|--|----|
| <b>Preface</b> . . . . .   | xi |
| François PINET, Mireille BATTON-HUBERT and Eric DESJARDIN  |    |
| <br>   |    |
| <b>Chapter 1. Implementation and Computation of Fuzzy Geographic Objects in Agriculture</b> . . . . .          | 1  |
| Mireille BATTON-HUBERT, François PINET and André MIRALLES  |    |
| 1.1. Fuzzy geographic objects. . . . .   | 1  |
| 1.2. Evaluation of the deposit on crops: formalizing fuzzy data. . . . .                                       | 5  |
| 1.3. From the formalization of the problem to the presentation of the objects and their manipulation . . . . . | 6  |
| 1.3.1. Materials and methods. . . . .  | 7  |
| 1.3.2. Elements for the construction of manipulated fuzzy objects and their associated quantities . . . . .    | 12 |
| 1.4. Implementation and storage of fuzzy objects in a relational database. . . . .                             | 16 |
| 1.5. Some examples of calculations on fuzzy objects. . . . .   | 18 |
| 1.5.1. Intersection between fuzzy areas. . . . .   | 18 |
| 1.5.2. Amount of product associated with an $\alpha$ -cut of a treatment area . . . . .                        | 19 |
| 1.5.3. Calculating the fuzzy surface of a fuzzy space object . . . . .   | 19 |
| 1.5.4. Calculation for an $\alpha$ -cut of its possible product quantity using its area . . . . .              | 20 |
| 1.5.5. Going further . . . . .   | 22 |
| 1.6. Conclusion . . . . .  | 23 |
| 1.7. References . . . . .  | 24 |

|  |    |
|--|----|
| <b>Chapter 2. Representation and Analysis of the Evolution of Agricultural Territories by a Spatio-temporal Graph</b> . . . . .            | 25 |
| Aurélie LEBORGNE, Ezriel STEINBERG, Florence LE BER and Stella MARC-ZWECKER  |    |
| 2.1. The data: the land parcel identification system . . . . .   | 25 |
| 2.2. The model: a fuzzy spatiotemporal graph . . . . .   | 27 |
| 2.2.1. Graph structure . . . . .   | 27 |
| 2.2.2. Spatial relationships . . . . .   | 28 |
| 2.2.3. Spatiotemporal relationships . . . . .  | 30 |
| 2.2.4. Relationships of filiation. . . . .   | 30 |
| 2.3. The method: searching for frequent patterns . . . . .   | 31 |
| 2.3.1. Overview. . . . .   | 31 |
| 2.3.2. Methods for subgraph mining . . . . .   | 32 |
| 2.4. Characterizing agricultural regions by spatial-temporal patterns . . . . .  | 32 |
| 2.4.1. Data from Gers . . . . .  | 34 |
| 2.4.2. Data from Bas-Rhin . . . . .  | 35 |
| 2.4.3. Data from Eure-et-Loir . . . . .  | 36 |
| 2.4.4. Data from the Somme . . . . .   | 36 |
| 2.5. Conclusion and outlook. . . . .   | 38 |
| 2.6. References . . . . .  | 39 |
| <br>   |    |
| <b>Chapter 3. Agricultural Areas in the Face of Public Environmental Policies: Spatiotemporal Analyses Using Sensitive Data.</b> . . . . . | 41 |
| Jean-Michel FOLLIN, Nathalie THOMMERET and Marie FOURNIER  |    |
| 3.1. Project context and issues . . . . .  | 42 |
| 3.2. What are the methods for anonymization? . . . . .   | 44 |
| 3.2.1. For the attributes . . . . .  | 44 |
| 3.2.2. For localization . . . . .  | 44 |
| 3.3. Data presentation: data in an agricultural context . . . . .  | 45 |
| 3.4. Treatments at the farm level: spatial structure versus AECM measures . . . . .  | 50 |
| 3.4.1. Determining the virtual seats . . . . .   | 50 |
| 3.4.2. Structure analysis: the indicators used. . . . .  | 51 |
| 3.4.3. Analysis of AECM intensity . . . . .  | 53 |
| 3.4.4. Introduction of uncertainty at the level of the location by squaring . . . . .  | 54 |

|  |    |
|--|----|
| 3.5. Treatments at plot level: typology of land changes . . . . .                  | 57 |
| 3.5.1. Construction of a multi-date database . . . . .                             | 57 |
| 3.5.2. Classification . . . . .  | 59 |
| 3.5.3. Measurement of uncertainty based on class homogeneity percentages . . . . . | 61 |
| 3.6. Conclusion and perspectives. . . . .  | 64 |
| 3.7. Acknowledgments. . . . .  | 64 |
| 3.8. References . . . . .  | 65 |

**Chapter 4. The Representation of Uncertainty Applied to Natural Risk Management . . . . . 67**

Jean-François GIRRES

|  |    |
|--|----|
| 4.1. Introduction. . . . .   | 67 |
| 4.2. Natural hazards: uncertain phenomena. . . . .                                     | 68 |
| 4.2.1. Risk, hazard and exposure. . . . .  | 68 |
| 4.2.2. Spatial and temporal uncertainty of natural hazards . . . . .                   | 70 |
| 4.2.3. Sources of uncertainty in natural hazard modeling . . . . .                     | 71 |
| 4.3. Spatial representation of uncertainty: methods and interpretation. . . . .        | 73 |
| 4.3.1. Representation of uncertain spatial objects. . . . .                            | 74 |
| 4.3.2. Visual variables for representing uncertainty . . . . .                         | 75 |
| 4.3.3. Representation of uncertainty and decision-making . . . . .                     | 77 |
| 4.4. Analysis of uncertainty in natural hazard prevention maps. . . . .                | 78 |
| 4.4.1. Risk prevention plans . . . . .   | 78 |
| 4.4.2. Modeling of hazard zones in risk prevention plans . . . . .                     | 80 |
| 4.4.3. Methodology for analyzing the representation of uncertainty. . . . .            | 81 |
| 4.4.4. Results and comments . . . . .  | 82 |
| 4.5. Representation of uncertainty in risk maps: assessment and perspectives . . . . . | 86 |
| 4.5.1. How uncertain are risk prevention plans?. . . . .                               | 86 |
| 4.5.2. Contributions to the spatial representation of uncertainty . . . . .            | 88 |
| 4.6. Conclusion . . . . .  | 90 |
| 4.7. References . . . . .  | 91 |

**Chapter 5. Incorporating Uncertainty Into Victim Location Processes in the Mountains: A Methodological, Software and Cognitive Approach . . . . . 95**

Matthieu VIRY, Mattia BUNEL, Marlène VILLANOVA, Ana-Maria OLTEANU-RAIMOND, Cécile DUCHÊNE and Paule-Annick DAVOINE

|  |    |
|--|----|
| 5.1. Introduction. . . . .             | 95 |
| 5.2. Sources of imperfection . . . . . | 98 |

|   |     |
|---|-----|
| 5.2.1. Imprecision in location expression associated with a clue . . . . .                      | 99  |
| 5.2.2. Uncertainty in location expression associated with a clue . . . . .                      | 100 |
| 5.2.3. Incompleteness of geographical data . . . . .  | 101 |
| 5.3. Detecting uncertainty and imprecision in the interface . . . . .                           | 101 |
| 5.3.1. Formalization of an alert according to the ontologies<br>of the CHOUCAS project. . . . . | 102 |
| 5.3.2. Specific acquisition components . . . . .  | 104 |
| 5.4. Taking imperfection in spatialization into account. . . . .                                | 107 |
| 5.4.1. Relationship between CLZ and PLZ and the construction<br>of the PLZ . . . . .            | 107 |
| 5.4.2. The process of creating CLZs. . . . .  | 108 |
| 5.4.3. Taking imprecision into account . . . . .  | 109 |
| 5.4.4. Taking uncertainty and incompleteness into account . . . . .                             | 111 |
| 5.5. Restoring uncertainty in the interface . . . . .   | 112 |
| 5.5.1. “Classic” solution. . . . .  | 112 |
| 5.5.2. Solution based on figures of varying sizes . . . . .                                     | 114 |
| 5.5.3. Solution by combining representations . . . . .  | 116 |
| 5.5.4. Illustration of the Grand Veymont Alert . . . . .  | 118 |
| 5.6. Conclusion and perspectives. . . . .   | 122 |
| 5.7. References . . . . .   | 123 |

## **Chapter 6. Uncertainties Related to Real Estate**

|  |     |
|--|-----|
| <b>Price Estimation Scales</b> . . . . .   | 127 |
| Didier JOSSELINE, Delphine BLANKE, Mathieu COULON, Guilhem BOULAY,<br>Laure CASANOVA ENAULT, Antoine PERIS, Pierre LE BRUN and<br>Thibault LECOURT |     |
| 6.1. Introduction. . . . .   | 127 |
| 6.2. The effect of spatial support in real estate price estimation. . . . .  | 129 |
| 6.2.1. The generation of uncertainty in the choice of aggregation<br>scales . . . . .  | 129 |
| 6.2.2. Real estate price representation scales rarely questioned. . . . .  | 131 |
| 6.2.3. Different scales of real estate price structuring . . . . .   | 133 |
| 6.3. Data and indicators for estimating the sensitivity of house prices<br>to the scale of aggregation. . . . .                                    | 135 |
| 6.3.1. Different territorial grids to test the effects of aggregation . . . . .  | 135 |
| 6.3.2. A national database of geolocalized real estate transactions<br>in France: DVF . . . . .  | 140 |
| 6.3.3. Representation of aggregated statistics in the form<br>of scalograms . . . . .  | 143 |

|   |     |
|---|-----|
| 6.4. Methodology for studying variations in real estate price estimates according to scale . . . . .  | 144 |
| 6.4.1. Preliminary methodological considerations . . . . .  | 144 |
| 6.4.2. A random sample generator to eliminate scale uncertainty . . . . .   | 145 |
| 6.4.3. Presentation of analysis elements in the form of a composite graph . . . . .   | 147 |
| 6.5. Results: highlighting structural effects linked to territorial units and scale salience. . . . .   | 148 |
| 6.5.1. An analysis of changes in estimates of average and median prices for apartments and houses in the Provence Alpes Côte d'Azur region from 2014 to 2020 . . . . .      | 148 |
| 6.5.2. Analysis of changes in standard deviation estimates of average prices for apartments and houses in the Provence Alpes Côte d'Azur region from 2014 to 2020 . . . . . | 151 |
| 6.5.3. Cross-sectional analysis on composite graphs . . . . .   | 155 |
| 6.6. Conclusion and discussion . . . . .  | 157 |
| 6.7. References . . . . .   | 160 |

**Chapter 7. Representing Urban Space for the Visually Impaired . . . . .** 165

Lisa DENIS, Jérémy KALSRON and Jean-Marie FAVREAU

|   |     |
|---|-----|
| 7.1. Introduction. . . . .  | 165 |
| 7.2. Landmarks as tools for moving around and finding your location . . . . . | 166 |
| 7.2.1. Gathering needs and uses . . . . .                                     | 167 |
| 7.2.2. Modeling landmarks and their uses . . . . .                            | 169 |
| 7.2.3. Model expressiveness . . . . .   | 175 |
| 7.3. Integration of landmarks in tactile and multimodal maps . . . . .        | 177 |
| 7.3.1. Background map . . . . .   | 177 |
| 7.3.2. Integration of landmarks. . . . .                                      | 180 |
| 7.4. Integrating uncertainty into text descriptions . . . . .                 | 183 |
| 7.4.1. Integrating the probability of detecting landmarks . . . . .           | 183 |
| 7.4.2. Integrating blurred distances and angles . . . . .                     | 184 |
| 7.5. Conclusion and perspectives. . . . .                                     | 186 |
| 7.6. Acknowledgments. . . . .   | 187 |
| 7.7. References . . . . .   | 187 |

**List of Authors . . . . .** 189

**Index . . . . .** 193
