

## Table of Contents

<b>Notations</b> . . . . .	vii
<b>Acronyms</b> . . . . .	ix
<b>Introduction</b> . . . . .	xi
<b>Chapter 1. Uncertainty Representation Based on Set Theory</b> . . . . .	1
1.1. Basic set definitions: advantages and weaknesses . . . . .	3
1.1.1. Interval set . . . . .	5
1.1.2. Ellipsoidal set . . . . .	7
1.1.3. Polyhedral set . . . . .	9
1.1.4. Zonotopic set . . . . .	12
1.2. Main properties of zonotopes . . . . .	17
<b>Chapter 2. Several Approaches on Zonotopic Guaranteed Set-Membership Estimation</b> . . . . .	27
2.1. Context . . . . .	27
2.2. Problem formulation . . . . .	32
2.2.1. Singular Value Decomposition-based method	35
2.2.2. Optimization-based methods . . . . .	40

<b>Chapter 3. Zonotopic Guaranteed State Estimation Based on <math>P</math>-Radius Minimization</b> . . . . .	49
3.1. Single-Output systems approach . . . . .	49
3.2. Multi-Output systems approaches . . . . .	63
3.2.1. General formulation . . . . .	64
3.2.2. Extensions of the Single-Output systems methodology . . . . .	67
3.2.3. Dedicated approach for Multi-Output systems . . . . .	85
<b>Chapter 4. Tube Model Predictive Control Based on Zonotopic Set-Membership Estimation</b> . . . . .	95
4.1. Context . . . . .	95
4.2. Problem formulation . . . . .	100
4.3. Tube-based output feedback Model Predictive Control design . . . . .	100
4.4. Application on the magnetic levitation system . . . . .	112
4.4.1. System description . . . . .	113
4.4.2. Control problem . . . . .	116
<b>Conclusion and Perspectives</b> . . . . .	125
<b>Appendix. Basic Matrix Operation Definitions</b> . . . . .	129
<b>Bibliography</b> . . . . .	133
<b>Index</b> . . . . .	149
