Preface	xi
Carolina Feliciano MACHADO and J. Paulo DAVIM	
Chapter 1. Choice Architecture: Nudging for Sustainable Behavior	1
Cristiana Cerqueira LEAL and Benilde OLIVEIRA	
1.1. Choice architecture and nudging	1
1.1.1. Choice architecture	1
1.1.2. Nudging: using choice architecture for good.	2
1.2. Theoretical roots and applications around the word	4
1.2.1. Heuristics and systematic errors	4
1.2.2. Libertarian paternalism	5
1.2.3. Pro-self and pro-society nudges	5
1.2.4. Nudging around the world.	6
1.3. Nudging for sustainability	8
1.3.1. Nudging tools for sustainable behavior	8
1.3.2. Behavioral insights	9
1.4. Challenges and final remarks	15
1.5. References	16
Chapter 2. Embedding Corporate Sustainability in Human Resource Management Practice	19
David STARR-GLASS	
2.1. Introduction.	19
2.2. Corporate social responsibility and corporate sustainability	21
2.2.1. Corporate social responsibility	21

2.2.2. Corporate sustainability	24
2.3. Human resource management	26
2.3.1. A short evolutionary history of HRM	26
2.4. The nexus of human resource management and corporate sustainability.	28
2.4.1. Instrumental CSR-HRM.	29
2.4.2. Social integrative CSR-HRM.	30
2.4.3. Political CSR-HRM	32
2.5. Embedding corporate sustainability in HRM practices	33
2.5.1. Recruitment and selection practices	33
2.5.2. Training and development practices	35
2.5.3. Motivation, performance and appraisal	37
2.5.4. Rewards, compensation and benefits	38
2.6. Conclusion	40
2.7. References	42
Chapter 3. Competency Cultivation of Mechanical Engineers in the Process of Social Sustainable Development	53
Hailong FU, Yue WANG, Marius Gabriel PETRESCU and Mirela PANAIT	
3.1. The importance of the basic qualities of mechanical engineers for the sustainable development of society.	53
3.1.1. What are the basic qualities of a mechanical engineer?	53
3.1.2. How to achieve sustainable development of mechanical engineers	54
3.1.3. The relationship between the sustainable development of mechanical engineers and the sustainable development of society.	54
3.2. Mechanical engineers must observe ethics and laws.	55
3.2.1. The importance of engineering ethics	56
3.2.2. Problems and causes of engineering ethics.	56
3.2.3. Legal issues in manufacturing	56
3.3. Mechanical engineers shoulder responsibility for environmental protection	57
3.3.1. Environmental pollution from industrial production is widespread	57
3.3.2. Engineers should know how to control industrial environmental pollution.	58
3.4. Mechanical engineers must be familiar with traditions and learn to innovate.	59

3.5. Mechanical engineers should pay attention to product quality management and quality assurance systems.	60
3.6. Mechanical engineers should have a time view, a cost view and a risk view.	61
3.6.1. Establish the concept of time, follow the trend of industry development	62
3.6.2. Set up the cost view, strengthen the core competition ability	62
3.6.3. Establish the concept of project risk to avoid the occurrence of major losses	62
3.7. Mechanical engineers should have a global vision.	62
3.7.1. Establish a system concept and give play to the role of system engineering	62
3.7.2. Strengthen international exchanges and promote common progress within the industry.	63
3.8. Conclusion	63
3.9. Acknowledgements	64
3.10. References.	64
Chapter 4. Essentials of Sustainability: A Roadmap for Businesses	67
Yasemin SEN	
4.1. Introduction.	67
4.2. Definition of sustainability.	67
4.3. History of sustainability	69
4.4. Sustainability entrepreneurship	70
4.5. Sustainable business.	76
4.6. Sustainability leadership and culture	83
4.7. Sustainability innovation	85
4.8. Conclusion	86
4.9. References	86
Chapter 5. Styles of Leadership and Perceptions of Corporate Social Responsibility	89
Adriana Toledo PEREIRA, Maria João SANTOS and Dimas de Oliveira ESTEVAM	
5.1. Introduction.	89
5.2. Styles of leadership and SR perceptions	90
5.2.1. Styles of leadership: transformational, transactional and <i>laissez-faire</i>	90
5.2.2. SR perceptions	91

5.2.3. Relationships between styles of leadership and SR	92
5.2.4. Research model and hypotheses	93
5.3. Method	95
5.4. Results.	96
5.4.1. Analysis of scale reliability	96
5.4.2. Mean and standard sample deviation	96
5.4.3. Analysis of variable correlations	97
5.4.4. Multiple regression analysis	98
5.5. Discussion of the results	99
5.6. Conclusion	101
5.7. References	103
Chapter 6. Corporate Social Responsibility Reporting: Background, Evolution and Sustainability Promoter	109
Marian Cătălin VOICA and Adrian STANCU	
6.1. Introduction.	109
6.2. A brief history of CSR development and conceptualization	110
6.2.1. Timeline of CSR development	110
6.2.2. Opponents and supporters of CSR	111
6.2.3. Carroll's pyramid of corporate social responsibility	112
6.2.4. The three-domain model of CSR.	114
6.3. Corporate social reporting – standardization and policy	116
6.3.1. Corporate social reporting standards	116
6.3.2. Corporate social reporting policy	117
6.3.3. Carrots and sticks analysis	118
6.4. Analysis of the GRI reporting enterprises between 2007 and 2017	120
6.4.1. Analysis of the GRI reporting enterprises from the energy sector between 2007 and 2017	121
6.4.2. Analysis of the GRI reporting enterprises from the chemicals sector between 2007 and 2017	127
6.4.3. Analysis of the GRI reporting enterprises from the metal products sector between 2007 and 2017	133
6.4.4. Analysis of the GRI reporting enterprises from the mining sector between 2007 and 2017	139
6.4.5. Analysis of the GRI reporting enterprises from the automotive sector between 2007 and 2017	145
6.5. Conclusion	151
6.6. References	153

Chapter 7. Integrated Management Systems Under the Banner of Sustainable Development: Risks and Opportunities	157
Marius Gabriel PETRESCU, Mirela PANAIT and Hailong FU	
7.1. Introduction.	157
7.1.1. Organizations and sustainable development	157
7.1.2. Integrated management systems in the context of sustainable development	162
7.2. Evolution of approaches for management systems.	166
7.2.1. Quality and quality management system	166
7.2.2. The environment and the environmental management system	172
7.2.3. Occupational safety and health management system	178
7.3. Conclusion	181
7.4. References	182
Chapter 8. Mentoring... Really? And Why Not?	189
Bruna ROCHA, João Leite RIBEIRO and Delfina GOMES	
8.1. Introduction.	189
8.2. Concept of mentoring	191
8.2.1. Development of the mentoring concept	191
8.2.2. Mentoring, the concept	193
8.2.3. Types of mentoring.	197
8.2.4. Mentoring objectives.	199
8.2.5. Mentoring participants.	201
8.2.6. Advantages and disadvantages of mentoring.	204
8.2.7. Mentoring: facilitators and obstacles	211
8.3. Conclusion	218
8.4. References	219
Chapter 9. Stop Camouflaging it in Green: Do Not Confuse Corporate Social Responsibility with Sustainable Management.	225
Diana FERNANDES and Carolina Feliciano MACHADO	
9.1. Introduction.	226
9.2. Ecological Economics	229
9.3. Sustainable Management.	233
9.4. Corporate Social Responsibility.	237

9.5. Where do the concepts match and mismatch?	243
9.6. Conclusion	248
9.7. References	250
List of Authors	261
Index	263
