Preface	xi
Céline LUTOFF and Séverine DURAND	
Chapter Summaries	xvii
Chapter 1. Mobility Exposure Scales of Analysis in the Face of Flash Floods	1
Céline LUTOFF, Jean-Dominique CREUTIN, Isabelle RUIN and Sylvie DUVILLARD	
1.1. Introduction.	1
1.2. Why the question about scales?	2
1.3. Which scales should be mobilized?	4
1.4. Multiscalar approach to the interactions between man and environment	6
1.5. Social phenomena scales	9
1.6. Rhythmicity scales: spatiotemporal summary of the observed dynamics	14
1.7. Scales of mobility exposure to flash floods	18
1.8. Bibliography	20
Chapter 2. Social Effects of Floods on Mobilities: A Comparison Between Short-term and Long-term Perspectives.	23
Séverine DURAND and Isabelle RUIN	
2.1. Introduction.	23
2.2. A common methodology deployed at two scales.	25
2.2.1. Short-term perspective: analysis of postevent narratives.	25

2.2.2. Long-term perspective: the analysis of life stories	27
2.3. Social dynamics in the face of extreme events	28
2.3.1. Setting the event in time: when the flood imposes itself on the inhabitants	28
2.3.2. The events in perspective: when life choices are more determining factors than the flood itself.	39
2.4. Social convergence of both scales: “the force of everyday life”	53
2.5. Conclusion	57
2.6. Bibliography	58
Chapter 3. The Challenges of Flash Flood Forecasting	63
Isabelle BRAUD, Béatrice VINCENDON, Sandrine ANQUETIN, Véronique DUCROCQ and Jean-Dominique CREUTIN	
3.1. The spatial and temporal scales of flash floods.	63
3.2. How can we anticipate flash floods?	68
3.2.1. Flood forecasting chain elements	68
3.2.2. Difficulties of flash flood forecasting	73
3.3. Cutting-edge tendencies in flash flood forecasting.	73
3.3.1. The forecasting of intense rainfall events.	74
3.3.2. Flash flood forecasting methods	76
3.3.3. Flash flood forecasting tools currently available in France	77
3.3.4. Example of the result of a forecasting chain	79
3.3.5. Toward a flash flood impact forecast?	81
3.4. Conclusion	82
3.5. Bibliography	83
Chapter 4. High-impact Weather Events: Is a Socio-hydrometeorological Characterization Possible?	89
Sandrine ANQUETIN, Isabelle RUIN, Gilles MOLINIÉ, Jean-Stéphane CARNEL, Benoit LAFON, Isabelle BRAUD, Céline LUTOFF, Bruno WILHELM and Jean-Dominique CREUTIN	
4.1. Introduction.	89
4.2. Available data for featuring the physical and socioeconomic impact of past events	93
4.2.1. Existing databases	94
4.2.2. High-impact weather events in south-east France: database crossed viewpoints	97
4.3. Concept of hydrometeorological hazard severity.	99
4.3.1. The severity diagram.	100
4.3.2. Cross-analysis: severity diagram – socioeconomic impact	100
4.4. Media resonance of hydrometeorological events.	104
4.4.1. Media and pluviometric data	105

4.4.2. Cross-analysis: rain intensity and rainfall extension – media resonance	105
4.5. Conclusion	109
4.6. Bibliography	109
Chapter 5. Legal Evolution of the Conflict Between Water Mobility and the Mobility of People	113
Jean-Dominique CREUTIN and Valérie SANSEVERINO-GODFRIN	
5.1. Introduction.	113
5.2. A swing between waterstream constraints and human settling constraints	115
5.2.1. An implied appearance of the flooding problem in legal documents (1669–1858)	119
5.2.2. Legal orientation toward flood containment and flood slowdown (1858–1935) – a technical vision.	122
5.2.3. Emergence of residential mobility control in the law (1935–2007) – toward an anthropocentric vision	126
5.2.4. Legal consideration for the multiscale character of floods and the multiple uses of water (1964–2016)	130
5.3. The institutional scale and flood response.	132
5.3.1. From an individual, economic and sectorial concern to a public safety problem.	134
5.3.2. Research for the pertinent “local” intervention scale	137
5.3.3. The formalization of the subsidiarity question.	139
5.4. In conclusion, a thread of founding ideas	144
5.5. Bibliography	148
Chapter 6. The Difficulties in Local Implementation of Risk Prevention Policies	151
Joël BOULIER, Edwige DUBOS-PAILLARD, Antonin PAVARD and Valérie SANSEVERINO-GODFRIN	
6.1. Introduction.	151
6.2. Evolution of legal provision: urbanization versus flooding?	153
6.2.1. Versatile coexistence between urbanization, flooding and legal provisions.	153
6.2.2. Traumatic events and the evolution of risk prevention	164
6.3. Construction in flood-prone areas: a heterogeneous consideration of the legislative constraints of territory management	170
6.3.1. A variable implementation of legislative measures from one territory to another	172
6.3.2. Flood risk is taken into account belatedly in urban development documents.	174

6.3.3. Measures for reducing vulnerability adapted to the existing stakes	180
6.4. Conclusion: the relative effectiveness of legal limits and measures. . .	182
6.5. Bibliography	184
Chapter 7. The Influence of Residential Migrations on the Evolution of Populations Exposed to a Flood Risk	187
Edwige DUBOS-PAILLARD, Antonin PAVARD and Joël BOULIER	
7.1. Introduction.	187
7.2. Gard: a dynamic department in which more than one out of three people is exposed to a flood risk	188
7.3. The contribution of modeling to the analysis of migratory dynamics in the Gard department	191
7.3.1. The role of distance to urban centers	191
7.3.2. The role of altitude and the distance to Rhône and the sea.	194
7.3.3. The role of economic activities.	194
7.3.4. The role of the road network	197
7.4. Analysis of the evolution of the population exposed to the risk of flooding between 1968 and 2013	199
7.4.1. Varied trajectories in matters of quantitative evolution	202
7.4.2. A recent trend but generalized to the decrease in the proportion of the population exposed	205
7.5. Conclusion	208
7.6. Bibliography	208
Chapter 8. Exposure to Flash Floods: The Conflict Between Human Mobility and Water Mobility	211
Céline LUTOFF, Jean-Dominique CREUTIN, Isabelle RUIN, Sylvie DUVILLARD, Sandrine ANQUETIN and Marco BORGA	
8.1. Introduction.	211
8.2. The rapid dynamics of flood–society interactions: the time of the event. . .	215
8.2.1. Accept or resist	215
8.2.2. A delicate transition between routine activities and awareness of the event	216
8.2.3. Chain reactions in flooding tempos	217
8.3. The slow dynamics of flood–society interactions: inter-crisis.	218
8.3.1. The local shock of catastrophic flash floods	220
8.3.2. The national evolution of the control of residential choices	222
8.3.3. The multiscale interactions that influence the transition from active to passive protection	227

8.4. The society–flash flood interactions across levels: post-crisis	227
8.4.1. Residential mobility in reaction to the damage caused by a flash flood	228
8.4.2. The preparation of daily mobility for future floods	229
8.4.3. Lessons learned through floods.	231
8.5. Conclusion: multiscale considerations	231
8.5.1. The institutional response to floods (by flash flooding) in time and space	232
8.5.2. The adaptation of human mobility models at the intermediate scale	234
8.5.3. The multiscale alternation from active protection to passive protection, in time and space	235
8.6. Bibliography	236
Conclusion	241
Céline LUTOFF and Séverine DURAND	
Appendices	245
Appendix 1	247
Isabelle RUIN	
Appendix 2	249
Séverine DURAND	
Appendix 3	259
Séverine DURAND	
Appendix 4	261
Séverine DURAND	
Appendix 5	263
Edwige DUBOS-PAILLARD, Antonin PAVARD and Joël BOULIER	
List of Authors	265
Index	267
