rates M.N. Bassim and A.G. Odeshi 45

Plastic deformation in single cryctal Ni3Fe (thin and thick plates) S.V. Starenchenko, V.A. Starenchenko and I.P. Radchenko 55

Mechanisms of physical aging in polypropylene – G. Guero and T. Vu-Khan. . 63

Section II: Physical, Mesoscopical and Multiscale Models 73

Finite element homogeneization for the determination of the RVE size for elastoviscoplastic Polycrystalline Materials – H. Haddadi and A. Salahouelhadj . 75

An incremental energy based fatigue life calculations method for metallic structures under multiaxial amplitude loadings – J. Benabes, N. Saintier, T. Palin-Luc and F. Cocheteux 83

Meso/micro fatigue crack growth involving crystal structure and crack geometry C.A. Rodopoulos and G. Chliveros 91

Development of a nonlinear homogeneization method: evaluation and application to a rubber-reinforced material – V. Bouchart, M. Brieu, D. Kondo and M. Naït-Abdelaziz. 105

Cavitation of rubber toughened polymer: numerical and experimental investigation N. Belayachi, N. Benseddiq and M. Naït-Abdelaziz. 113

Ductile damage by interface decohesion – N. Bonfoh, S. Tiem and P. Lipinski . . 123

A multiscale discussion of fatigue and shakedown for notched structures G. Bertolino, A. Constantinescu, M. Ferjani and P. Treiber 131

Two scale approach for the defect tolerance fatigue design of automotive components – H. Gadouini and Y. Nadot 145

Section III: Film, Layer and Interface 153

Plastic deformation and fracture of thin metallic films on annealing in terms of the multilevel model of a deformed solid – A.V. Panin and A.R. Shugurov . . 155

Mesoscopic model for electroactive Composite Films and its applications D. Roy Mahapatra and R.V.N. Melnik 163

Interfaces of one-way glass/epoxy composite in inflexion – A. Djebbar and L. Vincent. 171

Point defects of the elastic properties of layered structured nano-materials T.E. Karakasidis, C.A. Charitidis and D. Skarakis. 183

DFT study of interactions of water on Kaolinte and Goethite surfaces D. Tunega 191

Nanolayered MAX phases from *ab initio* calculations – R. Ahuja. 199

Section IV: Crack Models and Solutions. 205

Fracture initiation at re-entrant corners: experiments and finite fracture mechanics predictions – A. Carpinteri, P. Cornetti, N. Pugno, A. Sapora and D. Taylor . . . 207

Buckling analysis of cracked columns subjected to lateral loads – L. Nobile . . . 217

Micro-cavity effect on the plastic zone size ahead of the crack tip in confined plasticity – M. El Meguenni, B. Bachir Bouiadjra, M. Benguediab, A. Ziadi, M. Naït-Abdelaziz and F. Zaïri 229

Effect of microcrack on plastic zone size ahead of main crack in small-scale plasticity – B. Bachir Bouiadjra, M. Benguediab, M. El Meguenni, M. Belhouari, B. Serier and M. Naït-Abdelaziz 237

Stress intensity factor of surface and interface cracks in coating/substrate system Y. Bao, G. Chai, X. Lou and W. Hao 245

T-stress by stress difference method (SDM) – M. Hadj Meliani, H. Moustabchir and Z. Azari 253

Elasto-inelastic self-consistent model of ellipsoidal inclusion M. Radi and A. Abdul-Latif. 261

Crack propagation in solid oxide fuel cells – N. Joulaee, A. Makradi, S. Ahzi and M.A. Khaleel 271

Elastoplastic solution for an eccentric crack loaded by two pairs of point tensile forces – X. Zhou and H. Yang 279

J-integral and CMOD for cracked cylinders – M. Kiric 289

Oscillating contact of isotropic elastic half-spaces – H.Y. Yu 297

Section V: Nanomaterials 305

Mechanical properties of thin pulsed laser deposited amorphous carbons and amorphous carbon/silver nanocomposites – C.A. Charitidis, P. Patsalas, F. Chouliaras, C. Kosmidis and G.A. Evangelakis 307

Extension of the Hertz model for accounting to surface tension in nano-indentation tests of soft materials – C. Fond, O. Noël and M. Brogly 315

Multi-scale modeling of tensile behavior of carbon nanotube-reinforced composites – K.I. Tserpes, P. Papanikos, G.N. Labeas and S. G. Pantelakis. . . 323

Mechanical, thermal and electronic properties of nanoscale materials K. Masuda-Jindo, V. Van Hung and M. Menon 331

SWNT reinforced Ni-Cu nanocomposites – B. Lim, B. Kim, B. Sung, J. Choi, U. Shim, S. Oh, C. Kim and S. Baik 341

Section VI: Electronic and Composite Materials 349

A general piezoelctric interface model: coordinate-free asymptotic derivation and application to the homogenization of piezoelectric composites – S.-T. Gu, Q.-C. He and V. Pensée 351

Effect of non-homogeneous strain on the band structure of semi-conductors due to the end friction under compression tests – X.X. Wei and K.T. Chau . . . 359

Composite based polypropylene – D. Pessey, N. Bahlouli, S. Ahzi and J.M. Hiver 369

Deformation of reinforcement on size effects in metal/metal composite S. Ataya, M. Korthäuer and E. El-Magd 375

Deformation behavior of coal as a composite material and its impacts on permeability in coalbed gas reservoir – G.X. Wang, Z.T. Wang, V. Rudolph and P. Massarotto 385

Characterization of a multi-cracked composite material using ESPI and phase shifting – L. Farge, Z. Ayadi, J. Varna and M. Nivoit 395

Section VII: Brittle Fracture 403

Mechanism of cleavage fracture of HSLA steels and TiAl alloys – C. Jianhong 405

Strength of brittle materials based on mixture of two Weibull distributions L. Guerra Rosa and I. Figueiredo 415

Assessment of brittle failure processes in polyolefins – J.P. Dear and N.S. Mason 429

Computational modelling of damage in glass loaded with a spherical indenter J. Ismail, F. Zaïri, M. Naït-Abdelaziz and Z. Azari. 439

Section VIII: Failure, Creep and Fracture. 451

New approach to predicting crack path and instability – D.A. Zacharopoulos. . 453

A fracture analysis of short glass fibre reinforced SGFR-PA66 B. Mouhmid, A. Imad and N. Benseddiq 461

Elastic and plastic creep mechanism in thin metal films using FEM method
Y.-X. Zheng, L.-S. Niu, T.-T. Dai et H.-J. Shi 473

A new fracture criterion under multiaxial monotonic loading for rubbers
A. Hamdi, M. Naït-Abdelaziz and N. Aït-Hocine 481

Section IX: Thermal, Mechanical and Environmental Effects 489

Simulation of chemo-mechanical degradations of undergroung concrete
structures – E. Stora, B. Bary, Q.-C. He, E. Deville and P. Montarnal 491

The geometry influence on integrity thresholds for a cracked cylinder
M. Kiric and A. Sedmak 501

Progressive fracture of laminated fiber-reinforced composite stiffened plate
under thermo-mechanical loads – P.K. Gotsis, C.C. Chamis, K. David,
D. Xie and F. Abdi 509

Thermal residual streses related to the sintering process of metal matrix
diamond tools – P.M. Amaral, C. Anjinho, B. Li, L. Reis, M. de Freias
and L. Guerra Rosa 519

Mechanical and chemical effects of solvent swelling on butyl rubber
C. Nohilé, P.I. Dolez and T. Vu-Khanh. 527

Section X: Processing and Fabrication 535

Microstructure-based formability characterisation of multi phase steels using
damage mechanics – V. Uthaisangsuk, U. Prahl and W. Bleck 537

Advanced materials and processes at the nano/micro scale in covering materials
of greenhouses for energy savings – C.A. Charitidis, S. Pantelakis,
V. Bontozoglou, L. Kontonasios, A. Kavga and P. Charitidis 545

Effect of PPS matrix evolution during processing of carbon fiber reinforced PPS
on the mechanical behaviour of the composite material – C.V. Katsiropoulos,
P. Lefebure and S.G. Pantelakis 553

Coupling of hydration and fracture models: failure mechanisms in hydrating
cement particle systems – L. Tan, G. Ye, E. Schlangen and K. van Breugel. . . 563

Micro-strain measurement in copper sheets by X-rays diffraction
N. Hfaiedh, M. François, A. Baczmanski and K. Saanouni 573

Steady plastic flow of a polymer during ECAE process: experiments and modelling – F. Zaïri, B. Aour, M. Naït-Abdelaziz, J. M. Gloaguen and J.M. Lefebvre 581

Microscopic transformations explain the modification of the mechanical properties of TRIP steels after galvanization – E.J. Petit, I. Sriti, M. Gilles, J. Gilgert and Z. Azari 593

Section XI: Fatigue and Crack Growth 603

Fatigue performance of 2139 aluminium alloy laser beam welds following exposure to salt spray environmnent – S.G. Pantelakis, A.T. Kermanidis, G.A. Papadimitriou, G.N. Haidemenopoulos and A.D. Zervaki 605

A comparison of the fatigue behaviour of FSW and MIG weldments of two aluminium alloys – P.M.G.P. Moreira, R.A.M. da Silva, M.A.V. de Figueiredo, F.M.F. de Oliveira and P.M.S.T. de Castro 613

Useful life prediction of rubber materials for refrigerator component C.S. Woo and H.S. Park. 623

Damage by cyclic loading of composite dental materials – L. Smata, S. Bouzid and Z. Azari 631

High temperature oxidation and fatigue of P122 alloy – S.Y. Bae, H. G. Kang, D.B. Lee, C.W. Kim and B.S. Lim 641

Fatigue crack growth rate under constant amplitude loading and under tensile overloads in sheet and plate 2024 aluminium alloy – A.T. Kermanidis, V.K. Spiliadis and S.G. Pantelakis 649

Residual fatigue damage on the fracture toughness properties – P. Cadenas, X. Decoopman, A. Amrouche and G. Mesmacque 657

Role of stress gradient in fatigue emanating from notch roots using volumetric method – G. Pluvinage 665

Section XII: Vibration, Ultrasonic and Impact 679

Lateral vibration of a cracked free-free beam – T.G. Chondros 681

Ultrasonic impact related to toughness of cast aluminium alloy E.S. Statnikov and V.N. Vityazev 691

Physics and mechanics of ultrasonic impact – E.Statnikov 701

Application of ultrasound to accelerate fatigue – E.S. Statnikov and V.Y. Korostel 711

A comparative study of the fatigue resistance of aluminide coatings on P91 steel substrate under cyclic impact loading – C. David, K. Anthymidis and D.N. Tsipas 721

Dynamic behavior of TiNi cantilever beams with phase transformation Z. Tang, J. Lu, X. Zhang 729

Section XIII: Heat Transfer and Fluid Mechanics 739

Magnetic field on stress intensification in soft ferromagnetic materials Y. Shindo, I. Shindo and F. Narita 741

Pattern formation in the Taylor-Dean flow – A. Ait Aider, S. Skali, J.P. Brancher and A. Chahine 749

Flow field and heat transfer in chaotic-advector fins – Q. Dong, K. Wang, S. Kong and Y. Wang 761

Heat conduction properties of PTFE/graphite-based composites M. Liu, Q. Dong, X. Gu and A. Sun 769

Section XIV: Micromechanical Damage and Effects 777

A "morphological" approach for modelling the anisotropic damage behaviour of highly-filled particulate composites – C. Nadot, S. Dartois, D. Halm, A. Dragon and A. Fanget 779

Determination of the macroscopic plastic yield behaviour of microcracked materials – V. Monchiet, E. Charkaluk and D. Kondo 789

A non-local anisotropic micromechanics based damage model applied to concrete – Q. Zhu and J.-F. Shao. 797

Mechanical and hydraulic effective properties of an anisotropic fractured medium – J.-F. Barthélémy 805
