Foreword	xiii
Julien HUSSON	
Introduction	xvii
Sarah GARIDI and Jihane SEBAI	
Part 1. The Search for Systemic Change Through Health Partnerships	1
Introduction to Part 1	3
Chapter 1. Top-Down and Bottom-Up Approaches to Health Pathways Through Population Responsibility	7
Valérie GUICHARD and Antoine MALONE	
1.1. Introduction	7
1.2. Context	9
1.2.1. The clinical integration model based on population responsibility (PR)	9
1.2.2. Creating local hospitals.	10
1.3. Materials and methods	12
1.3.1. Exploratory case study on a living area	12
1.3.2. Observation framework	12
1.4. Combining top-down and bottom-up approaches: institutional work in action.	16
1.4.1. Conceptual work	16
1.4.2. Operational work	17
1.4.3. Structural work	19
1.4.4. Relational work	20
1.4.5. Changes and actions implemented in the local area	22

1.5. Discussion and conclusion	23
1.6. References	24
Chapter 2. Organizational Challenges of Adopting a Recovery-Oriented Philosophy in Mental Healthcare	27
Francesca BOSISIO, Eliane BOVITUTTI, Cécile FRANK PRAD and Carla GUGLIELMETTI	
2.1. The “recovery” philosophy in mental health	27
2.1.1. The Mental Healthcare Center of the Fondation de l’Orme	28
2.2. Results	31
2.2.1. Recovery and emergent change in theory...	31
2.2.2. ...and in practice	33
2.3. Discussion and challenges	34
2.3.1. Emergent change and regulatory framework	35
2.3.2. Challenges for a psychologically safe work environment	36
2.4. Conclusion	38
2.5. References	38
Chapter 3. The Luxembourg Red Cross Works Towards a Partnership in Health.	41
Joachim RENOUPREZ, Julien MACCIONI and Cécile RUMEAU	
3.1. Introduction	41
3.2. The need for an integrated approach to health.	43
3.2.1. Towards a holistic view: the impact of health determinants.	43
3.2.2. A broad view of health	45
3.2.3. The 2030 health strategy of the Luxembourg Red Cross: a cross-sectoral vision	46
3.3. The importance of a collaborative dynamic	49
3.3.1. From concept to implementation: what steps can be taken to establish partnerships in healthcare?	50
3.3.2. Enhancing staff skills: a prerequisite for creating an environment that foster partnerships	50
3.3.3. Initiatives that encourage the Luxembourg Red Cross to seek partnerships	52
3.4. Conclusion	56
3.5. References	58
Chapter 4. Collaboration in the Care Pathway: Building Mutual Trust Between Patients and Professionals.	61
Sandrine VIRGILI and Frédéric BORNAREL	
4.1. Introduction	61

4.2. Trust in care: developments, barriers and contributions	62
4.2.1. Trust in the patient–healthcare professional relationship: a multidisciplinary but limited interpretation of trust	62
4.2.2. Theorizing trust in management science: definitions and typologies. . . .	65
4.3. From developing trust to reflective trust: the contribution of management sciences	66
4.3.1. Managing trust: key conditions for building and developing trust within the team	67
4.3.2. Genuine and effective trust: reflective trust.	69
4.3.3. Discussion: How can this be applied to the patient partner?	71
4.4. Conclusion	72
4.5. References	72
Chapter 5. Feedback: From Partnership to the Art of Patient Partner Care.	75
Luigi FLORA	
5.1. Introduction and background	75
5.2. The patient partner approach or “Montreal model”.	76
5.3. The art of patient partner care as a benchmark for scalability	77
5.4. A new form of organization for an emerging paradigm in France.	78
5.5. The art of partnership-based care with patients and the public: What is its purpose?	79
5.6. Methodologies for engaging patient partners in their care and in the public interest	81
5.7. Conclusion	82
5.8. References	83
Chapter 6. Transforming Lived Experience into Legitimate Expertise: The Patients’ University and the Institutionalization of the Health Partnership	85
Lennize PEREIRA PAULO and Catherine TOURETTE-TURGIS	
6.1. Introduction	85
6.2. The Patients’ University: the origin of an innovation in the academic world	86
6.3. Graduation: an example of an engagement model combining rights and participation	87
6.4. Degree programs and master classes in response to the rise of “patient engagement” policies	88
6.4.1. A commitment to the continuing education of patient- and caregiver-partners	89
6.4.2. Supporting the needs of patient-partners in practice: the practice analysis groups – patient expertise (GAP-ExP)	90

6.5. The Patients' University as a hub for innovative projects	91
6.6. Conclusion	94
6.7. References	94
Part 2. Typologies of Transformative Healthcare Partnerships by Professionals	97
Introduction to Part 2	99
Chapter 7. From Systems Theory to Change Management in Healthcare	103
Marc BERNA and Michelle THILL	
7.1. Introduction	103
7.2. Systems theory	104
7.3. Healthcare systems	105
7.4. Implementation of interventions in a healthcare system	105
7.5. Stakeholder involvement in the change process.	107
7.6. Implementation of medical innovations: barriers and drivers	108
7.7. Participatory action research as a partnership between researchers and participants	110
7.8. Systems analysis of change management: the case of a diabetic retinopathy screening program.	111
7.9. Methodology	113
7.9.1. Selection of the patient sample	113
7.9.2. Data collection	114
7.9.3. Analysis of results	114
7.9.4. Ethical and regulatory considerations	115
7.10. Results.	115
7.10.1. Implementation of the Fast-DR screening program at SNOS	115
7.10.2. Identification of stakeholders.	115
7.10.3. Patient characteristics	116
7.10.4. Identification of barriers and facilitators.	117
7.10.5. Status after the first cycle of AR and overview	118
7.11. Limitations of this case study and contributions to research	119
7.12. Conclusion	120
7.13. References	121
Chapter 8. The Benefits of a Partnership Approach to Improving Healthcare Quality.	125
Laure ISTAS and Mathieu LOUISET	
8.1. Introduction to the continuous improvement in healthcare quality	125

8.2. Added value of co-creation with patients	126
8.2.1. Individual participation in one's own care	128
8.2.2. Improving processes with patients.	129
8.2.3. Co-creation of quality and safety policies	130
8.2.4. Training with patient partners	130
8.3. Added value of co-creation with professionals	131
8.3.1. Developing coalitions	131
8.3.2. Quality of life at work	133
8.3.3. An importance shared between staff and patients	134
8.4. Conclusion: safe, reliable and effective care in a learning system.	135
8.5. Acknowledgements	136
8.6. References	136

Chapter 9. The Challenge of Interprofessional Partnerships in Pediatric Emergency Care 139

Nadine KULINNA, Fränk NELISSEN and Jean-Marc CLOOS

9.1. Introduction	139
9.2. Theoretical framework	139
9.2.1. Interprofessional collaboration and collective intelligence	139
9.2.2. Collaborative project management and the agile approach	140
9.3. Description of the issue	141
9.3.1. Needs assessment	142
9.3.2. Political reactions, public reactions and patient complaints.	142
9.3.3. Summary of the issues and possible solutions	144
9.4. Project implementation	145
9.5. External communication	146
9.5.1. Monitoring and assessment of implementation.	147
9.5.2. Lessons learned from interdisciplinary collaboration	148
9.5.3. Role of collective intelligence	149
9.6. Results and discussion.	149
9.7. Conclusion and outlook	152
9.8. References	153

Chapter 10. The Challenge of Multiple Partnerships: The Case of a Research Project to Optimize Care Pathways 155

Jean-Baptiste GARTNER, Marie-Pierre GAGNON and André CÔTÉ

10.1. Introduction	155
10.2. Conceptual framework.	156
10.3. Empirical part.	157
10.3.1. Perceptions of issues by actor categories	159
10.3.2. Expectations regarding project benefits	163

10.3.3. The challenges of multiple partnerships in projects to optimize care pathways.	167
10.4. Discussion and conclusion.	171
10.5. References	173
Chapter 11. Testimonial: The Patient Experience, Without Hesitation.	177
So YUNG STRAGA	
11.1. Introduction.	177
11.2. Professionals: putting an end to empathy	178
11.3. Consequences of working in the healthcare sector on professional practice	180
11.4. Team atmosphere.	182
11.5. Patients: putting an end to empowerment	183
11.6. Patient perspective	184
11.7. Patient representation	186
11.8. Conclusion	187
11.9. References	188
Chapter 12. Testimonial: Different Views on the Integration of Accompanying Patients in Oncology	189
Marie MARON and Marie-Pascale POMEY	
12.1. Introduction	189
12.2. PAROLE-Onco.	190
12.2.1. Co-creation of the program	190
12.2.2. Convincing results.	190
12.2.3. Program deployment	193
12.3. PAROLE-Onco in France	193
12.3.1. Regional health agency project.	193
12.3.2. Project led by Unicancer	194
12.3.3. Research project	194
12.4. PAROLE-Onco in Belgium	195
12.4.1. Presentation of the institution.	195
12.4.2. Project implementation	195
12.4.3. Implementation of support	196
12.4.4. Results	197
12.4.5. Reflections on the experience	198
12.5. Conclusion	200
12.6. References	201

Conclusion	203
