

## Table of Contents

<b>Foreword</b> . . . . .	vii
<b>Preface</b> . . . . .	xi
<b>Introduction</b> . . . . .	xv
<b>Chapter 1. Understanding Uncertainty</b> . . . . .	1
1.1. Uncertainty and reality . . . . .	1
1.1.1. Awareness of uncertainty . . . . .	1
1.1.2. Territories of uncertainty . . . . .	4
1.1.3. Conclusion . . . . .	8
1.2. Robustness and reliability . . . . .	9
1.2.1. Robustness . . . . .	9
1.2.2. Reliability . . . . .	13
1.2.3. Relationship between robustness and reliability . . . . .	16
1.2.4. Optimizing robustness and reliability . . . . .	19
1.2.5. Conclusion . . . . .	21
1.3. Designing for robust production . . . . .	22
1.3.1. Robustness and lifecycles . . . . .	22
1.3.2. Description of the V cycle . . . . .	23
1.3.3. Uncertainty in the V cycle . . . . .	25
1.3.4. Uncertainty linked to a step in the V cycle . . . . .	29
1.3.5. Robustness and uncertainty . . . . .	33
1.3.6. Conclusion . . . . .	38

<b>Chapter 2. Modeling Uncertainty</b> . . . . .	41
2.1. Random uncertainty . . . . .	41
2.1.1. Modeling uncertainty . . . . .	41
2.1.2. Exploration of Mediocristan . . . . .	42
2.1.3. From statistics to probabilities . . . . .	47
2.1.4. Polynomial chaos . . . . .	50
2.1.5. Exploration of Extremistan . . . . .	52
2.1.6. Conclusion . . . . .	55
2.2. Uncertainty in behavior models . . . . .	55
2.2.1. Uncertainty and input data . . . . .	56
2.2.2. Uncertainty in behavior models . . . . .	61
2.3. Uncertainty propagation . . . . .	70
2.3.1. The problem of uncertainty propagation . . . . .	70
2.3.2. Analyzing sensitivity to uncertainty . . . . .	71
2.3.3. Reliability analysis – classification methods . . . . .	82
2.3.4. Model reductions . . . . .	92
2.3.5. Quantifying uncertainty . . . . .	98
2.3.6. Conclusion . . . . .	100
<b>Chapter 3. Decision Support under Uncertainty</b> . . . . .	101
3.1. Decision support in design . . . . .	101
3.1.1. Decision support . . . . .	101
3.1.2. Modeling decision support . . . . .	103
3.1.3. Multi-criteria decision analysis (MCDA) . . . . .	106
3.1.4. Conclusion . . . . .	109
3.2. Summary and conclusion . . . . .	110
3.2.1. Three perspectives . . . . .	110
3.2.2. Challenges in engineering science . . . . .	119
3.2.3. Industrial issues . . . . .	123
<b>Bibliography</b> . . . . .	125
<b>Index</b> . . . . .	145
