<b>Preface</b> . . . . .	ix
<b>Introduction</b> . . . . .	xiii
<b>Chapter 1. Optimization: Theoretical Foundations and Methods</b> . . . . .	1
1.1. The formalization of an optimization problem. . . . .	1
1.2. Constrained optimization methods . . . . .	5
1.2.1. The method of Lagrange multipliers . . . . .	9
1.2.2. Method of the quadratic penalization. . . . .	11
1.2.3. Methods of interior penalties . . . . .	12
1.2.4. Methods of exterior penalties . . . . .	13
1.2.5. Augmented Lagrangian method . . . . .	14
1.3. Classification of optimization methods . . . . .	15
1.3.1. Deterministic methods . . . . .	16
1.3.2. Stochastic methods . . . . .	18
1.4. Conclusion. . . . .	21
1.5. Bibliography . . . . .	22
<b>Chapter 2. Metaheuristics for Robotics</b> . . . . .	27
2.1. Introduction. . . . .	27
2.2. Metaheuristics for trajectory planning problems . . . . .	28
2.2.1. Path planning . . . . .	29
2.2.2. Trajectory generation. . . . .	43

2.3. Metaheuristics for automatic control problems . . . . .	45
2.4. Conclusion . . . . .	50
2.5. Bibliography . . . . .	50
<b>Chapter 3. Metaheuristics for Constrained and Unconstrained Trajectory Planning . . . . .</b>	<b>53</b>
3.1. Introduction . . . . .	53
3.2. Obstacle avoidance . . . . .	54
3.3. Bilevel optimization problem . . . . .	58
3.4. Formulation of the trajectory planning problem . . . . .	59
3.4.1. Objective functions . . . . .	60
3.4.2. Constraints . . . . .	62
3.5. Resolution with a bigenetic algorithm . . . . .	63
3.6. Simulation with the model of the Neuromate robot . . . . .	66
3.6.1. Geometric model of the Neuromate robot . . . . .	67
3.6.2. Kinematic model of the Neuromate robot . . . . .	71
3.6.3. Simulation results . . . . .	72
3.7. Conclusion . . . . .	83
3.8. Bibliography . . . . .	83
<b>Chapter 4. Metaheuristics for Trajectory Generation by Polynomial Interpolation . . . . .</b>	<b>87</b>
4.1. Introduction . . . . .	87
4.2. Description of the problem addressed . . . . .	88
4.3. Formalization . . . . .	91
4.3.1. Criteria . . . . .	91
4.3.2. Constraints . . . . .	92
4.4. Resolution . . . . .	94
4.4.1. Augmented Lagrangian . . . . .	95
4.4.2. Genetic operators . . . . .	97
4.4.3. Solution coding . . . . .	99
4.5. Simulation results . . . . .	100
4.6. Conclusion . . . . .	116
4.7. Bibliography . . . . .	118

---

<b>Chapter 5. Particle Swarm Optimization for Exoskeleton Control</b> . . . . .	121
5.1. Introduction . . . . .	121
5.2. The system and the problem under consideration . . . . .	123
5.2.1. Representation and model of the system under consideration . . . . .	123
5.2.2. The problem under consideration . . . . .	125
5.3. Proposed control algorithm . . . . .	126
5.3.1. The standard PSO algorithm . . . . .	126
5.3.2. Proposed control approach . . . . .	128
5.4. Experimental results . . . . .	135
5.5. Conclusion . . . . .	142
5.6. Bibliography . . . . .	143
<b>Conclusion</b> . . . . .	147
<b>Index</b> . . . . .	153
