Introduction	xv
Thomas LECLERC	
Part 1. The Main Sources of Space Law.	1
Chapter 1. History, the Treaties, the Resolutions	3
Sergio MARCHISIO	
1.1. Notion and evolution of international space law	3
1.2. Space law as a fruit of the United Nations.	6
1.3. The outer space treaty of 1967: Legal past, legal future.	8
1.3.1. The relevance of the OST for private actors	10
1.4. The other UN treaties on space activities	12
1.4.1. The Rescue and Return Agreement	12
1.4.2. The Liability Convention	14
1.4.3. The Registration Convention	15
1.4.4. The Moon Agreement	17
1.5. The declarations of principles	19
1.6. Other UN resolutions	21
1.7. References	23

Chapter 2. National Space Law	27
Frans VON DER DUNK	
2.1. National space law in the context of international space law	27
2.2. From international to national space law	28
2.3. National space law and licensing regimes addressing private sector space activities	31
2.4. National space law and international responsibility, authorization and continuing supervision	34
2.4.1. Introductory remarks	34
2.4.2. The complex US national space law regime	35
2.4.3. National space law regimes under a single comprehensive national space law	37
2.4.4. Concluding remarks	48
2.5. Final remarks	49
2.6. References	51
Part 2. The Main Principles of Space Law	57
Chapter 3. Freedom of Exploration and Use of Outer Space	59
Jenni TAPIO	
3.1. Introduction	59
3.2. The basic elements of the freedom of exploration and use	60
3.3. Article I of the outer space treaty	65
3.3.1. Scope of application	65
3.3.2. The terms of exploration and use of outer space	68
3.4. Freedom of exploration and use by non-governmental entities – Reflections on State responsibility	73
3.4.1. Introduction	73
3.4.2. State responsibility in space law	74
3.4.3. Responsibility for activities carried on by non-governmental entities: the modalities of authorization and continuous supervision. . .	77
3.5. Concluding remarks	78
3.6. References	79

Chapter 4. The Principle of Exploration and Utilization of Outer Space for the Benefit of All Countries	83
Olavo DE O. BITTENCOURT NETO and Daniel FREIRE E ALMEIDA	
4.1. Introduction.	83
4.2. Drafting	84
4.3. Legal content.	86
4.4. Province of all mankind	88
4.5. Current concerns.	90
4.6. References	92
Chapter 5. Non-Appropriation of Outer Space	95
Philip DE MAN	
5.1. Concept and origins	95
5.2. Scope of application.	97
5.2.1. Personal scope.	97
5.2.2. Functional scope	98
5.2.3. Material scope	100
5.2.4. Space resources	101
5.3. Persistent sovereignty.	103
5.4. References	106
Chapter 6. Peaceful Uses of Outer Space	107
Setsuko AOKI	
6.1. Background.	107
6.2. Article IV of the outer space treaty and unresolved issues	108
6.3. Peaceful uses in outer void space	109
6.4. Peaceful uses on the moon and other celestial bodies	110
6.5. References	111
Chapter 7. State Responsibility and Liability for Space Activities.	113
Armel KERREST	
7.1. Introduction.	113
7.2. The responsibility of States for their national activities in outer space.	114
7.3. Liability for damage caused by space objects.	115
7.4. Liability for damage caused on land or to aircraft in flight	117
7.4.1. Who is liable?	117
7.4.2. What liability?	118

7.4.3. What damage?	123
7.5. Liability for damage suffered elsewhere, not on the surface of the Earth	124
7.5.1. Proof of fault?	124
7.5.2. Whose fault is it?	125
7.6. Questioning the liability of the launching State.	125
7.7. Launching State liability and private activities	127
7.8. References	128
Part 3. Diversity of Fields of Application for Space Law	131
Chapter 8. Space Traffic Management	133
Ntorina ANTONI, Christina GIANNOPAPA and Kai-Uwe SCHROGL	
8.1. Introduction.	133
8.2. Evolution and status of space traffic management	135
8.2.1. The United Nations context	136
8.2.2. The European regional context	138
8.3. National STM initiatives and the civil–military challenge	140
8.3.1. United States.	140
8.3.2. France.	141
8.3.3. Germany	142
8.3.4. United Kingdom.	143
8.3.5. Italy	144
8.3.6. Spain	145
8.3.7. Europe	146
8.4. Civil–military cooperation in the air, seas and radio frequency spectrum	147
8.4.1. Air traffic management	147
8.4.2. Maritime traffic management	148
8.4.3. RF spectrum management	148
8.5. The way forward for STM	149
8.6. References	151
Chapter 9. ITU Regulatory Regime Related to Non-GSO Satellite Systems	155
Yvon HENRI and Attila MATAS	
9.1. Introduction.	155

9.2. International regulations applying to the use of frequencies and orbits particularly by non-GSO FSS satellite systems	157
9.3. Bringing into use satellite networks and systems.	160
9.3.1. Bringing into use GSO networks	160
9.3.2. Bringing into use non-GSO systems	160
9.4. Radio Navigation Satellite Systems	162
9.4.1. RNSS band regulations	163
9.4.2. ITU-R Recommendations related to RNSS.	165
9.5. Non-GSO Satellite systems with SDM.	165
9.5.1. Non-GSO SDM satellite system regulations	166
9.5.2. Space Operation Service frequency bands for non-GSO SDM satellite systems	166
9.6. Conclusion	167
9.7. References	167
Chapter 10. Satellite Radio Communications	169
Philippe ACHILLEAS	
10.1. Introduction	169
10.2. The regime for the use of the “spectrum-orbit” resource	171
10.2.1. The distribution stages and use of the “spectrum-orbit” resource	172
10.2.2. Obligations and rights of administrations and operators	176
10.2.3. Control mechanisms and dispute resolution.	181
10.3. The use of the resource in the interest of all States	184
10.3.1. Equitable access by all countries regardless of their stage of development.	184
10.3.2. From non-appropriation to permanent non-occupation	186
10.3.3. Environmental protection	188
10.4. References.	193
Chapter 11. Navigation Satellite Systems	195
Magda COCCO and Helena CORREIA MENDONÇA	
11.1. Introduction	195
11.2. Initial concepts and overview	195
11.2.1. Concepts and definitions	195
11.2.2. PNT Systems	196
11.2.3. Governance and cooperation	199

11.3. Legal framework applicable to PNT	200
11.3.1. Background.	200
11.3.2. Legal framework specific to PNT.	200
11.3.3. Other legal frameworks relevant for PNT.	205
11.4. Liability	212
11.4.1. International liability of PNT operators as States	212
11.4.2. Liability of PNT operators as signal or service providers.	217
11.4.3. Liability of the downstream PNT stakeholders.	220
11.4.4. Other heads of liability: product supplier and certification entity	221
11.4.5. Liability under sector-specific provisions	222
11.5. Conclusion	223
11.6. References.	224

Chapter 12. The Legal Framework of Remote Sensing by Satellites: The Challenge of the New Space 227

Thierry LEMAIRE

12.1. Introduction	227
12.2. The international legal framework applicable to remote sensing by satellites.	230
12.2.1. The principle of freedom of collection and non-discriminatory distribution of data	230
12.2.2. The application of the principle of freedom of collection and non-discriminatory distribution of data by private companies	233
12.3. State control over private remote sensing activities	235
12.3.1. The legal framework for remote sensing activities in the United States.	236
12.3.2. The legal framework applicable to remote sensing activities in France	239
12.3.3. The legal framework applicable to remote sensing activities in the rest of the world	241
12.4. Legal protection of remote sensing data	243
12.4.1. The protection of remote sensing data by author's right	244
12.4.2. The protection of remote sensing data by copyright	246
12.5. Impacts of remote sensing on individual rights and freedoms	247
12.5.1. Risks to privacy and the protection of private property	248
12.5.2. Risks of personal data protection being breached	250
12.6. Conclusion	251
12.7. References.	253

Chapter 13. Small Satellites and the Regulation of Outer Space Activities	255
Steven FREELAND	
13.1. The changing nature of space technology	255
13.2. The current international legal framework and regulatory requirements	258
13.2.1. International responsibility – authorization and supervision	259
13.2.2. International liability – national indemnity requirements	261
13.2.3. Registration – national and United Nations registers	263
13.2.4. Sustainability of the space environment – space debris mitigation	264
13.2.5. Other regulatory considerations – frequency allocation and traffic management	266
13.3. Concluding remarks	267
13.4. References.	269
Chapter 14. Exploitation of Material Resources of Celestial Bodies	271
Philip DE MAN	
14.1. State of play.	271
14.2. Legal principles	273
14.3. Terms: “exploitation” and “natural resources”	276
14.4. Future international regime.	279
14.5. References.	281
Part 4. Challenges and Issues Raised by the Development of Space Activities	283
Chapter 15. Legal Issues Related to the Exploration of the Universe	285
Laetitia CESARI ZARKAN	
15.1. Introduction	285
15.2. Anthropocentrism through the ages: envy of humanity, space tourist and Homo spatialis	287
15.2.1. Explore or consume: the evolution of the astronaut status	288
15.2.2. Rethinking Humanity away from Earth	289

15.3. Managing objects launched or built in space: communication links between infrastructures, protection and monitoring of systems, and management of space debris.	291
15.3.1. Legal protection of space infrastructures	292
15.3.2. The legal framework for space debris mitigation.	293
15.4. Finding harmony among space powers: from resource allocation to protecting the interests of the scientific community	294
15.5. Conclusion	296
15.6. References.	297

Chapter 16. The COSPAR Planetary Protection Policy and International Law 299

Leslie I. TENNEN

16.1. Introduction	299
16.2. Legal standards of protection of celestial environments	300
16.3. Current COSPAR planetary protection policy.	301
16.3.1. Categories of mission objectives and target body combinations	302
16.3.2. Human missions to Mars.	306
16.4. Implementation of the COSPAR PPP by space agencies and authorities.	307
16.5. Application of international law to the planetary protection policy	312
16.5.1. Due regard	312
16.5.2. International consultation	313
16.5.3. Forward and back contamination	314
16.5.4. Disclosure and reporting requirements.	316
16.5.5. International scientific preserves	317
16.5.6. The non-appropriation principle	318
16.5.7. International responsibility and liability.	318
16.6. Gaps in the application of the planetary protection policy	320
16.6.1. Risks of contamination by failed missions	320
16.6.2. Unintentional increase in risk to non-target bodies	321
16.6.3. Proposed recategorization of areas of Mars.	323
16.7. Commercial new space ventures and planetary protection	323
16.7.1. Application of the planetary protection policy to the private sector	323

16.7.2. Duties of disclosure and preservation of the discovery of extraterrestrial life	324
16.7.3. Restrictions on areas of operations	325
16.7.4. Disclosure of locations and operations.	325
16.7.5. Limitations on otiose and vanity payloads	326
16.8. References.	327
Chapter 17. Military Activities in Outer Space: Legal Aspects	331
Georges D. KYRIAKOPOULOS	
17.1. Introduction	331
17.2. Weaponization of outer space	333
17.3. International action for the “prevention of an arms race in outer space”	335
17.4. Transparency and confidence-building measures in outer space activities.	336
17.5. References.	337
Chapter 18. Outer Space in the Face of Contemporary Conflicts: Limits and Impasses of International Law	339
Julien ANCELIN and Chloé DUFFORT	
18.1. Introduction	339
18.2. Spatial conflict subject to the law of collective security	343
18.3. Spatial conflict challenges the application of the law of armed conflict	347
18.4. Conclusion	350
18.5. References.	352
List of Authors	355
Index	357
