Introduction. On the Imperative for Responsible Innovation in Contemporary Market Societies	xv
Chapter 1. RRI as Social Critique: Achievements and Drawbacks	1
1.1. RRI and its “precursors” – what’s new?	1
1.2. Addressing the mischiefs of free markets	11
1.3. Democracy in distress: the prospects of collective responsibility	20
Chapter 2. Responsibility and the Future	33
2.1. The anticipatory aspect of RRI	33
2.2. Innovation and manageability of the future: on uncertainty, control and regulation	38
2.3. Why responsibility?	47
Chapter 3. EU Governance of RTD and the Market	57
3.1. On governance and good governance: order with/out authority?	57
3.2. The economic “imprint” on the EU governance of RTD	66

3.3. EU governance of RTD: is “Science versus Society” actually the problem?	73
Chapter 4. EU Institutional Rationality on RRI	83
4.1. On ends and means: EU institutional discourse on the instrumentality of RRI.	83
4.2. The RRI “keys”: keys to what?	95
4.2.1. Public engagement	96
4.2.2. Open access/open science	100
4.2.3. Gender	103
4.2.4. Ethics	105
4.2.5. Science education.	106
4.3. Walking the tightrope between democratization and responsabilization	107
Chapter 5. Ethics and the RRI Promise	115
5.1. Ethics in the EU governance of RTD: achievements, problems and challenges	115
5.2. RRI and rediscovering the promises of the Nuremberg Code (1947).	123
5.3. The future of ethics in the context of RRI: a gatekeeper of an open door?	134
Chapter 6. Responsibilization in Tension with Market Regulation	145
6.1. Ethics in the Bermuda Triangle of market mechanisms: innovation, responsibility and the perennial reinvention of capitalism	145
6.2. On the traps behind the notion of “responsibilization” in a market-driven context.	157
6.3. Going beyond New Public Management?	168
Conclusion	181
