| Preface | ix |
| Introduction | xi |
| Chapter 1. Human-Centered Computer Science Research (HCCSR) | 1 |
| 1.1. Concepts and features of HCCSR | 1 |
| 1.2. HCCSR: science of the artificial | 6 |
| 1.3. Difficulties in building and evaluating HCCSR instruments | 8 |
| 1.4. Conclusion | 10 |
| Chapter 2. THEDRE Principles | 13 |
| 2.1. Introduction | 13 |
| 2.2. Epistemological paradigms | 13 |
| 2.2.1. Four paradigms | 14 |
| 2.2.2. What are the reasoning methods? | 18 |
| 2.2.3. How is the value or validity of knowledge appreciated? | 19 |
| 2.2.4. Conclusion | 22 |
| 2.3. Data production and analysis methods | 24 |
| 2.3.1. Objective of qualitative and quantitative methods | 24 |
| 2.3.2. Means to produce and analyze data | 26 |
| 2.3.3. Combining methods for HCCSR | 29 |
| 2.4. User-centered design | 29 |

| | |
|---|-----------|
| 2.5. Traceability, continuous improvement approach and indicators | 31 |
| 2.5.1. Traceability | 31 |
| 2.5.2. Continuous improvement process | 33 |
| 2.5.3. Quality indicators | 34 |
| Chapter 3. Four Research Methods | 39 |
| 3.1. Research methods | 39 |
| 3.2. Design-based research (DBR) | 43 |
| 3.2.1. Foundations | 43 |
| 3.2.2. Characteristics of DBR | 44 |
| 3.2.3. DBR and activatable tools (TEL) | 47 |
| 3.2.4. Summary of the DBR method | 49 |
| 3.3. Design science research for information science | 51 |
| 3.3.1. Foundations | 51 |
| 3.3.2. Initial model [HEV 04] | 52 |
| 3.3.3. Improvements to the initial model | 56 |
| 3.3.4. Summary of the design science method and its extensions | 62 |
| 3.4. Action research and action design research for research in SE and IS | 64 |
| 3.4.1. Foundations of the action research | 64 |
| 3.4.2. Action design research [SEI 11] | 66 |
| 3.4.3. Summary of the design action research method for SE | 69 |
| 3.5. Dialogical model for research in management sciences | 71 |
| 3.5.1. Paradigm and knowledge validation | 72 |
| 3.5.2. Characteristics of the dialogical model | 73 |
| 3.5.3. Summary of the dialogical model | 76 |
| 3.6. Summary of the methods studied | 79 |
| Chapter 4. THEDRE: Theoretical Model | 83 |
| 4.1. A traceable method in HCCSR: paradigm and formalism | 83 |
| 4.2. Pragmatic constructivism for the THEDRE method | 85 |
| 4.3. Concepts and comprehensive view of the THEDRE method | 88 |
| 4.3.1. Terminology for the THEDRE method | 88 |
| 4.3.2. Actors and roles in the THEDRE method | 89 |
| 4.3.3. Comprehensive view of the THEDRE method | 90 |

| | |
|---|------------|
| 4.4. Structure and traceability in the THEDRE method | 93 |
| 4.4.1. Process structure in the THEDRE method | 93 |
| 4.4.2. PDCA cycle for structuring the THEDRE method | 93 |
| 4.4.3. Tasks and blocks for dividing processes into sub-processes | 94 |
| 4.4.4. Traceability in the THEDRE method | 95 |
| 4.4.5. Traceability indicators in the THEDRE method | 96 |
| 4.4.6. Formalism of indicators in the THEDRE model | 98 |
| 4.5. THEDRE: an adaptable language | 100 |
| 4.5.1. Construction language for research processes | 100 |
| 4.5.2. Concepts and relationships for using the THEDRE formalism | 100 |
| 4.5.3. Graphical notations of the THEDRE method | 102 |
| 4.6. Conclusion on the THEDRE process language | 107 |
| Chapter 5. THEDRE Implementation | 109 |
| 5.1. Putting THEDRE into practice | 109 |
| 5.1.1. “Research planning” sub-process | 111 |
| 5.1.2. “Experiment” sub-process | 123 |
| 5.1.3. “Control” sub-process | 138 |
| 5.1.4. The “building and decision-making” sub-process | 140 |
| 5.1.5. Conclusion | 144 |
| 5.2. Description of guides provided by THEDRE | 145 |
| 5.2.1. “Brainstorming” guide | 146 |
| 5.2.2. Guide for writing the “problem” | 148 |
| 5.2.3. Guide for describing activity, production, objective or data quality indicators | 149 |
| 5.2.4. “Activatable tool breakdown” guide | 150 |
| 5.2.5. Guide for “orchestrating experiments” | 150 |
| 5.2.6. Guide for writing the “experiment protocol” | 151 |
| 5.2.7. Guide for writing the “facilitation guide for conducting experiments” | 153 |
| 5.2.8. Guide for “writing an interview guide or questionnaire” | 155 |
| 5.2.9. “Specifications” guide for activatable tool and components | 160 |
| 5.2.10. Guide for “effective use cases” | 161 |
| 5.2.11. Guide for “experiment synthesis” | 162 |
| 5.2.12. Guide to “capitalizing data and analysis scenarios” | 163 |
| 5.2.13. Logic diagram for choosing data production methods | 164 |
| 5.2.14. Deliverables: facilitators for multidisciplinary | 168 |
| 5.3. Conclusion | 169 |

| | |
|--|-----|
| Chapter 6. Construction and Evaluation | 171 |
| 6.1. The working context and THEDRE construction method | 171 |
| 6.2. Continuous construction of the THEDRE method | 172 |
| 6.2.1. IT and IDM systems | 173 |
| 6.2.2. Human–computer interface (HCI) | 180 |
| 6.2.3. User tests for innovative interfaces: 2008–2014 | 186 |
| 6.2.4. Technologies for enhancing learning (TEL) | 187 |
| 6.2.5. Engineering multi-agent systems (MAS) | 192 |
| 6.2.6. Conclusion on building THEDRE | 195 |
| 6.3. Evaluation of the THEDRE method | 197 |
| 6.3.1. Evaluation of language and the experimental process | 197 |
| 6.3.2. Conclusions | 202 |
| 6.3.3. Evaluation of the usability of the guides suggested in the THEDRE method | 204 |
| Conclusions and Perspectives | 209 |
| Appendices | 215 |
| Appendix 1. Evaluation of THEDRE Modeling Language | 217 |
| Appendix 2. Evaluation of the Usability of THEDRE Guides | 223 |
| Glossary | 231 |
| Bibliography | 235 |
| Index | 247 |
