<b>Introduction</b> . . . . .	xiii
Marc-Eric BOBILLIER CHAUMON	
<b>Part 1. Towards an Overview of Digital Transformations...</b> . . . . .	1
<b>Chapter 1. Emerging Technologies and Issues for Activity and Occupational Health.</b> . . . . .	3
Marc-Eric BOBILLIER CHAUMON	
1.1. Introduction . . . . .	3
1.2. From properties to the uses of emerging technologies . . . . .	4
1.3. Five paradoxes of the diffusion of technologies in/on the activity . . . . .	8
1.3.1. Sense of loss of control over the activity vs increased control over the activity . . . . .	8
1.3.2. Invisibility vs visibility of the activity . . . . .	9
1.3.3. Increase in virtual teams vs isolation of employees . . . . .	10
1.3.4. Nomadism vs a sedentary lifestyle at work. . . . .	11
1.3.5. Detachment from activity vs proximity of work . . . . .	12
1.4. Conclusion . . . . .	14
1.5. References . . . . .	15
<b>Chapter 2. Collaborative Work Platforms: Challenges for Business Development</b> . . . . .	21
Nadia BARVILLE-DEROMAS and Marc-Eric BOBILLIER CHAUMON	
2.1. Introduction . . . . .	21
2.2. Two organizational challenges: empowering digital transformations and changing work practices. . . . .	22
2.2.1. The co-configuration of work . . . . .	22
2.2.2. Mobilizing social capital to make sharing more flexible . . . . .	23

2.3. Stakes for the development of activity: knowing how to give meaning to a poly-contextual and multi-mediated activity . . . . .	24
2.3.1. Networking, the power to act and meaning at work . . . . .	24
2.3.2. Sharing a degree of collaborative intentionality in a multi-mediated situation, a skill in its own right. . . . .	26
2.4. Conclusion . . . . .	27
2.5. References . . . . .	27
<b>Chapter 3. Virtual Reality: Definitions, Characteristics and Applications in the Workplace . . . . .</b>	<b>31</b>
Camille SAGNIER, Émilie LOUP-ESCANDE and Gérard VALLÉRY	
3.1. Introduction . . . . .	31
3.2. Some elements of definition . . . . .	32
3.2.1. The term “virtual reality”. . . . .	32
3.2.2. The purpose of virtual reality . . . . .	32
3.2.3. A functional definition of virtual reality . . . . .	33
3.2.4. A technical definition of virtual reality . . . . .	33
3.3. The main interaction devices . . . . .	34
3.3.1. Display devices . . . . .	35
3.3.2. Motion and position capture devices . . . . .	35
3.3.3. Proprioceptive and cutaneous feedback devices . . . . .	35
3.3.4. Sound input and presentation devices . . . . .	36
3.4. The main areas of application of virtual reality . . . . .	36
3.4.1. Applications in everyday life . . . . .	37
3.4.2. Applications in various professional contexts . . . . .	37
3.5. Applications of virtual reality in industry . . . . .	38
3.6. Conclusion . . . . .	40
3.7. References . . . . .	40
<b>Chapter 4. Robotization in Industries: A Focus on SMEs . . . . .</b>	<b>45</b>
Sandrine BERGER-DOUCE	
4.1. Introduction . . . . .	45
4.2. Focus on a robotization experiment in an industrial SME . . . . .	46
4.2.1. The case study in the service of exploratory research . . . . .	46
4.2.2. Presentation of the company . . . . .	47
4.2.3. A mixed technological adventure . . . . .	47
4.2.4. Lessons to be learned. . . . .	48
4.3. Receiving support in order to better implement a robot: illustration by the Robot Start PME program . . . . .	49

4.3.1. A program at the service of French industrial SMEs . . . . .	50
4.3.2. An inspiring framework to support technological change . . . . .	53
4.4. Conclusion . . . . .	54
4.5. References . . . . .	55

**Chapter 5. Serious Games for Vocational Training:  
From Emotional Labor to Knowledge Transfer . . . . . 57**

Lydia MARTIN, Julian ALVAREZ and Antoine TALY

5.1. Introduction . . . . .	57
5.2. Emotions, debriefing and learning . . . . .	59
5.2.1. Emotional labor . . . . .	59
5.2.2. Learning in a game . . . . .	60
5.3. The context and framework of the Serious Escape Game (SEG) . . . . .	61
5.3.1. Difficulty in gamification . . . . .	61
5.3.2. The training system . . . . .	62
5.3.3. A research-action approach . . . . .	62
5.4. Results . . . . .	63
5.4.1. Observations during gaming . . . . .	63
5.4.2. Post-game discussions . . . . .	64
5.4.3. Questionnaires. . . . .	66
5.5. Discussion and conclusion . . . . .	67
5.6. References . . . . .	68

**Chapter 6. The “Old” Issues of the “New” Artificial Intelligence  
Systems in Professional Activities . . . . . 71**

Tamari GAMKRELIDZE, Moustafa ZOUINAR and Flore BARCELLINI

6.1. Introduction . . . . .	71
6.2. AI: elements of definition and recent developments . . . . .	72
6.3. Functionalities and (potential) uses of new generation AI systems . . . . .	74
6.4. The “new” generation of AI and the old challenges of transforming work situations . . . . .	77
6.4.1. From the substitutive approach of automation to the complementary approaches of human-machine systems . . . . .	77
6.4.2. The challenges of “new” AI systems in work situations. . . . .	79
6.5. What are the approaches to designing and integrating AI systems in work situations? . . . . .	81
6.6. Conclusion . . . . .	83
6.7. References . . . . .	83

---

<b>Part 2. New Modalities and Forms of Work...</b>	87
<b>Chapter 7. Challenges in Deploying Telework: Benefits and Risks for Employees</b>	89
Emilie VAYRE	
7.1. Telework: definitions and characteristics	89
7.2. The benefits of teleworking	90
7.3. The constraints and risks of teleworking	91
7.4. The challenges of deploying telework in organizations	93
7.4.1. Deploying and experimenting with telework	93
7.4.2. Training of teleworkers and managers	96
7.4.3. Evaluating the deployment of telework	97
7.5. Conclusion	97
7.6. References	98
<b>Chapter 8. The Reconfiguration of Managerial Practices through Digital Innovation: The Example of a Work Team in Site Renovation</b>	101
Elodie CHAMBONNIÈRE and Jacqueline VACHERAND-REVEL	
8.1. Introduction: when digital technology is used on renovation sites	101
8.2. At the heart of the renovation sites	103
8.2.1. Supervising in a complex and dynamic system	103
8.2.2. Guiding a worksite: a conductor's activity at the crossroads of various modes of prevention management	103
8.3. Understanding occupational risk prevention activity and prevention management	104
8.4. Ethnography of the activity on a renovation site	106
8.5. Confirming a culture of safety: prevention management	107
8.5.1. Management towards site supervision	108
8.5.2. Middle management	109
8.5.3. Local management: towards construction workers	109
8.6. Digital innovation in occupational risk prevention: restructuring of management practices	110
8.6.1. Hierarchical visits by management	110
8.6.2. Prevention visits by middle management	111
8.6.3. Close supervision of the construction workers	111
8.7. Conclusion: towards a better consideration of digital innovations in prevention management	113
8.8. References	114

<b>Chapter 9. Integrating Collaborative Robotics into Work Situations: The Intentions of SME Managers in the Digital Transformation of their Companies</b> . . . . .	115
Anne-Cécile LAFEUILLADE, Flore BARCELLINI, Willy BUCHMANN and Tahar-Hakim BENCHEKROUN	
9.1. Transformations in work situations seen through the prism of technocentric solutions . . . . .	115
9.2. Models of leadership activity to understand change management processes . . . . .	117
9.2.1. The activity of managers at the crossroads of different roles . . . . .	117
9.2.2. Developing the intention of managers in change management processes: the contribution of the dialogical model of design . . . . .	118
9.3. Methodology for data collection and analysis. . . . .	121
9.4. Managers’ desires in the face of reality: an encounter that helped to shape their intentions . . . . .	123
9.4.1. Elements shaping managers’ desires . . . . .	123
9.4.2. The “conversation” between the desire and reality. . . . .	124
9.5. The reality, a messenger from the past, in a modernization project . . . . .	125
9.6. References . . . . .	126
<b>Chapter 10. The Role and Function of Technological Artifacts in Entrepreneurial Activity</b> . . . . .	129
Irène POIDI, Marc-Eric BOBILLIER CHAUMON and Jacqueline VACHERAND-REVEL	
10.1. Introduction. . . . .	129
10.2. Theoretical foundations . . . . .	130
10.3. Methodology . . . . .	132
10.4. Results. . . . .	133
10.5. Discussion and conclusion. . . . .	137
10.6. References . . . . .	138
<b>Part 3. Psychosocial and Socio-organizational Impacts of the Diffusion of Technology</b> . . . . .	141
<b>Chapter 11. The New Physical Territories of Digital Activity</b> . . . . .	143
Maria IANEVA, Raluca CIOBANU and Chiara LAI	
11.1. Introduction. . . . .	143
11.2. Transformation of spaces and transformation of work and employment: “spatialized work” . . . . .	145
11.3. From “spatialized work” to the division between space and work . . . . .	146
11.4. Flexible work environments: from work to “activity” . . . . .	147

11.4.1. The example of the design of the workspaces of a large company: the reconfiguration of work areas . . . . .	148
11.4.2. From space allocation to the redefinition of associated tasks . . . . .	149
11.5. What theoretical models for considering space and its transformations? . . .	150
11.6. Conclusion . . . . .	152
11.7. References . . . . .	153
<b>Chapter 12. Digital Work, Disposable Work? When Opportunities to Explore Threaten the Meaning of the Activity . . . . .</b>	<b>155</b>
Maxime BESEVAL and Alexandra BIDEY	
12.1. Introduction . . . . .	155
12.2. The division of complex digital work . . . . .	157
12.3. Chronic indeterminacy of the product . . . . .	159
12.4. When the contingencies regime threatens work commitment . . . . .	161
12.5. Conclusion . . . . .	165
12.6. References . . . . .	166
<b>Chapter 13. Is the Obsolescence of the Skills of Older Employees an Inevitable Consequence of Digitalization? . . . . .</b>	<b>169</b>
Florence CROS, Marc-Eric BOBILLIER CHAUMON and Bruno CUVILLIER	
13.1. Introduction . . . . .	169
13.2. Aging, work, technologies and skills obsolescence: theoretical elements . . .	170
13.2.1. The effects of aging . . . . .	170
13.2.2. Aging associated with work . . . . .	171
13.2.3. From the effects of technology on activity to the issue of the obsolescence of older workers' skills . . . . .	171
13.3. Question and methodology . . . . .	172
13.3.1. Study background and methods . . . . .	172
13.3.2. Engeström's activity system model (1987) . . . . .	173
13.4. Main results . . . . .	174
13.4.1. The ASCT profession: a perception through the prism of age . . . . .	174
13.4.2. Overcoming tensions to develop one's activity . . . . .	176
13.5. Discussion and conclusion . . . . .	177
13.5.1. Accelio, a vector of recognition for the ASCT profession? . . . . .	178
13.5.2. Diverting to work better . . . . .	178
13.6. References . . . . .	179

<b>Chapter 14. Are Work Collectives and Digital Exposure Compatible?</b> . . . .	183
Pauline CROUZAT and Marc-Eric BOBILLIER CHAUMON	
14.1. Collective activity: major developments . . . . .	183
14.2. Engineering: a highly digitized environment . . . . .	185
14.3. Problem of the study . . . . .	185
14.4. The methodology used . . . . .	186
14.5. Main results: virtually hyper-instrumented collective work for invisible work collectives . . . . .	190
14.6. Discussion . . . . .	191
14.7. Conclusion . . . . .	192
14.8. References . . . . .	193
 <b>Part 4. Approaches and Methods for Conducting Digital Transformations</b> . . . . .	 195
<b>Chapter 15. Prospective Ergonomics in Service of Technological Innovation</b> . . . . .	197
Jean-Marc ROBERT, Antoine MARTIN, Mitra TARAGHI, Clément COLIN, Masood MALDAR, Flavie BONNEVIOT and Eric BRANGIER	
15.1. Introduction . . . . .	197
15.2. A new form of intervention focused on creation and innovation . . . . .	198
15.3. The context and challenges of prospective ergonomics . . . . .	199
15.4. Foundations in several disciplines and fields of study . . . . .	202
15.5. Prospective ergonomics intervention approach . . . . .	203
15.6. Two cases of intervention . . . . .	206
15.6.1. Anticipating future needs and uses related to energy systems that integrate hydrogen energy . . . . .	206
15.6.2. The crowdsourcing approach . . . . .	207
15.7. Conclusion . . . . .	208
15.8. References . . . . .	209
 <b>Chapter 16. Simulating Digital Activity in the Making: Elements of Methodology</b> . . . . .	 211
Laurent VAN BELLEGHEM	
16.1. Introduction . . . . .	211
16.2. Digital activity . . . . .	212
16.3. Simulating digital activity . . . . .	213
16.4. Two illustrations of digital activity simulation . . . . .	217
16.4.1. A giant digital tablet to welcome customers . . . . .	217
16.4.2. RFID chips for lending books . . . . .	219

16.5. Conclusion . . . . .	222
16.6. References . . . . .	223
<b>Chapter 17. Managing Technological Change . . . . .</b>	<b>225</b>
Clotilde CORON and Patrick GILBERT	
17.1. Introduction . . . . .	225
17.2. Digital transformations, sources of threats and opportunities . . . . .	226
17.3. Social and responsible management of new technologies . . . . .	229
17.3.1. Social and responsible innovations . . . . .	230
17.3.2. Digital and responsible technological innovation. . . . .	230
17.4. A model for responsible leadership of technological change within organizations . . . . .	232
17.4.1. Managing organizational and technological change . . . . .	232
17.4.2. Responsible digital change management . . . . .	233
17.5. Conclusion . . . . .	234
17.6. References . . . . .	235
<b>Chapter 18. Exploring the Situated Acceptance of Emerging Technologies in and Concerning Activity: Approaches and Processes . . . . .</b>	<b>237</b>
Marc-Eric BOBILLIER CHAUMON	
18.1. Introduction . . . . .	237
18.2. Models of technological acceptability: outlines and approaches . . . . .	239
18.2.1. Practical or instrumental acceptability. . . . .	239
18.2.2. The social acceptability model . . . . .	240
18.2.3. The situated acceptance approach . . . . .	242
18.3. Frameworks for action and intervention to address situated acceptance. . . . .	244
18.3.1. Evaluating the situated acceptance of technologies already in place to support the future technological transformation project . . . . .	246
18.3.2. Exploring the acceptance of emerging technologies to co-construct the creation project in/by the activity . . . . .	247
18.4. Conclusion . . . . .	252
18.5. References . . . . .	252
<b>List of Authors . . . . .</b>	<b>257</b>
<b>Index . . . . .</b>	<b>261</b>
