| <b>Foreword</b> . . . . .  | xi   |
| <b>Acknowledgements</b> . . . . .  | xiii |
| <b>Preface</b> . . . . .   | xv   |
| <b>Introduction</b> . . . . .  | xix  |
| <b>Part 1. Smart Apparel, Smart Patches and Biosensors</b> . . . . .                 | 1    |
| <b>Chapter 1. Smart Apparel, Smart Patches and the Related Constraints</b> . . . . . | 3    |
| 1.1. Reminders and definitions . . . . .   | 3    |
| 1.1.1. Main families of textiles . . . . .   | 3    |
| 1.1.2. Apparel . . . . .   | 11   |
| 1.2. The smart textile market from a consumer's point of view . . . . .              | 14   |
| 1.2.1. Purchase levers . . . . .   | 14   |
| 1.2.2. Barriers to the purchase of smart apparel . . . . .                           | 14   |
| 1.2.3. Solutions to instill confidence . . . . .                                     | 16   |
| 1.2.4. The hype curve for innovations. . . . .                                       | 16   |

---

|   |           |
|---|-----------|
| 1.3. Constraints surrounding an SA project . . . . .                            | 20        |
| 1.3.1. Financial and marketing aspects . . . . .                                | 20        |
| 1.3.2. Ergonomic aspects . . . . .  | 21        |
| 1.3.3. Technical aspects . . . . .  | 22        |
| 1.3.4. Energy-related aspects . . . . .   | 23        |
| 1.3.5. Industrial aspects . . . . .   | 23        |
| 1.3.6. Regulatory aspects and recommendations . . . . .                         | 24        |
| 1.3.7. Normative aspects . . . . .  | 42        |
| 1.3.8. Applicative aspects . . . . .  | 45        |
| <br>  |           |
| <b>Chapter 2. Biosensors and Graphene Technology . . . . .</b>                  | <b>53</b> |
| 2.1. Introduction to sensors in smart apparel . . . . .                         | 54        |
| 2.1.1. Sensors frequently used in smart apparel . . . . .                       | 56        |
| 2.2. Sensors of “non-biological” physical properties . . . . .                  | 61        |
| 2.2.1. Types of detectors used in these sensors . . . . .                       | 62        |
| 2.2.2. Examples of sensors . . . . .  | 62        |
| 2.3. Graphene . . . . .   | 66        |
| 2.3.1. Carbon . . . . .   | 66        |
| 2.3.2. Graphite . . . . .   | 66        |
| 2.3.3. Graphene . . . . .   | 67        |
| 2.3.4. Properties of graphene . . . . .   | 69        |
| 2.3.5. The usefulness of graphene in smart apparel . . . . .                    | 72        |
| 2.4. Graphene and its secrets . . . . .   | 73        |
| 2.4.1. Obtaining graphene . . . . .   | 74        |
| 2.4.2. Graphene producers and suppliers . . . . .                               | 83        |
| 2.4.3. Market price . . . . .   | 86        |
| 2.4.4. Research around graphene . . . . .                                       | 87        |
| 2.4.5. Patents and intellectual property . . . . .                              | 92        |
| 2.5. “Bio” sensors . . . . .  | 94        |
| 2.5.1. “Physical” sensors connected to bio materials, without analyte . . . . . | 94        |
| 2.5.2. “Bio” sensors (biosensors), with analyte . . . . .                       | 96        |
| 2.6. Applications of graphene in smart apparel . . . . .                        | 112       |
| 2.6.1. Biosensors and patches . . . . .   | 112       |
| 2.6.2. Multisensors: multibiosensor patches . . . . .                           | 124       |
| 2.6.3. Beyond sensors and beyond “bio” . . . . .                                | 125       |
| 2.7. Conclusions on graphene in smart apparel . . . . .                         | 129       |
| 2.7.1. Benefits to the applicative constraints of smart apparel . . . . .       | 129       |
| 2.7.2. Graphene-based biosensors in smart apparel . . . . .                     | 135       |
| 2.7.3. Critical points that must be examined at the very outset . . . . .       | 136       |

---

|   |     |
|---|-----|
| <b>Part 2. Biocontroller</b> . . . . .  | 137 |
| <b>Chapter 3. Bioprocessors</b> . . . . .   | 139 |
| 3.1. Overall structure: “AFE (Analog Front-End) + CPU (Central Processing Unit)” . . . . .                        | 140 |
| 3.1.1. “All-in-two” . . . . .   | 141 |
| 3.1.2. “All-in-one” . . . . .   | 141 |
| 3.2. The AFE . . . . .  | 142 |
| 3.2.1. Functions of an AFE . . . . .  | 142 |
| 3.2.2. The numerous possible types of AFE . . . . .   | 142 |
| 3.3. The CPU . . . . .  | 158 |
| 3.3.1. Signal processing . . . . .  | 158 |
| <b>Chapter 4. Power to the Patch</b> . . . . .  | 167 |
| 4.1. Problems surrounding power supply to a patch. . . . .  | 167 |
| 4.1.1. Choice of means of energy supply to a patch . . . . .  | 167 |
| 4.1.2. Estimating a patch’s energy balance. . . . .   | 168 |
| 4.1.3. Choice of battery, supercapacitor and energy harvesting. . . . .   | 172 |
| 4.2. Energy harvesting . . . . .  | 175 |
| 4.2.1. General . . . . .  | 176 |
| 4.2.2. Existing technologies for smart apparel. . . . .   | 187 |
| 4.3. Example of energy harvesting for smart apparel . . . . .   | 189 |
| 4.3.1. Energy harvesting via an HF (high-frequency) NFC link . . . . .  | 189 |
| 4.3.2. Examples of NFC patches with energy harvesting . . . . .   | 196 |
| <b>Chapter 5. OBC (Out-of-Body Communications) and IBC (Intra-Body Communications) in Smart Apparel</b> . . . . . | 199 |
| 5.1. Communications in smart apparel . . . . .  | 200 |
| 5.1.1. OBC. . . . .   | 200 |
| 5.1.2. IBC . . . . .  | 201 |
| 5.1.3. Possible means of communication for patches. . . . .   | 202 |
| 5.2. Connectivity and viability of OBC in smart apparel. . . . .  | 204 |
| 5.2.1. Viability of OBC connection in smart apparel. . . . .  | 204 |
| 5.3. From the RF-connected world to OBC in smart apparel . . . . .  | 207 |
| 5.3.1. The absolute fundamentals of RF . . . . .  | 208 |
| 5.3.2. Long- or short-range RF connectivity in smart apparel. . . . .   | 209 |

---

|   |     |
|---|-----|
| 5.3.3. Short range (SR) . . . . .   | 211 |
| 5.3.4. Medium Range (MR) . . . . .  | 213 |
| 5.3.5. Medium Range Wide Band (MRWB) (around 100 meters) . . . . .  | 213 |
| 5.3.6. Long Range (LR) and Far-Field . . . . .  | 214 |
| 5.4. Architecture of connected smart apparel chains . . . . .   | 215 |
| 5.4.1. Technological description of the chain . . . . .   | 216 |
| 5.4.2. Big Data . . . . .   | 221 |
| 5.4.3. The numerous protocols used. . . . .   | 222 |
| 5.5. OBC and IBC patch networks in smart apparel. . . . .   | 222 |
| 5.5.1. The numerous terms in the x AN (x Area Network) family . . . . .                                     | 223 |
| 5.5.2. RF x PAN (x Personal Area Network) . . . . .   | 225 |
| 5.5.3. From the WPAN (Wireless Personal Area Network) to the<br>WBAN (Wireless Body Area Network) . . . . . | 227 |
| 5.5.4. PAN and the IEEE 802.15 family . . . . .   | 227 |
| 5.6. BAN . . . . .  | 228 |
| 5.6.1. Definition of a BAN – IEEE 802.15.6. . . . .   | 228 |
| 5.6.2. History of BANs . . . . .  | 229 |
| 5.6.3. BANs in smart apparel. . . . .   | 231 |
| 5.6.4. Physical layer of a BAN. . . . .   | 236 |
| 5.6.5. MAC (Medium Access Control) layer . . . . .  | 240 |
| 5.6.6. Fields of application for BANs. . . . .  | 241 |
| 5.6.7. Main challenges in the design of BAN patches . . . . .   | 244 |
| 5.7. IBC. . . . .   | 245 |
| 5.7.1. From the BAN to IBC . . . . .  | 245 |
| 5.7.2. Genesis of IBC . . . . .   | 247 |
| 5.7.3. The major principles of IBC . . . . .  | 252 |
| 5.8. Capacitive IBC system . . . . .  | 265 |
| 5.8.1. Communication between two network elements . . . . .   | 265 |
| 5.8.2. IBC and bodily non-radiation. . . . .  | 269 |
| 5.8.3. Fundamental concept of IBC . . . . .   | 272 |
| 5.9. Modeling of an IBC system . . . . .  | 273 |
| 5.9.1. Model of an IBC system and channel analysis. . . . .   | 274 |
| 5.9.2. Modeling of human-body communication channels . . . . .  | 274 |
| 5.9.3. Electrical model of the medium . . . . .   | 278 |
| 5.9.4. Electrical model of the channel. . . . .   | 280 |
| 5.10. Simulations . . . . .   | 283 |
| 5.11. Examples of smart apparel solutions using IBC. . . . .  | 284 |
| 5.11.1. Example 1: for beginners . . . . .  | 284 |
| 5.11.2. Example 2: for the initiated . . . . .  | 290 |

|  |     |
|--|-----|
| <b>Conclusion: Concrete Implementation of a Solution</b> . . . . . | 295 |
| <b>Epilogue</b> . . . . .  | 315 |
| <b>Glossary</b> . . . . .  | 317 |
| <b>Authors</b> . . . . .   | 319 |
| <b>References</b> . . . . .  | 321 |
