<b>Preface</b> . . . . .	xi
<b>Introduction</b> . . . . .	xv
<b>Chapter 1. Systems and their Designs</b> . . . . .	1
1.1. System modeling . . . . .	1
1.1.1. Traditional systems . . . . .	2
1.1.2. Complex systems . . . . .	2
1.1.3. Systems of systems . . . . .	3
1.2. Autonomous systems . . . . .	4
1.3. Multi-agent systems . . . . .	6
1.4. Organizations and systems . . . . .	7
1.5. The problem of modeling an autonomous system . . . . .	8
1.6. Agents and multi-agent systems . . . . .	9
1.6.1. The weak notion of an agent . . . . .	10
1.6.2. The strong notion of an agent . . . . .	11
1.6.3. Cognitive agents and reactive agents . . . . .	11
1.6.4. Multi-agent systems . . . . .	13
1.6.5. MAS with reactive agents . . . . .	14
1.6.6. MAS with cognitive agents . . . . .	14
<b>Chapter 2. Reliability of Autonomous Systems</b> . . . . .	17
2.1. Introduction . . . . .	17
2.2. Dependability of a system . . . . .	18
2.2.1. General concepts . . . . .	18
2.2.2. Failure and repair rates . . . . .	21
2.2.3. Average estimators . . . . .	24
2.2.4. Some methodological tools . . . . .	27

2.3. Reliability diagram . . . . .	28
2.3.1. Series system . . . . .	29
2.3.2. Parallel system . . . . .	30
2.3.3. Mixed system . . . . .	31
2.3.4. More complex systems. . . . .	32
2.3.5. Fault tree . . . . .	33
2.4. Reliability networks . . . . .	34
2.4.1. Partial graph associated with a subset of components . . . . .	34
2.4.2. Reliability network and structure function . . . . .	35
2.4.3. Properties of reliability networks. . . . .	35
2.4.4. Length and width of a reliability network . . . . .	36
2.4.5. Equivalence between structure function and reliability network . . . . .	36
2.4.6. Construction and simplification of reliability networks . . . . .	36
<b>Chapter 3. Artificial Intelligence, Communication Systems and Artificial Consciousness . . . . .</b>	<b>39</b>
3.1. Introduction. . . . .	39
3.2. Evolution of computer science . . . . .	39
3.3. Evolution of artificial intelligence . . . . .	43
3.4. Radical evolution of computing and AI towards fully communicating systems . . . . .	47
3.5. The computer representation of an artificial consciousness . . . . .	53
<b>Chapter 4. The Informational Substrate of the Universe and the Organizational Law . . . . .</b>	<b>63</b>
4.1. Introduction. . . . .	63
4.2. The fundamental principles of the informational model of generation of the Universe . . . . .	63
4.2.1. First fundamental concept: the foundation of the Universe by a generative information system . . . . .	64
4.2.2. Second fundamental concept: informational character of the Universe with its substrate . . . . .	65
4.2.3. Third fundamental concept: the organizational law of generation of the Universe . . . . .	67
4.2.4. Fourth fundamental concept: the informational energy of the substrate of the Universe . . . . .	69
4.3. The notion of generating information in the Universe. . . . .	71
4.3.1. The information field of a component. . . . .	72
4.3.2. The informational activity component and its information envelope . . . . .	73
4.3.3. Fifth fundamental concept: self-control in the organization of the Universe . . . . .	74

---

4.3.4. Generative information . . . . .	75
4.3.5. Organizational tendency of the Universe and informational envelopes . . . . .	76
<b>Chapter 5. The Informational Interpretation of Living Things . . . . .</b>	<b>81</b>
5.1. Introduction. . . . .	81
5.2. Origin of living things with bifurcation of the organizational law. . . . .	82
5.2.1. Sixth fundamental concept: the production of living things on Earth . . . . .	82
5.2.2. Bifurcation of the organizational law . . . . .	83
5.2.3. Seventh fundamental concept: the central rule of organizational law in living things. . . . .	84
5.2.4. The principle of action of the organizational law for the generation of living things . . . . .	85
5.2.5. The life span of a living organism . . . . .	87
5.2.6. The unification of the informational envelope with the membrane. . . . .	88
5.2.7. The creation of sexual reproduction . . . . .	89
5.2.8. Reasons for the production of new organisms . . . . .	90
5.3. The informational action of reproduction of living things . . . . .	91
5.3.1. The fundamental rule of the organizational law that formed living beings. . . . .	93
5.3.2. Morphological patterns . . . . .	94
5.3.3. The influence of an external morphological pattern on a living organism . . . . .	95
5.3.4. Brain formation and sensory comprehension. . . . .	97
5.3.5. The external organizational attractors hypothesis . . . . .	99
5.3.6. The possibility of predicting the future of any situation in progress . . . . .	99
5.4. The human species in the organizational evolution of living things. . . . .	100
5.4.1. Creation of <i>Homo sapiens</i> as a result of very strong evolution . . . . .	101
5.4.2. Organizational action of the formation of the human brain . . . . .	101
5.4.3. The importance of informational links between groups of humans. . . . .	103
5.4.4. Power of group participation in humans . . . . .	104
<b>Chapter 6. The Interpretation of Neuronal Aggregates . . . . .</b>	<b>107</b>
6.1. Introduction. . . . .	107
6.1.1. Form of a thought. . . . .	108
6.1.2. Constructivist definition of the notion of mental representation . . . . .	108
6.2. The systemic layer and the regulators including the informational regulator. . . . .	112
6.2.1. Systemic layer of the psychic system . . . . .	112
6.2.2. Regulators . . . . .	113

6.2.3. The voluntary choice of the operated aim in the psychic system . .	113
6.2.4. The aggregate–regulator rule of co-activity . . . . .	114
6.2.5. Morphological role of regulators . . . . .	116
6.2.6. Process of intentionally producing a representation on a desired theme . . . . .	121
6.2.7. The organizational immersion regulator in an informational state . . . . .	124
<b>Chapter 7. The Sense of Informational Comprehension of Living Organisms: The Sixth Sense . . . . .</b>	<b>125</b>
7.1. Introduction. . . . .	125
7.2. The five usual senses and the use of the informational substrate . . . .	126
7.2.1. The case of animals. . . . .	127
7.2.2. The case of plants. . . . .	128
7.3. The sense of informational comprehension or the sixth sense . . . . .	129
7.3.1. The implicit communication process of the sixth sense . . . . .	130
7.3.2. The voluntary process of informational communication . . . . .	131
7.3.3. The solicitation of the sixth sense and the comprehension of the informational substrate . . . . .	135
7.3.4. The cognitive and sensitive interpretation of the information forms received . . . . .	139
7.4. Common use of the sixth sense . . . . .	142
7.4.1. Common use of the sixth sense in animals and humans . . . . .	142
7.4.2. The action of the sixth sense for hypnosis, the power of magnetism and meditation . . . . .	147
7.4.3. The notion of premonition and the sixth sense. . . . .	151
7.4.4. Thoughts and the safeguarding of the world . . . . .	153
<b>Conclusion . . . . .</b>	<b>155</b>
<b>Appendices . . . . .</b>	<b>157</b>
<b>Appendix 1. Binomial Distribution . . . . .</b>	<b>159</b>
<b>Appendix 2. Geometric Distribution . . . . .</b>	<b>161</b>
<b>Appendix 3. Poisson Distribution . . . . .</b>	<b>163</b>
<b>Appendix 4. Exponential Distribution . . . . .</b>	<b>165</b>
<b>Appendix 5. Normal Distribution. . . . .</b>	<b>167</b>
<b>Appendix 6. Lognormal Distribution . . . . .</b>	<b>171</b>

<b>Appendix 7. Weibull Distribution</b> .....	175
<b>Appendix 8. Pareto Distribution</b> .....	179
<b>Appendix 9. Distribution of Extreme Values</b> .....	183
<b>Appendix 10. Asymptotic Distributions</b> .....	185
<b>References</b> .....	191
<b>Index</b> .....	195
