Introduction	ix
Chapter 1. Modeling: The Explanatory Model and the Individual Predictive Model	1
1.1. Preliminary assumptions	1
1.1.1. Nature of uncertainty	1
1.1.2. Consequentialism	3
1.1.3. Rationality of the equity crowdfunding investor: a triptych of rationality	4
1.2. Explanatory model	8
1.2.1. Choice of model variables by the combined hypothetico- deductive and inductive/abductive approach.	9
1.2.2. Confirmatory study of the variables of the model on qualitative material.	21
1.2.3. Operationalization: development of the measurement model, choice, adaptation of scales and return to data	35
1.2.4. Other hypotheses of the model	73
1.2.5. Reading grids for the explanatory model	83
1.2.6. Conclusion	89
1.3. Individual predictive model	90
1.3.1. Presentation	90
1.3.2. Affective matching theory.	93
1.3.3. Theoretical foundations	97
1.3.4. Definitions and operationalization	99
1.3.5. Concluding remarks	107
1.4. Conclusion	108

Chapter 2. Experimentation	109
2.1. Experimental protocol	109
2.1.1. Rationale and objectives.	111
2.1.2. Constitution, sample size and recruitment procedure	114
2.1.3. Experimental protocol	117
2.1.4. Experimental design	121
2.1.5. Conclusion.	124
2.2. Carrying out the experimental procedure	125
2.2.1. Conducting the experimental procedure	125
2.2.2. Conclusion.	128
2.3. Validity and handling of biases	128
2.3.1. Validity.	128
2.3.2. Handling biases	129
2.3.3. Concluding remarks	131
2.4. Conclusion	131
Chapter 3. Hypotheses Testing, Results and Discussion	133
3.1. Data prerequisites and the PLS approach	133
3.1.1. Statistical data of the sample	133
3.1.2. PLS-SEM	134
3.1.3. Corrective reprocessing, transformation and adding control variables to the data file	135
3.1.4. Sample size	136
3.1.5. Data review: completeness and data quality	136
3.1.6. Indicator measurement scales: symmetry and equidistance	138
3.2. Preliminary validity of the measurement model	138
3.2.1. Review of the measurement model	138
3.2.2. Single-indicator variables	142
3.2.3. Reflective variables.	143
3.2.4. Formative variables.	178
3.2.5. Conclusion.	191
3.3. Estimation of the explanatory model by structural equations	193
3.3.1. PLS-SEM approach	193
3.3.2. Revision of the structural model	195
3.3.3. Structural model	195
3.3.4. Mediators.	214
3.3.5. Invariance and moderators	223
3.3.6. Control variables	247
3.3.7. Conclusion.	250

3.4. Experimental design.	250
3.4.1. Impact of the Quality of the Business Plan on the Perceived Signal Quality	251
3.4.2. Effect of the business plan on the parameters estimated by multigroup analysis	255
3.4.3. Conclusion.	256
3.5. Results of the individual predictive model	259
3.5.1. Reminder of the model.	259
3.5.2. Results of the individual predictive model	270
3.5.3. Conclusion.	279
3.6. Conclusion	280
Conclusion	283
