<b>Preface</b> . . . . .	ix
<b>Introduction</b> . . . . .	xi
<b>Chapter 1. Determination of Physical Data</b> . . . . .	1
1.1. Introduction . . . . .	1
1.2. Estimating critical properties . . . . .	2
1.2.1. Estimating critical temperature . . . . .	2
1.2.2. Estimating critical pressure . . . . .	5
1.2.3. Estimating the critical volume: Benson correlation (Benson, 1948) . . . . .	8
1.2.4. Estimating the critical compressibility factor . . . . .	10
1.3. Methods for estimating boiling temperature . . . . .	11
1.4. Methods for estimating density . . . . .	14
1.4.1. Estimating liquid densities . . . . .	14
1.5. Methods for estimating viscosity . . . . .	15
1.5.1. Estimating viscosities of pure liquids . . . . .	15
1.5.2. Correlations for the viscosity of liquid mixtures. . . . .	17
1.5.3. Estimating gas viscosities . . . . .	18
1.6. Methods for estimating specific heat . . . . .	19
1.6.1. Heat capacities of petroleum oils. . . . .	19
1.6.2. Heat capacities of petroleum vapors . . . . .	20
1.6.3. Estimations for anthracite and bituminous coals. . . . .	20
1.6.4. Heat capacities for cement, mortar and sand . . . . .	21
1.6.5. Heat capacities of organic liquids . . . . .	21
1.7. Estimating latent heat of vaporization . . . . .	22
1.7.1. Rapid estimations . . . . .	22
1.7.2. Calculating latent heat from critical data . . . . .	23

---

1.7.3. Chen correlation . . . . .	23
1.7.4. Calculations at different temperatures. . . . .	24
1.8. Estimating expansion coefficients $\beta$ . . . . .	24
1.9. Methods for estimating heat conductivity . . . . .	25
1.9.1. Heat conductivity of metals and alloys . . . . .	25
1.9.2. Heat conductivity of wood . . . . .	26
1.9.3. Conductivity of chains of liquid hydrocarbons . . . . .	26
1.9.4. Conductivity of gases and vapors . . . . .	27
1.9.5. Conductivity of monatomic gases . . . . .	28
1.9.6. Conductivity of non-polar gases with linear molecules . . . . .	28
1.10. Physical properties of water . . . . .	29
1.10.1. Correlation of density. . . . .	29
1.10.2. Heat capacity. . . . .	29
1.10.3. Correlation of heat conductivity . . . . .	29
1.10.4. Correlation of viscosity . . . . .	29
1.10.5. Correlation of thermal diffusivity. . . . .	30
1.10.6. Correlation of the Prandtl number . . . . .	30
1.10.7. Correlation for calculating the expansion coefficient . . . . .	30
1.10.8. Correlation for calculating the saturating pressure. . . . .	30
1.10.9. Correlation for calculating latent heat . . . . .	31
1.11. Physical properties of air . . . . .	31
1.11.1. Correlation of density. . . . .	32
1.11.2. Heat capacity. . . . .	32
1.11.3. Correlation of heat conductivity . . . . .	32
1.11.4. Correlation of viscosity . . . . .	33
1.11.5. Correlation of thermal diffusivity. . . . .	33
1.11.6. Correlation of the Prandtl number . . . . .	33
1.11.7. Correlation for calculating the expansion coefficient . . . . .	33
<b>Chapter 2. Determinants and Parameters of Mass Transfer . . . . .</b>	<b>35</b>
2.1. Introduction. . . . .	35
2.2. Relative transfer velocities. . . . .	36
2.2.1. Velocity relating to average mass velocity . . . . .	36
2.2.2. Velocity relative to average molar velocity. . . . .	37
2.3. Amount of matter transferred . . . . .	38
2.4. Expressions of flux density . . . . .	39
2.4.1. Total flux. . . . .	39
2.4.2. Specific fluxes. . . . .	41
2.5. Operations on diffusion flux densities . . . . .	44
2.5.1. Total density as a function of the specific densities. . . . .	44
2.5.2. Sum of mass densities with respect to $v$ . . . . .	45

2.5.3. Sum of molar flux densities with respect to $v^*$ . . . . .	46
2.5.4. Sum of mass flux densities with respect to a mobile reference frame at $v^*$ . . . . .	46
2.6. Relations between flux densities $f_i$ and $j_i$ . . . . .	47
2.7. Relations between flux densities $F_i$ and $J_i^*$ . . . . .	47
<b>Chapter 3. Fick's First Law: Diffusion Coefficients</b> . . . . .	<b>49</b>
3.1. Introduction. . . . .	49
3.2. Fick's first law . . . . .	50
3.2.1. Expressing the flux density vector . . . . .	50
3.2.2. Similarities to energy and momentum transfer laws . . . . .	51
3.2.3. Convective analogy. . . . .	52
3.3. Fick's first law in different forms. . . . .	52
3.4. Determining diffusion coefficients from tabulated data. . . . .	53
3.4.1. Gaseous binary diffusion coefficients . . . . .	53
3.4.2. Illustration: diffusion coefficients of $\text{CO}_2$ in air and in water vapor. . . . .	54
3.4.3. Diffusion coefficients for liquid binaries . . . . .	58
3.5. Estimating diffusion coefficients from correlations . . . . .	60
3.5.1. Estimating gaseous binary diffusion coefficients . . . . .	60
3.5.2. Estimating diffusion coefficients of liquid binaries . . . . .	71
3.6. Diffusion coefficients for multicomponent mixtures . . . . .	81
3.6.1. Stefan–Maxwell equation . . . . .	81
3.6.2. Effective diffusion coefficient for complex mixtures . . . . .	82
<b>Chapter 4. Fick's Second Law: Macroscopic Balances</b> . . . . .	<b>85</b>
4.1. Introduction. . . . .	85
4.2. Overall continuity equation . . . . .	85
4.2.1. The accumulation term. . . . .	86
4.2.2. The generation term . . . . .	86
4.2.3. The term $I - O$ . . . . .	87
4.2.4. The balance equation. . . . .	87
4.2.5. The balance equation in Cartesian coordinates . . . . .	88
4.3. Particular continuity equations . . . . .	88
4.3.1. The term $I_1 - O_1$ . . . . .	88
4.3.2. The accumulation term. . . . .	89
4.3.3. The generation term . . . . .	89
4.3.4. Continuity equations in molar terms. . . . .	90
4.4. Illustration: diffusion with chemical reaction . . . . .	92
4.5. Illustration: diffusion of a component in a stagnant mixture . . . . .	94
4.6. Reading: background to Fick's Laws. . . . .	97

<b>Chapter 5. Exercises and Solutions</b> . . . . .	101
<b>Appendices</b> . . . . .	153
<b>Appendix 1</b> . . . . .	155
<b>Appendix 2</b> . . . . .	187
<b>References</b> . . . . .	191
<b>Index</b> . . . . .	205
