Preface ix

Introduction xiii

Chapter 1. Processing Hardware and Software 1

1.1. The materials 1
1.1.1. The compressor 1
1.1.2. The equalizer 8
1.1.3. Reverberation and delay 11
1.1.4. The de-esser 19
1.1.5. The expander 21
1.1.6. The exciter or enhancer 23
1.2. The software 25
1.3. Conclusion 25

Chapter 2. Configuration and the Audio System 29

2.1. The capture and processing chain 29
2.1.1. Minimum configuration 29
2.1.2. Classic home studio configurations 31
2.1.3. Semi-professional configurations 32
2.2. Microphone preamplifiers 34
2.2.1. Tube preamplifiers 35
2.2.2. Transistor preamplifiers 36
2.2.3. Hybrid preamplifiers 37
2.2.4. Channel strips 38
2.2.5. The right choice 38
2.2.6. A selection of preamplifiers 38

2.3. Digital audio interfaces 41
2.4. Multi-channel headphone amplifiers 47
2.5. Monitoring speakers 49
2.5.1. Genelec 8000 series 51
2.5.2. Yamaha NS10-M 52
2.5.3. Scientelec ORTF 54
2.5.4. Studer series A 56
2.5.5. Elipson LA 4240 57
2.5.6. Focal Twin6 Be 58
2.5.7. NHT M-100 59
2.5.8. JBL 4310 60
2.5.9. Adam Audio AX series 62
2.5.10. Selecting active proximity speakers 63
2.5.11. A word about subwoofers 65
2.5.12. To conclude on the speakers 66
2.6. Amplifiers for passive speakers 67
2.6.1. Yamaha A100 68
2.6.2. Studer A68 69
2.6.3. Amcron DC 300A 69
2.6.4. Amcron D75 70
2.6.5. Yamaha PX3 71
2.7. Monitoring controllers 72
2.8. Conclusion 74

Chapter 3. Voice Recording 77

3.1. Artist, comfort and environment 77
3.2. The choice of microphone 79
3.2.1. The location 79
3.2.2. Microphone collection 93
3.2.3. Style and voice 98
3.2.4. Direction and color 99
3.3. Constraints and accessories 99
3.3.1. Nearby environment 100
3.3.2. Microphone suspension 100
3.3.3. Pop filter 101
3.3.4. Microphone stand and bracket 102
3.4. Positioning the microphone 103
3.5. Feedback 107
3.5.1. Voice feedback through headphones 108
3.5.2. Voice feedback through loudspeakers 110
3.5.3. Feedback and audio interface 111

3.6. The voice-only mix . . . 114
3.6.1. A mix for which voice?. . . . 115
3.6.2. Comping . . . 115
3.6.3. Editing and editing . . . 116
3.6.4. Level balancing . . . 116
3.6.5. Equalization . . . 118
3.6.6. Sibilance suppression . . . 121
3.6.7. Serial compression . . . 122
3.6.8. Tone adjustment. . . . 124
3.6.9. Delay or reverberation . . . 124
3.6.10. To finish with the voice-only mix . . . 127
3.7. Recording multiple performers . . . 128
3.8. Recording a choir . . . 131
3.9. Recording a voice-over . . . 133
3.10. Conclusion . . . 134

Chapter 4. Special Effects . . . 135

4.1. The vocoder . . . 135
4.2. The talkbox . . . 138
4.3. Auto-tune . . . 140
4.4. Melodyne . . . 142
4.5. Voice processors . . . 144
4.6. Finally . . . 146

Conclusion . . . 147

Appendix 1. Sound Unit . . . 151

Appendix 2. Audio Connectivity . . . 159

Appendix 3. Audio Processing Plugins . . . 169

Appendix 4. Microphone Pairs . . . 175

Appendix 5. Types of Software Plugins . . . 189

Glossary . . . 191

References . . . 199

Index . . . 209
