Acknowledgements	ix
List of Acronyms	xi
Preface	xvii
Introduction	xix
Chapter 1. Theoretical Framework	1
1.1. Geospatial information system	1
1.1.1. Types of geospatial data	3
1.1.2. Geographical database	5
1.1.3. Quality of spatial databases	8
1.1.4. GIS and water data	12
1.2. Spatial data infrastructure	13
1.2.1. Concepts, components and hierarchy	14
1.2.2. Interoperability, norms and standards	16
1.2.3. Description of standards	24
1.2.4. From several services to an entire spatial data infrastructure	38
1.2.5. Initiatives	41
1.3. Overview of geospatial technologies	43
1.3.1. What is GIS software?	43
1.3.2. Tools	46
1.3.3. Comparative study of current solutions	53
1.4. Conclusion	61
Chapter 2. Technical Framework: Spatial Data Infrastructure for Water	63
2.1. Introduction	63

2.2. Water data management	64
2.2.1. Water data	64
2.2.2. Water data sources	66
2.2.3. Water data management model.	67
2.2.4. Water data interoperability	69
2.3. Establishment of a water information system.	71
2.3.1. Technical architecture of a GDI for water	72
2.3.2. Interaction diagram of main modules	75
2.4. International experiences.	76
2.4.1. At Mediterranean basin level	76
2.4.2. WIS in France	77
2.4.3. WIS in Spain	79
2.4.4. WIS in Algeria	80
2.4.5. WIS in Tunisia	81
2.4.6. Others.	82
2.5. Water data standards	85
2.5.1. Water data acquisition standards	85
2.5.2. International models and standards for water data exchange	86
2.6. Conclusion	91
Chapter 3. Case Studies	93
3.1. Cataloging data on groundwater resources	93
3.1.1. Introduction	93
3.1.2. Report by the national water information system in Morocco (national WIS)	94
3.1.3. The operators	96
3.1.4. Material and method	97
3.1.5. Architecture of a GDI on groundwater	98
3.1.6. Geoportal.	102
3.1.7. Geocatalog.	103
3.1.8. Conclusion.	107
3.2. Geosensors Sensor Observation Service (SOS) for sustainable water resource management	108
3.2.1. Introduction	108
3.2.2. Material and method	110
3.2.3. Results	113
3.2.4. Discussion	115
3.2.5. Conclusion.	117
3.3. GDI and water data geoprocessing	118
3.3.1. Introduction	118
3.3.2. Material and method	119
3.3.3. Solution architecture	120

3.3.4. Results and discussions	122
3.3.5. Conclusion	127
3.4. Design of decision support tools	127
3.4.1. Study area	127
3.4.2. Methodology	129
3.4.3. Analysis parameters	130
3.4.4. Modeling and multicriteria analysis	134
3.4.5. Result validation	135
3.4.6. Conclusion and discussion	136
General Conclusion	137
References	141
Index	149
