| Preface | ix |
| Yoann DENÈLE and Julien BERGER | |
| Introduction | xi |
| Yoann DENÈLE and Julien BERGER | |
| List of Figures | xxiii |
| Chapter 1. High-Temperature Metamorphism and Syn- to Late-Orogenic Magmatism | 1 |
| Arnaud VILLAROS, Oscar LAURENT, Simon COUZINIE and Jean-François MOYEN | |
| 1.1. Introduction | 1 |
| 1.2. High-temperature/low- to medium-pressure metamorphism and partial melting of the Variscan crust | 5 |
| 1.2.1. Evolution of high-temperature metamorphism | 5 |
| 1.2.2. Petrology of high-temperature metamorphism | 7 |
| 1.3. Late-orogenic magmatism | 13 |
| 1.3.1. Two mica peraluminous leucogranites (MPG) | 13 |
| 1.3.2. Biotite and cordierite peraluminous granites (CPG) | 14 |
| 1.3.3. K-rich calc-alkaline granitoids (KCG) – durbachites, vaugnerites | 16 |
| 1.3.4. Synchronous orogenic volcanism of HT metamorphism | 17 |
| 1.3.5. Overview | 18 |
| 1.4. Causes and geodynamic implications of crustal melting | 19 |
| 1.4.1. Synchronous crustal melting episode of the Variscan collision | 19 |
| 1.4.2. Melting associated with orogenic extension | 19 |
| 1.4.3. High-temperature melting and the formation of domes | 20 |
| 1.4.4. Synthesis of HT metamorphic evolution | 22 |
| 1.4.5. Outlook | 23 |
| 1.5. References | 24 |

| | |
|---|-----|
| Chapter 2. Late-Orogenic Structural Reorganization of the Variscan Belt during the Upper Carboniferous | 35 |
| Yoann DENÈLE and Bryan COCHELIN | |
| 2.1. Introduction | 35 |
| 2.2. Major structures of the Variscan belt of Western Europe | 38 |
| 2.3. Ibero-Armorican Arc | 43 |
| 2.3.1. Formation of a major orocline in the upper Carboniferous | 43 |
| 2.3.2. Structure and evolution of the Armorican domain | 46 |
| 2.3.3. The Armorican shear zones | 49 |
| 2.3.4. A simple shear model in a horizontal plane at the scale of the Central Armorican domain | 53 |
| 2.4. Late orogenic deformation in the internal domain | 56 |
| 2.4.1. South Armorican domain: thinning and longitudinal stretching of a previously thickened domain | 56 |
| 2.4.2. The Carboniferous syn-tectonic plutons of the French Massif Central: interaction between strike-slip shear zone and longitudinal extension | 65 |
| 2.4.3. The Velay dome and the Pilat detachment: transverse extension in the hinterland | 74 |
| 2.5. Late-orogenic deformation in the southern foreland domain. | 77 |
| 2.5.1. The Montagne Noire migmatite-cored gneiss dome | 77 |
| 2.5.2. The Variscan segment of the Pyrenees | 85 |
| 2.6. Summary and discussion on the restructuring of the Variscan belt in the Carboniferous | 93 |
| 2.7. Conclusion | 99 |
| 2.8. References | 99 |
| | |
| Chapter 3. Sedimentary Basins and Evolution of Reliefs Associated with the Variscan Cycle in France and Adjacent Countries | 121 |
| Markus ARETZ, Élise NARDIN, Frédéric CHRISTOPHOUL, Julien DENAYER | |
| 3.1. Introduction | 121 |
| 3.2. Foreland basins along the Southern Laurussian Margin | 122 |
| 3.2.1. The Ardenne and the Boulonnais | 123 |
| 3.2.2. Rhenish Massif | 138 |
| 3.3. Basins in the Inner Variscan zone | 146 |
| 3.3.1. Armorican Massif Basins | 147 |
| 3.3.2. Northern Vosges | 152 |
| 3.4. Regions of the Gondwanan Margin and Foreland Basin | 152 |
| 3.4.1. Middle Vosges and Southern Vosges | 153 |
| 3.4.2. Morvan | 154 |
| 3.4.3. Montagne Noire: reference for the Peri-Gondwanan Foreland Basin | 154 |
| 3.4.4. The Pyrenees | 162 |

| | |
|---|-----|
| 3.5. Post-orogenic stage: Stephanian-Permian basins | 169 |
| 3.5.1. Stratigraphy | 171 |
| 3.5.2. Geodynamic and structural context | 172 |
| 3.5.3. General sedimentological trends in Stephanian-Permian basins | 177 |
| 3.6. Conclusion | 179 |
| 3.7. References | 181 |
| Conclusion | 203 |
| Yoann DENÈLE and Julien BERGER | |
| List of Authors | 215 |
| Index | 217 |
| Summary of Volume 1. | 219 |
