| Preface | xi |
| Renaud FABRE and Alain BENSOUSSAN | |
| Part 1. Scientific Resources and Data Economy | 1 |
| Chapter 1. Data Production and Sharing: Towards a Universal Right? | 3 |
| Marie BLANQUART, Thomas DESCOUS and Ewen HUET | |
| 1.1. The right to knowledge today: between attempts at universalization and “self-regulation” by the GAFA | 4 |
| 1.1.1. Towards the emergence of a universal right to knowledge subject to divergent economic thinking | 5 |
| 1.1.2. The recognition of a universal right to knowledge: a “realistic utopia”? | 6 |
| 1.2. Platform and scientific community rights: the absence of an upfront legal framework | 7 |
| 1.2.1. A system partly caused by the development of the digital sector | 7 |
| 1.2.2. The now-fragile law attempting to protect the results of research | 8 |
| 1.2.3. Intellectual property rights | 8 |
| 1.2.4. The notion of databases and protection by <i>sui generis</i> law | 9 |
| 1.2.5. Problems with the legal statute of knowledge | 11 |
| 1.3. The need to elaborate several types of legislation | 12 |
| 1.3.1. Platform rights | 12 |
| 1.3.2. Text and Data Mining: the great new stake | 14 |
| 1.4. Open Science: an achievable goal? | 15 |

| | |
|---|----|
| Chapter 2. Data: a Simple Raw Material? | 19 |
| Bertrand PELETIER and Thomas DESCOUS | |
| 2.1. The new generation of data: management issues arising from ownership rights | 19 |
| 2.2. How to transform these data into knowledge? | 20 |
| 2.3. A new knowledge economy is necessary | 21 |
| 2.3.1. The information war and the stakes of data protection | 21 |
| 2.4. International scientific publishing: high added-value services and researcher community. | 22 |
| 2.4.1. The open platform as the preferred tool for sharing and exploiting data | 22 |
| 2.4.2. An undeniable added value in processing data brought about by platforms | 24 |
| Chapter 3. New Knowledge Tools | 27 |
| Christoph LOHSCHOLDER | |
| 3.1. Sharing and uncertainty. | 27 |
| 3.2. Platform construction | 28 |
| 3.3. Machine learning | 30 |
| 3.4. Promising progress to be qualified.... | 31 |
| Part 2. The Knowledge Factory | 33 |
| Chapter 4. Economic Models of Knowledge Sharing | 35 |
| Vincent GIACOBBI | |
| 4.1. A quick historic overview | 35 |
| 4.2. Property and/or sharing. | 35 |
| 4.3. An immaterial good capable of fueling the production of material goods | 37 |
| 4.4. The large stakes of knowledge production | 38 |
| 4.4.1. Limits of this model: consistency, reliability and indistinction | 39 |
| 4.4.2. Business models of knowledge sharing | 39 |
| 4.4.3. Some numbers. | 40 |
| 4.5. Development prospects allowing for new fields of study and more nimbly integrating researchers into the economic chain | 41 |

| | |
|--|----|
| Chapter 5. From the Author to the Valorizer | 43 |
| Lucile COLLIN | |
| 5.1. The author and the valorizer: conciliation and efficiency of the interaction | 43 |
| 5.2. One point on patents | 44 |
| 5.3. The innovation cycle | 45 |
| 5.4. The law for a Digital Republic | 46 |
| 5.5. Scientific openness surpassing ancient legal tools | 48 |
| Chapter 6. Valorization: a Global Geopolitical Stake | 51 |
| Marie BLANQUART | |
| 6.1. A multispeed competition | 51 |
| 6.1.1. The United States: a country losing its lead | 51 |
| 6.1.2. French stagnation | 53 |
| 6.1.3. The expanding Chinese model | 54 |
| 6.2. International cooperation in the scientific sector | 57 |
| 6.2.1. A developing European project. | 57 |
| 6.2.2. International organizations | 58 |
| Chapter 7. Focus: the Chinese Patent Strategy | 61 |
| Vincent GIACOBBI | |
| 7.1. Chinese expansion. | 62 |
| 7.2. An inflation of Chinese patents | 63 |
| 7.3. Some fallbacks in China nuancing its strategic position | 65 |
| 7.3.1. A fallback in favor of applied research | 66 |
| 7.3.2. Territorial withdrawal | 66 |
| 7.3.3. A long certification process with uncertain ends | 66 |
| 7.3.4. The procedure for submitting a dispute on a patent | 67 |
| 7.4. Contestable and contested digital supremacy | 68 |
| Chapter 8. Artificial Intelligence Policies | 71 |
| Maximilian NOMINACHER and Bertrand PELETIER | |
| 8.1. Policies concerning “strong” AI. | 72 |
| 8.2. Policies concerning “weak” AI | 72 |
| 8.3. Policies concerning artificial intelligence safety | 74 |
| 8.4. From practice to ethics: what is AI’s legal status? | 75 |

| | |
|--|-----|
| Chapter 9. New Formulations of Results and New “Markets” | 77 |
| Louki-Géronimo RICHOU | |
| 9.1. Making universal: establishing common standards of expression | 78 |
| 9.1.1. Requirement of uniqueness | 79 |
| 9.1.2. Hierarchy requirement | 79 |
| 9.2. To adapt: from popularization to simplification | 82 |
| 9.2.1. Versatility or specialization? | 83 |
| 9.2.2. Simplifying rather than popularizing | 84 |
| 9.2.3. Measures following the precautionary principle: archiving and protection. | 85 |
| 9.2.4. Preserving the researcher while optimizing knowledge for the general interest during the digital era. | 85 |
| 9.3. Developing the general state of knowledge with care | 87 |
| | |
| Chapter 10. Open Science: a Common Good that Needs to be Valued? | 89 |
| Nicolas MASSEREAU | |
| 10.1. A global challenge that must take the economy into account | 90 |
| 10.2. A wide variety of public policies respond to this challenge. | 90 |
| 10.2.1. Enterprises and States | 90 |
| 10.2.2. Valorization as a junction point. | 91 |
| 10.2.3. Basic research: competing with applied research? | 93 |
| 10.3. The French case and international rankings | 94 |
| 10.4. The limits of the patent system and publication count | 96 |
| 10.5. Investment tools aiming to correct these failures | 98 |
| 10.6. How to measure innovation? | 100 |
| 10.6.1. The university: the first knowledge production framework recognized by law | 100 |
| 10.6.2. Research data: a new intangible “place” for producing knowledge | 101 |
| 10.7. The application of research is not an end in itself. | 102 |
| | |
| Conclusion | 105 |
| Renaud FABRE and Alain BENSOUSSAN | |

| | |
|---|-----|
| Appendices | 109 |
| Appendix 1. Extract from the CNRS White Paper: “The Work of Science and the Digital Field: Data, Publications, Platforms. A Systematic Analysis of the Law for a Digital Republic” | 111 |
| Appendix 2. Extract from the CNRS White Paper “Open Science in a Digital Republic: Studies and Proposals for Law Application. Strategic Application Guide” | 161 |
| Bibliography | 179 |
| List of Authors | 183 |
