

CONTENTS

Foreword – J. Desrues, G. Viggiani, P. Bésuelle	13
Keynote lectures	15
Micro-Characterization of Shearing in Granular Materials Using Computed Tomography – K.A. Alshibli, S.N. Batiste, S. Sture, M. Lankton	17
X-ray Micro CT for Studying Strain Localization in Clay Rocks under Triaxial Compression – P. Bésuelle, G. Viggiani, N. Lenoir, J. Desrues, M. Bornert	35
Investigation of Engineering Properties of Man-made Composite Geo-materials with Micro-focus X-ray CT – Y. Kikuchi	53
X-ray Tomography as a Tool for Micromechanical Investigations of Cement and Mortar – E. N. Landis	79
X-ray Computed Tomography for Geotechnical Engineering – J. Otani	95
Methods and techniques.	117
Numerically enhanced Microtomographic Imaging Method Using a Novel Ring Artefact Filter – D. Bernard, A. Chirazi	119
Synchrotron X-Ray microtomography: a High Resolution, Fast and Quantitative Tool for Rock Characterization – E. Boller, P. Cloetens, J. Baruchel, P. Tafforeau, O. Rozenbaum, J. Pourchez	125
Applications of X-Ray Computed Tomography (CT) in Engineering Geology K. Gallmeister, R. Azzam.	135

Accurate Three-dimensional Measurements of Features in Geological Materials from X-ray Computed Tomography Data – R. A. Ketcham.	143
New submicro- and micro-CT set-up for NDT at the UGCT facility of the Ghent University (Belgium) – B. Masschaele, V. Cnudde, M. Dierick, J. Vlassenbroeck, L. Van Hoorebeke, P. Jacobs, P. Van Auwegem	149
Combination of Dual Energy Microfocus Computed Tomography and Petrography for Objective 3D Reservoir Characterization K. Remeysen, R. Swennen	155
Optimising X-ray Computer Tomography Images with a CT-simulator P. Van Marcke, R. Swennen	161
Octopus 8: A High Performance Tomographic Reconstruction Package for X-ray Tube and Synchrotron micro-CT – J. Vlassenbroeck, B. Masschaele, V. Cnudde, M. Dierick, K. Pieters, L. Van Hoorebeke, P. Jacobs.	167
Fracture and localized deformation	175
Visualization of Failure Pattern Specimens Containing Surface Crack Using X-ray Computerized Tomography – K.T. Chau, R.C.K. Wong, R.H.C. Wong	177
Experimental Study of Compaction Bands in Diatomaceous Porous Rock T. Kodaka, F. Oka, J. Otani, H. Kitahara, H. Ohta	185
X-ray imaging of compactant strain localization in sandstone L. Louis, T.-F. Wong, P. Baud	193
Studies of Mechanisms Associated with Sand Production Using X Ray CT Scan J. Santos, E. Vargas Jr., E. Barroso, J. Castro, C. Gonçalves, E. Campos.	199
The Application of X-ray Computed Tomography for Characterization of Surface Crack Networks in Bentonite-Sand Mixtures T. Gebrenigus, M. Tuller, B. Muhunthan.	207
Investigation of Crack Behavior on Cover Soils at Landfill using X-ray CT T. Mukunoki, J. Otani, A. Maekawa, S. Camp, J.P. Gourc	213
Characterisation of Hydraulic Fractures in Limestones Using X-ray Microtomography – F. Renard, D. Bernard, J. Desrues, E. Plougonven, A. Ougier-Simonin	221

Characterization of Variable Aperture Rock Fractures Using X-ray Computer Tomography – W.M.S.B. Weerakone, R.C.K. Wong	229
Microscopic Analysis of Dynamic Loading-induced Fractures by Using Micro CT – M. Yokota, S.H. Cho, M. Ito, S. Owada, K. Kaneko	237
Micro structure	245
Measuring Local Strains in Sandstones under Stress with Micro-computed Tomography – A. Bauer, E. Verhulp, S. Schoofs	247
Visualization of Grain Motion inside a Triaxial Specimen by Micro X-ray CT at SPring-8 – T. Matsushima, K. Uesugi, T. Nakano, A. Tsuchiyama	255
Quantifying Consolidation and Reordering in Natural Granular Media from Computed Tomography Images – A.H. Reed, K.E. Thompson, W. Zhang, C.S. Willson, K.B. Briggs	263
Grain Partitioning and its Applications M. Saadatfar, A.P. Shepard, M.A. Knackstedt	269
Development of a Three-dimensional Fabric Analysis Method using Scanning Lines and its Applications for X-ray CT Image of Geomaterials T. Takemura, M. Takahashi, M. Oda	277
Flow and diffusion	285
Study on Water Flow in Rock by Means of the Tracer-aided X-rays CT D. Fukahori, Y. Saito, D. Morinaga, M. Ogata, K. Sugawara.	287
X-Ray CT Observation and Near-Infrared Spectroscopic Measurement of Bentonite-Quartz Mixtures – C. Kawargi, Y. Nakamura, K. Kashiwaya, K. Kaneko, T. Yoneda	293
Accuracy of the Two Common Semi-Analytical Equations in Predicting Asphalt Permeability – M.E. Kutay, A.H. Aydilek	301
Development of X-ray CT Coreflood System for High Temperature Condition H. Okabe, Y. Tsuchiya, K. Oseto, K. Okatsu	309
Visualization of 2D Diffusion Phenomena in Rock by Means of X-ray CT A. Sato, D. Fukahori, K. Sugawara, A. Sawada, A. Takebe	315

Geoenvironmental issues	323
Hydraulic Properties of Aggregate-aggregate Contacts A. Carminati, A. Kaestner, R. Hassanein, A. Koliji	325
Characterization of the Micro Organism Mobility in In-Situ Bioremediation T. Hata, R. Kuwano, Y. Kikuchi	333
Experimental Study of Flow and Deformation in Aggregated Soils using Neutron Tomography – A. Koliji, A. Carminati, A. Kaestner, L. Vulliet, L. Laloui, H. Fluehler, P. Vontobel, R. Hassanein	341
A Rigid Registration Method for the Study of Microgeometry Evolution of Limestone during Dissolution by Acidic Water – E. Plougonven, D. Bernard ..	349
Engineering applications	355
X-ray Tomography in Compensation Grouting Research: Shape and Density of Injected Grout – A. Bezuijzen, A.F. Van Tol	357
Evaluation of Cavity Generation in Soils subjected to Sewerage defects using X-ray CT – T. Mukunoki, J. Otani, S. Nonaka, T. Horii, R. Kuwano	365
Engineering Properties of Cement Treated Clay with Tire Chips T. Nagatome, Y. Kikuchi, Y. Mitarai, J. Otani	373
Consolidants Influence on the Sandstones Capillarity. X-ray Study A. Rodríguez-Rey, V.G. Ruiz de Argandeño, L. Calleja, L.M. Suárez del Rio, C. Celorio	381
Investigation of Interaction Behavior Between Soil and Face Bolts using X-ray CT – D. Takano, J. Otani, S. Fukushige, H. Natagani	389
Material characterization	397
X-ray CT Study of Mini-Fabrics of Organic Soils (Oostvaardersplassen) X. Cheng, D. Ngan-Tillard	399
Extracting Particle Orientations from Three-dimensional Datasets using BLOB3D – A.S. Mote, R.A. Ketcham, W.P. Watson	407
Low Stress States in Triaxial Tests Observed using X-Ray Computed Tomography – D. Ngan-Tillard, X. Cheng, P. Moutinho	415

Spatial and Density Resolution in Microfocus X-ray CT, Applied to Studies of Microstructural Changes in Rocks with Increasing Hydrostatic Pressure M. Takahashi, T. Takemura, H. Hirai, A. Murakoshi, M. Kato	421
Quantitative Analysis of Mortar Sample Evolution During Leaching D. Bernard, N. Burlio, P. Cheng	429
Failure Structure of Red-Soils Modified by Fiber-Cement-Stabilized Method H. Takahashi, M. Mori, K. Kumakura, K. Kotani, K. Kaneko	435
Evaluation of Water Cement Ratio of Hardened Concrete by X-ray CT Method T. Temmyo, Y. Murakami, Y. Obara.	443
Index of authors.	451
