<b>Preface</b> . . . . .	ix
<b>Chapter 1. Hospitals and Management</b> . . . . .	1
Philippe BLUA	
1.1. Introduction . . . . .	1
1.2. Imperfections in hospital information technology . . . . .	2
1.3. Essentials for high-quality IT systems in hospitals . . . . .	5
1.4. Hospital IT systems of the future . . . . .	7
1.5. Conclusion . . . . .	11
1.6. References . . . . .	12
<b>Chapter 2. The Hospital and its IT System: Where it is Right Now and What it Needs</b> . . . . .	13
Michaël DE BLOCK	
2.1. Introduction . . . . .	13
2.2. Cooperation and quality . . . . .	18
2.2.1. Area 1 . . . . .	18
2.2.2. Area 2 . . . . .	19
2.2.3. Area 3 . . . . .	20
2.2.4. Area 4 . . . . .	21
2.2.5. Area 5 . . . . .	21
2.2.6. Axe 6 . . . . .	22
2.2.7. Area 7 . . . . .	23
2.2.8. Area 8 . . . . .	24

2.3. Information systems – communication and organization . . . . .	26
2.4. Linking HIS, biomedicine and telemedicine . . . . .	28
2.5. Conclusion . . . . .	34
2.6. References . . . . .	34

### **Chapter 3. Medical Informatics: Historical Overview, Supports and Challenges . . . . . 37**

David LAPLANCHE and Stéphane SANCHEZ

3.1. Introduction . . . . .	37
3.2. Information sources . . . . .	38
3.2.1. Data that can be used in the hospital sector . . . . .	38
3.2.2. Different media . . . . .	39
3.2.3. Legal framework . . . . .	40
3.2.4. Digital transition . . . . .	43
3.3. Using information . . . . .	45
3.3.1. PMIS . . . . .	45
3.3.2. Medical information in research . . . . .	48
3.3.3. Structure and use: an example from an ER unit . . . . .	49
3.4. Conclusion . . . . .	51
3.5. References . . . . .	51

### **Chapter 4. Challenges in Hospital Logistics: the Example of the Champagne Sud Hospitals . . . . . 53**

Frédéric LUTZ

4.1. Introduction . . . . .	53
4.2. Challenges facing care professionals . . . . .	55
4.3. Challenges around safety and the continuity in supplies . . . . .	58
4.3.1. The need for regularity in supplies . . . . .	59
4.3.2. The need for flexibility and reactivity . . . . .	63
4.3.3. Qualitative requirements in supply and removal chains . . . . .	63
4.4. Challenges around the role played in enhancing the appeal of the institution . . . . .	63
4.5. Challenges surrounding economic optimization . . . . .	64
4.5.1. Examples of optimization implementations . . . . .	64
4.5.2. Challenges in optimizing logistics flow management tools . . . . .	68
4.6. Challenges related to regional cooperation . . . . .	69
4.6.1. Cooperative purchasing in the context of regional hospital consortia . . . . .	69

4.6.2. Challenges around common supplies and storage . . . . .	71
4.6.3. Challenges surrounding the pooling of pharmaceutical supplies . . . . .	76
4.6.4. Challenges around pooling fleets of vehicles . . . . .	78
4.7. Challenges surrounding the implementation of a regional supply chain management . . . . .	81
4.8. Conclusion . . . . .	83
4.9. References . . . . .	83

## **Chapter 5. Forecasting Patient Flows into Emergency Services**

Mohamed AFILAL, Lionel AMODEO, Farouk YALAOUI and Frédéric DUGARDIN	85
5.1. Introduction . . . . .	85
5.2. The problem statement . . . . .	87
5.3. A state-of-the-art . . . . .	89
5.3.1. Predictive models . . . . .	89
5.3.2. Forecasting inflows into emergency services . . . . .	92
5.3.3. Summary . . . . .	93
5.4. Analysis of the inflows of patients into emergency care . . . . .	94
5.4.1. Data extraction . . . . .	94
5.4.2. Data modeling . . . . .	96
5.4.3. Descriptive statistics . . . . .	98
5.5. Introduction of a new classification of patients in emergency care . . . . .	100
5.5.1. Interest and motivation . . . . .	102
5.5.2. Statistical approach . . . . .	102
5.5.3. New classification: patient state . . . . .	102
5.5.4. Descriptive statistics for the new categories . . . . .	108
5.6. Forecast models for patient flows . . . . .	108
5.6.1. The process used in the study . . . . .	108
5.6.2. Types of forecasting models . . . . .	109
5.6.3. Choosing classes to predict . . . . .	114
5.6.4. Adjusted long-term forecasting model . . . . .	116
5.6.5. Short-term forecasting models . . . . .	119
5.7. Tests and implementation of the models . . . . .	120
5.7.1. Testing the performance of the models . . . . .	120
5.7.2. Analysis of the residuals . . . . .	123

5.7.3. Analysis of the robustness of the model: epidemics . . . . .	125
5.8. Application used in the ES of the THC: OptaUrgences® . . . . .	126
5.8.1. Introduction . . . . .	126
5.8.2. Specifications . . . . .	126
5.8.3. Implementation: development of algorithms . . . . .	131
5.8.4. Example of the use of this application . . . . .	132
5.8.5. History of the performances . . . . .	134
5.9. Conclusion . . . . .	135
5.10. References . . . . .	137

**Chapter 6. Positioning and Innovations from the Champagne Sud Hospitals in the World of Hospital Logistics . . . . . 145**

Moïse NOUMBISSI TCHOUPPO, Alice YALAOUI, Lionel AMODEO and Farouk YALAOUI

6.1. Introduction . . . . .	145
6.2. The hospital logistics problem . . . . .	148
6.2.1. Operational research and the hospital world . . . . .	149
6.2.2. Description, formalization and solution approach . . . . .	150
6.3. Innovative methods and techniques . . . . .	155
6.3.1. The problem of pickups and deliveries within a time frame and with a homogeneous fleet of vehicles . . . . .	155
6.3.2. Pickup and delivery problems with a time frame and a heterogeneous fleet of vehicles of finite size . . . . .	157
6.3.3. Pickup and delivery problem with a time frame and a heterogeneous fleet of vehicles of infinite size . . . . .	163
6.4. Conclusion . . . . .	165
6.5. References . . . . .	165

**List of Authors . . . . . 171**

**Index . . . . . 173**
