| Chapter 1. Management of Spent Fuels | 1 |
| Jacques CANTARELLA, Cécile EVANS, Pierre KUNSCH, Didier LÉONARD and Jean-Paul MINON | |
| 1.1. Spent fuel management strategies and costs. | 1 |
| 1.1.1. The different options of the cycle | 2 |
| 1.1.2. Characteristics of the cycle options | 8 |
| 1.1.3. Economic evaluations | 10 |
| 1.1.4. Deep storage as a preferred solution | 14 |
| 1.2. Costs and methods of financing radioactive waste management. | 15 |
| 1.2.1. Introduction | 15 |
| 1.2.2. Analysis of the costs related to the long-term management of radioactive waste | 17 |
| 1.2.3. Financing the long-term management of radioactive waste | 42 |
| 1.2.4. Conclusion on the costs and financing of waste storage | 63 |
| 1.3. References | 64 |
| | |
| Chapter 2. Nuclear Power in the European Electricity Market | 67 |
| Jacques PERCEBOIS and Boris SOLIER | |
| 2.1. The functionality of the wholesale electricity market | 69 |
| 2.2. The price set by the merit order of marginal costs | 71 |
| 2.3. Nuclear power and the wholesale price of electricity | 75 |
| 2.4. The need for a capacity market | 82 |
| 2.5. The carbon market and spot market in Europe | 84 |
| 2.6. Accounting for the system costs in the merit order | 87 |

| | |
|--|------------|
| 2.6.1. Crowd-out cost of controllable power plants | 88 |
| 2.6.2. Back-up of non-controllable power plants | 90 |
| 2.6.3. Rates based on costs | 94 |
| 2.7. The case of nuclear power and the ARENH mechanism, a hindrance to the market | 95 |
| 2.7.1. The ARENH, a “canal lock” for removing rents. | 95 |
| 2.7.2. ARENH reform projects | 103 |
| 2.8. Conclusion | 113 |
| 2.9. References | 114 |
| | |
| Chapter 3. The Industrial Challenges of Nuclear Power. | 117 |
| Xavier URSAT | |
| 3.1. Nuclear power, part of the energy transition | 118 |
| 3.1.1. Nuclear power, the third largest industrial sector in France | 118 |
| 3.1.2. The EPR, a nuclear technology of the future | 120 |
| 3.1.3. NUWARD, the French project for SMRs. | 121 |
| 3.2. A sector committed to a dynamic of deep transformation. | 122 |
| 3.2.1. The restructuring of the nuclear sector since 2015 | 122 |
| 3.2.2. The unfavorable industrial context during the first days of the EPR | 125 |
| 3.2.3. The Excell plan: a return to excellence | 126 |
| 3.2.4. An effective dynamic. | 128 |
| 3.3. Giving visibility to the sector through a long-term energy strategy | 130 |
| 3.3.1. In France: ensuring supply capacity and guaranteeing carbon neutrality | 131 |
| 3.3.2. Designing an energy strategy covering all of Europe | 134 |
| 3.4. Conclusion | 135 |
| 3.5. References | 135 |
| | |
| Chapter 4. The Economic Costs of a Nuclear Accident | 137 |
| Ludivine PASCUCCI-CAHEN | |
| 4.1. Fields of economic analysis | 138 |
| 4.2. Uses of nuclear accident cost assessments. | 141 |
| 4.2.1. Optimization of post-accident management strategies | 141 |
| 4.2.2. Insurance mechanisms for covering a nuclear accident. | 142 |
| 4.2.3. Evaluation of investments for the safety of nuclear installations | 151 |
| 4.3. Methods for estimating the costs of a nuclear accident | 153 |
| 4.3.1. General considerations. | 153 |

| | |
|---|------------|
| 4.3.2. Costs at the accident site | 154 |
| 4.3.3. Off-site costs directly related to contamination | 159 |
| 4.3.4. Other off-site costs | 164 |
| 4.4. Application to the Fukushima nuclear accident. | 166 |
| 4.4.1. Synthesis | 166 |
| 4.4.2. Compensation for damages | 168 |
| 4.4.3. On-site cleaning and dismantling costs | 168 |
| 4.4.4. Costs to remediate the contamination | 169 |
| 4.4.5. Economic losses from agriculture and fishing | 169 |
| 4.4.6. Effects on industrial production | 170 |
| 4.4.7. Effects on tourism. | 170 |
| 4.4.8. Image effects on the agribusiness sector | 171 |
| 4.4.9. Image effects on tourism. | 172 |
| 4.4.10. Effects on the electricity generation system. | 172 |
| 4.4.11. Macroeconomic effects. | 173 |
| 4.5. Conclusion | 173 |
| 4.6. References | 174 |
| | |
| Chapter 5. Prospective Scenarios from the Present to 2050 | 179 |
| Patrick CRIQUI, Rodica LOISEL and Lionel LEMIALE | |
| 5.1. Global energy scenarios and the role of nuclear power | 179 |
| 5.1.1. A brief history of energy planning | 179 |
| 5.1.2. The “new generation” scenarios and the role of nuclear power | 188 |
| 5.2. Modeling nuclear power in the energy transition. | 195 |
| 5.2.1. Load monitoring in nuclear power plants | 197 |
| 5.2.2. Methodology. | 200 |
| 5.2.3. Technical and economic analysis of nuclear reactors in scenarios up to 2050 | 203 |
| 5.2.4. Sensitivity analysis | 205 |
| 5.2.5. Organizational, technical and technological perspectives | 212 |
| 5.2.6. Recommendations for the section | 215 |
| 5.3. The study “Energy Futures 2050” by RTE (2021) | 216 |
| 5.3.1. Purpose and scope of the study | 217 |
| 5.3.2. Consumption and production assumptions | 220 |
| 5.3.3. Economic analysis | 230 |
| 5.3.4. Comments in response to the RTE study | 233 |
| 5.4. Conclusion | 235 |
| 5.5. References | 237 |

| | |
|--|-----|
| Appendix. The Dismantling of Nuclear Facilities | 243 |
| Jacques PERCEBOIS and Nicolas THIOLLIÈRE | |
| List of Authors | 255 |
| Index | 257 |
| Summary of Volume 1 | 259 |
