<b>Introduction</b>	xi
<b>Part 1. Basic Notions</b>	1
<b>Chapter 1. Introductory Problems</b>	3
1.1. The “swing states” problem	3
1.2. Adel and his camels.	5
1.3. Sauron’s forges	7
1.3.1. Problem 1: The inspection of the forges	8
1.3.2. Problem 2: The production of the deadly weapon.	9
<b>Chapter 2. A Review of Logistic Problems</b>	13
2.1. Some history	13
2.1.1. The Fermat–Torricelli point.	13
2.1.2. The Monge problem	14
2.1.3. The Seven Bridges of Königsberg and the Icosian Game	15
2.2. Some polynomial problems	16
2.2.1. The assignment problem.	16
2.2.2. The transportation problem	17
2.2.3. The Minimum-Cost Spanning Tree problem	19
2.3. Packing problems	20
2.3.1. The knapsack problem.	20
2.3.2. The bin packing problem	21

---

2.4. Routing problems . . . . .	22
2.4.1. The traveling salesman problem. . . . .	23
2.4.2. The vehicle routing problem (VRP). . . . .	24
2.5. Production scheduling problems . . . . .	24
2.5.1. The flow-shop scheduling problem (FSSP). . . . .	26
2.5.2. The job-shop scheduling problem (JSSP). . . . .	29
2.6. Lot-sizing problems . . . . .	31
2.7. Facility location problems . . . . .	33
2.7.1. The Uncapacitated Plant Location Problem (UPLP). . . . .	33
2.7.2. The Dynamic Location Problem (DLP). . . . .	35
2.8. Conclusion . . . . .	36
<b>Chapter 3. An Introduction to Metaheuristics . . . . .</b>	<b>37</b>
3.1. Optimization problems . . . . .	37
3.2. Metaheuristics: basic notions . . . . .	39
3.2.1. Intensification and diversification . . . . .	40
3.2.2. Neighborhood systems . . . . .	40
3.3. Individual-based metaheuristics . . . . .	41
3.3.1. Local search . . . . .	41
3.3.2. Simulated annealing . . . . .	44
3.3.3. The kangaroo Algorithm . . . . .	46
3.3.4. Iterated local search. . . . .	48
3.3.5. Tabu Search . . . . .	49
3.4. Population-based metaheuristics . . . . .	50
3.4.1. Evolutionary algorithms . . . . .	51
3.4.2. The ant colony algorithm. . . . .	52
3.4.3. Particle Swarm Optimization . . . . .	53
3.5. Conclusion . . . . .	55
<b>Chapter 4. A First Implementation of Metaheuristics . . . . .</b>	<b>57</b>
4.1. Representing a list of objects . . . . .	57
4.2. The implementation of a local search . . . . .	59
4.2.1. The construction of an initial solution . . . . .	59
4.2.2. Description of basic moves . . . . .	60
4.2.3. The implementation of stochastic descent (LS) . . . . .	62
4.3. The implementation of individual-based metaheuristics . . . . .	64
4.3.1. Simulated annealing (SA) . . . . .	64
4.3.2. Iterated local search (ILS) . . . . .	66
4.14. Conclusion . . . . .	66

---

<b>Part 2. Advanced Notions . . . . .</b>	69
<b>Chapter 5. The Traveling Salesman Problem . . . . .</b>	71
5.1. Representing a solution: the two-level tree structure . . . . .	71
5.2. Constructing initial solutions . . . . .	74
5.2.1. A greedy heuristic: nearest neighbor . . . . .	74
5.2.2. A simplification heuristic: the Christofides algorithm . . . . .	76
5.3. Neighborhood systems . . . . .	78
5.3.1. The Lin & Kernighan neighborhood . . . . .	79
5.3.2. Ejection chain techniques . . . . .	83
5.4. Some results . . . . .	86
5.5. Conclusion . . . . .	88
<b>Chapter 6. The Flow-Shop Problem . . . . .</b>	89
6.1. Representation and assessment of a solution . . . . .	89
6.2. Construction of the initial solution . . . . .	90
6.2.1. Simplification heuristics: CDS . . . . .	91
6.2.2. A greedy heuristic: NEH . . . . .	94
6.3. Neighborhood systems . . . . .	97
6.3.1. Improvement of the insertion movements . . . . .	98
6.3.2. Variable-depth neighborhood search . . . . .	101
6.4. Results . . . . .	107
6.5. Conclusion . . . . .	107
<b>Chapter 7. Some Elements for Other Logistic Problems . . . . .</b>	109
7.1. Direct representation versus indirect representation . . . . .	109
7.2. Conditioning problems . . . . .	111
7.2.1. The knapsack problem . . . . .	111
7.2.2. The bin-packing problem . . . . .	112
7.3. Lot-sizing problems . . . . .	114
7.4. Localization problems . . . . .	115
7.5. Conclusion . . . . .	117
<b>Part 3. Evolutions and Current Trends . . . . .</b>	119
<b>Chapter 8. Supply Chain Management . . . . .</b>	121
8.1. Introduction to supply chain management . . . . .	121
8.2. Horizontal synchronization of the supply chain . . . . .	122

---

8.2.1. The beer game . . . . .	123
8.2.2. The bullwhip effect . . . . .	125
8.3. Vertical synchronization of a supply chain . . . . .	126
8.4. An integral approach of the supply chain . . . . .	127
8.5. Conclusion . . . . .	129
<b>Chapter 9. Hybridization and Coupling Using Metaheuristics . . . . .</b>	131
9.1. Metaheuristics for the optimization of the supply chain . . . . .	131
9.2. Hybridization of optimization methods . . . . .	133
9.2.1. Classification of hybrid methods . . . . .	133
9.2.2. Illustration by example . . . . .	134
9.2.3. “Metaheuristic/local search” hybridization . . . . .	135
9.2.4. Metaheuristic hybridization/Exact Methods . . . . .	135
9.3. Coupling of optimization methods and performance evaluations . . . . .	138
9.3.1. Double complexity . . . . .	138
9.3.2. Coupling of optimization method/simulation model . . . . .	139
9.4. Conclusion . . . . .	141
<b>Chapter 10. Flexible Manufacturing Systems . . . . .</b>	143
10.1. Introduction to the FMS challenges . . . . .	143
10.2. The job-shop problem with transport . . . . .	145
10.2.1. Definition of the problem . . . . .	145
10.3. Proposal for a metaheuristic/simulation coupling . . . . .	148
10.3.1. Representation of a solution . . . . .	148
10.3.2. Simulation method . . . . .	149
10.3.3. Optimization method . . . . .	152
10.3.4. Results . . . . .	153
10.4. Workshop layout problem . . . . .	154
10.4.1. Aggregated model and exact resolution . . . . .	154
10.4.2. Detailed model and approximate solutions . . . . .	157
10.5. Conclusion . . . . .	159
<b>Chapter 11. Synchronization Problems Based on Vehicle Routings . . . . .</b>	161
11.1. Inventory routing problem . . . . .	162
11.1.1. Presentation of the problem . . . . .	162

---

11.1.2. Resolution by metaheuristics . . . . .	166
11.2. The location-routing problem . . . . .	167
11.2.1. Definition of the problem . . . . .	167
11.2.2. Solution with metaheuristics. . . . .	171
11.3. Conclusion . . . . .	172
<b>Chapter 12. Solution to Problems</b> . . . . .	173
12.1. The swing state problem . . . . .	173
12.2. Adel and his camels . . . . .	176
12.2.1. First question . . . . .	176
12.2.2. Second question. . . . .	177
12.2.3. Third question. . . . .	180
12.3. The forges of Sauron . . . . .	180
12.3.1. The inspection of the forges . . . . .	180
12.3.2. Production of the lethal weapon. . . . .	183
<b>Conclusion</b> . . . . .	185
<b>Bibliography</b> . . . . .	187
<b>Index</b> . . . . .	197
