<b>Preface</b> . . . . .	ix
<b>Introduction</b> . . . . .	xiii
<b>Chapter 1. NFV Management and Orchestration</b> . . . . .	1
1.1. NFV Architecture: overview . . . . .	1
1.1.1. NFV framework and major components . . . . .	2
1.1.2. MANO reference points . . . . .	3
1.2. Virtualized network function . . . . .	4
1.2.1. VNF interfaces . . . . .	5
1.2.2. VNF scaling . . . . .	7
1.2.3. Element management system (EMS) . . . . .	8
1.3. Management and orchestration . . . . .	8
1.3.1. Virtual infrastructure manager (VIM) . . . . .	8
1.3.2. Virtual network manager (VNFM) . . . . .	9
1.3.3. NFV orchestrator (NFVO) . . . . .	10
1.4. Operating support system/business support system (OSS/BSS) . . . . .	11
1.5. MANO functional requirements . . . . .	14
1.5.1. Functional requirements for NFVO . . . . .	14
1.5.2. Functional requirements for VNFM . . . . .	21
1.5.3. Functional requirements for VIM . . . . .	25
1.6. State of the art and development trends . . . . .	28

<b>Chapter 2. Use Case Driven Security Threat Analysis</b> . . . . .	45
2.1. NFV Infrastructure as a Service (NFVIaaS) . . . . .	45
2.1.1. Overall description . . . . .	46
2.1.2. Threat analysis . . . . .	48
2.1.3. Security requirements . . . . .	54
2.2. Virtual Network Platform as a Service (VNPaaS) . . . . .	58
2.2.1. Overall description . . . . .	58
2.2.2. Threat analysis . . . . .	60
2.2.3. Security requirements . . . . .	63
2.3. Virtual Network Function as a Service (VNFaaS) . . . . .	67
2.3.1. Overall description . . . . .	67
2.3.2. Threat analysis . . . . .	80
2.3.3. Security requirements . . . . .	83
2.4. Virtualization of mobile networks . . . . .	87
2.4.1. Overall description . . . . .	87
2.4.2. Threat analysis . . . . .	92
2.4.3. Security requirements . . . . .	94
2.5. Fixed access network functions virtualization . . . . .	96
2.5.1. Overall description . . . . .	96
2.5.2. Threat analysis . . . . .	99
2.5.3. Security requirements . . . . .	101
2.6. Concluding remarks . . . . .	104
<b>Chapter 3. NFV-based Security Management</b> . . . . .	107
3.1. Essential security requirements . . . . .	108
3.2. Middleboxes . . . . .	112
3.2.1. Issues with the current middleboxes . . . . .	113
3.2.2. Improvements through NFV . . . . .	115
3.3. Security service orchestration . . . . .	119
3.3.1. High-level features . . . . .	120

3.3.2. Typical frameworks for service orchestration . . . . .	122
3.4. NFV-based security management platforms . . . . .	126
<b>Chapter 4. Identity and Access Management in NFV . . . . .</b>	<b>135</b>
4.1. Major functions . . . . .	136
4.2. Case studies . . . . .	138
4.2.1. Telco scenarios: mobile devices and networks . . . . .	139
4.2.2. Public clouds . . . . .	141
4.2.3. Collaborative network scenarios . . . . .	144
4.3. NFV-based implementations . . . . .	145
4.4. Comparative analysis . . . . .	150
<b>Chapter 5. Intrusion Prevention and Detection in NFV . . . . .</b>	<b>157</b>
5.1. Case studies . . . . .	157
5.1.1. IT scenario . . . . .	158
5.1.2. Telco scenarios: mobile devices and networks . . . . .	160
5.1.3. Public clouds . . . . .	162
5.2. NFV-based implementations . . . . .	164
5.3. Comparative analysis . . . . .	168
<b>Chapter 6. Network Isolation . . . . .</b>	<b>173</b>
6.1. Case studies . . . . .	174
6.1.1. IT scenario . . . . .	174
6.1.2. Telco scenarios: mobile devices and networks . . . . .	176
6.1.3. Public clouds . . . . .	179
6.1.4. Trusted environment . . . . .	183
6.2. NFV-based implementations . . . . .	185
6.3. Comparative analysis . . . . .	190

<b>Chapter 7. Data Protection in NFV</b> . . . . .	195
7.1. Case studies . . . . .	195
7.1.1. IT scenario . . . . .	197
7.1.2. Telco scenarios: mobile devices and networks . . . . .	201
7.1.3. Public clouds . . . . .	204
7.2. NFV-based implementations . . . . .	207
7.3. Comparative analysis . . . . .	213
<b>Conclusion</b> . . . . .	219
<b>Bibliography</b> . . . . .	227
<b>Index</b> . . . . .	249
