<b>Preface</b> . . . . .	ix
<b>Chapter 1. Dissolved Organic Carbon Dynamics in the Ligurian Sea</b> . . . . .	1
Chiara SANTINELLI	
1.1. Introduction. . . . .	1
1.1.1. Why dissolved organic carbon? . . . . .	1
1.1.2. Why dissolved organic carbon in the Ligurian Sea? . . . . .	3
1.2. Dissolved organic carbon vertical distribution in the Ligurian Sea . . . . .	5
1.3. Dissolved organic carbon temporal variability at the DYFAMED station . . . . .	8
1.3.1. Seasonal variability in the upper 50 m . . . . .	10
1.3.2. Dissolved organic carbon stocks (0–50 m) . . . . .	12
1.4. Dissolved organic carbon surface distribution . . . . .	12
1.5. Chromophoric dissolved organic matter . . . . .	15
1.6. Carbon export to depth . . . . .	16
1.6.1. Winter mixing. . . . .	16
1.6.2. Deep-water formation . . . . .	17
1.6.3. Particulate organic carbon export . . . . .	19
1.7. Dissolved organic carbon stocks and fluxes. . . . .	20
1.8. Main remarks and future directions. . . . .	22
1.9. Acknowledgements . . . . .	24
1.10. References. . . . .	24

<b>Chapter 2. Dynamics and Export of Particulate Organic Carbon (POC)</b> . . . . .	31
Beat GASSER, Scott W. FOWLER and Juan-Carlos MIQUEL	
2.1. Historical developments of POC flux studies . . . . .	31
2.2. POC in the Ligurian Sea . . . . .	35
2.2.1. Carbon biogeochemistry . . . . .	35
2.2.2. Export flux, key contributors and processes . . . . .	42
2.2.3. Modeling POC dynamics . . . . .	52
2.3. Present status of POC flux and dynamics in the Ligurian Sea . . . . .	54
2.4. References . . . . .	57
<b>Chapter 3. Zooplankton I. Micro- and Mesozooplankton</b> . . . . .	67
John DOLAN and Virginie RAYBAUD	
3.1. Introduction . . . . .	67
3.1.1. Defining plankton and the different categories of plankton . . . . .	67
3.1.2. Problems with the label zooplankton . . . . .	71
3.2. Ligurian zooplankton . . . . .	73
3.2.1. Introduction to microzooplankton and mesozooplankton . . . . .	73
3.2.2. Sampling . . . . .	75
3.3. The ciliate <i>Strombidium sulcatum</i> and the microzooplankton of the Ligurian Sea . . . . .	78
3.3.1. <i>Strombidium sulcatum</i> . . . . .	78
3.3.2. Characteristics of the Ligurian Sea assemblages of ciliates . . . . .	80
3.3.3. Seasonal cycles of abundance of ciliates in coastal water . . . . .	82
3.3.4. Near-shore to off-shore abundance gradient of ciliates . . . . .	83
3.3.5. Seasonal variability in abundance of ciliates in off-shore waters and the depth gradient . . . . .	84
3.3.6. Non-ciliate components of the microzooplankton of the Ligurian Sea . . . . .	86
3.4. The mesozooplankton of the Ligurian Sea and the copepod <i>Centropages typicus</i> as a case study . . . . .	89
3.4.1. Presentation of mesozooplankton and ecological role . . . . .	89
3.4.2. Characteristics of the Ligurian Sea assemblages of crustacean zooplankton . . . . .	91
3.4.3. <i>Centropages typicus</i> , a dominant copepod species in the Ligurian Sea . . . . .	95
3.5. References . . . . .	99

<b>Chapter 4. Zooplankton II. Macroplankton and Long-Term Series</b> . . . . .	109
Paul NIVAL, Fabien LOMBARD, Janine CUZIN, Jacqueline GOY and Lars STEMMANN	
4.1. Macroplankton: the large planktonic animals . . . . .	109
4.1.1. Overview of the size class . . . . .	109
4.1.2. Mollusks (Gastropoda) . . . . .	110
4.1.3. Annelids . . . . .	112
4.1.4. Chaetognaths . . . . .	113
4.1.5. Planktonic prochordates – tunicates . . . . .	114
4.1.6. Cnidarians . . . . .	119
4.1.7. Ctenophores . . . . .	124
4.2. Micronekton . . . . .	126
4.2.1. Euphausiids . . . . .	126
4.2.2. Other micronekton species . . . . .	129
4.3. Zooplankton long-term series . . . . .	131
4.3.1. Introduction . . . . .	131
4.3.2. Zooplankton temporal trends in the Bay of Villefranche-sur-Mer as an indicator of Ligurian Sea dynamics . . . . .	132
4.3.3. From local variability in plankton to global understanding and plankton community forecasts . . . . .	136
4.4. References . . . . .	136
<b>Chapter 5. Climate Change Effects on the Ligurian Sea Pelagic Ecosystem. What About Top Pelagic Predators?</b> . . . . .	147
Maurizio WÜRTZ and Jean-Marc FROMENTIN	
5.1. Introduction . . . . .	147
5.2. Top pelagic predators in the Ligurian Sea. What about species and what we know about their responses to local climate change? . . . . .	148
5.2.1. Squids . . . . .	149
5.2.2. Bony fishes . . . . .	152
5.2.3. Sharks and rays . . . . .	159
5.2.4. Sea turtles . . . . .	161
5.2.5. Marine mammals . . . . .	162
5.3. Conclusion . . . . .	164
5.4. Acknowledgments . . . . .	165
5.5. References . . . . .	166

<b>Chapter 6. A Biogeochemical Approach to Contamination of the Ligurian Sea</b> . . . . .	175
Daniel COSSA, Scott W. FOWLER, Christophe MIGON, Lars-Éric HEIMBÜRGER-BOAVIDA and Aurélie DUFOUR	
6.1. Introduction. . . . .	175
6.2. Trace metal contamination . . . . .	177
6.2.1. Impact of atmospheric deposition . . . . .	177
6.2.2. Mercury . . . . .	179
6.2.3. Tributyltin (TBT) . . . . .	184
6.3. Radionuclides fluxes . . . . .	185
6.4. Organic chemical contaminants . . . . .	189
6.5. Contamination of the LS in the context of the global change . . . . .	193
6.6. Acknowledgments . . . . .	198
6.7. References . . . . .	199
<b>Conclusion and Perspectives</b> . . . . .	207
<b>Acronyms</b> . . . . .	221
<b>Glossary</b> . . . . .	225
<b>List of Authors</b> . . . . .	243
<b>Index</b> . . . . .	245
<b>Summary of Volume 1</b> . . . . .	247
