<b>Introduction</b> . . . . .	xi
<b>Chapter 1. The IoT: Intrusive or Indispensable Objects?</b> . . . . .	1
Nasreddine BOUHAI	
1.1. Introduction. . . . .	1
1.2. The age of miniaturization and technological progress . . . . .	2
1.3. The history of a digital ecosystem . . . . .	3
1.4. Internet of Things, which definition?. . . . .	5
1.5. The security of connected objects: the risks and the challenges . . . . .	5
1.6. Protocols, standards and compatibility: toward a technological convergence . . . . .	6
1.6.1. The origins of some norms and standards . . . . .	7
1.7. Humanity, intelligence and technologies . . . . .	9
1.7.1. Crowdfunding as an aid to innovation. . . . .	9
1.7.2. Participatory environmental sensors and citizens . . . . .	10
1.7.3. When digital art goes into connected mode . . . . .	12
1.7.4. Home automation for a connected and communicating habitat . . . . .	13
1.7.5. Connected objects, a step toward the enhanced human. . . . .	15
1.8. Conclusion . . . . .	17
1.9. Bibliography . . . . .	18
<b>Chapter 2. The Ecosystem of the Internet of Things</b> . . . . .	21
Ioan ROXIN and Aymeric BOUCHEREAU	
2.1. Introduction. . . . .	21
2.2. Context, convergences and definition . . . . .	22

---

2.2.1. The Internet Toaster or the first connected object in history . . . . .	22
2.2.2. From the Internet of computers... . . . .	23
2.2.3. ... to the Internet of objects . . . . .	38
2.3. Conclusion . . . . .	47
2.4. Bibliography . . . . .	48
<b>Chapter 3. Introduction to the Technologies of the Ecosystem of the Internet of Things . . . . .</b>	<b>51</b>
Ioan ROXIN and Aymeric BOUCHEREAU	
3.1. Architectures recommended by the Internet Architecture Board . . . . .	52
3.1.1. Communication between objects . . . . .	52
3.1.2. Communication from objects to the Cloud . . . . .	53
3.1.3. Communication from objects to a gateway . . . . .	54
3.1.4. From objects to back-end data sharing . . . . .	55
3.2. Three-tier architecture . . . . .	56
3.2.1. Layered architecture . . . . .	57
3.3. Steps and technologies in the ecosystem of the IoT . . . . .	59
3.3.1. Identifying . . . . .	62
3.3.2. Capturing . . . . .	64
3.3.3. Connecting . . . . .	65
3.3.4. Integrating . . . . .	68
3.3.5. Networking . . . . .	79
3.4. Opportunities and threats in the IoT ecosystem . . . . .	82
3.4.1. Opportunities . . . . .	82
3.4.2. Threats . . . . .	87
3.5. Conclusion . . . . .	90
3.6. Bibliography . . . . .	91
<b>Chapter 4. Toward a Methodology of IoT-a: Embedded Agents for the Internet of Things . . . . .</b>	<b>97</b>
Valérie RENAULT and Florent CARLIER	
4.1. Introduction . . . . .	97
4.2. Multi-agent simulations, ambient intelligence and the Internet of Things . . . . .	98
4.3. Triskell3S: an architecture of embedded agent-oriented inter-actions . . . . .	102
4.4. Transposition of the formalization of agent-oriented interaction to connected objects . . . . .	103
4.5. Formalization . . . . .	106

4.6. Experimentation and perspectives . . . . .	110
4.7. Bibliography . . . . .	112

## **Chapter 5. The Visualization of Information**

<b>of the Internet of Things . . . . .</b>	<b>117</b>
--	------------

Adilson Luiz PINTO, Audilio GONZALES-AGUILAR, Moisés LIMA DUTRA,  
Alexandre RIBAS SEMELER, Marta DENISZWICZ and Carole CLOSEL

5.1. Introduction. . . . .	117
5.2. Internet of Things . . . . .	120
5.3. InfoVis and DataVis in the Internet of Things . . . . .	123
5.3.1. Visual analytics in the context of the Internet of Things . . . . .	125
5.4. Analytical visualization in the context of the Internet of Things. . . . .	130
5.5. Conclusion: the relevance of the use of visualization in the Internet of Things . . . . .	134
5.6. Bibliography . . . . .	135

## **Chapter 6. The Quantified Self and Mobile Health Applications: From Information and Communication Sciences to Social Innovation by Design . . . . .**

<b>139</b>
------------

Marie-Julie CATOIR-BRISSON

6.1. Introduction. . . . .	139
6.2. The evolution of interfaces and connected objects toward anthropotechnics . . . . .	141
6.2.1. From e-health to the “Quantified Self” . . . . .	141
6.2.2. Anthropotechnics and the information ecosystem of Chris Dancy . . . . .	143
6.2.3. Connected objects as the heirs of ubiquitous computing . . . . .	145
6.3. Factive dimension and value system at the heart of Chris Dancy’s relationship with his information technology . . . . .	146
6.3.1. The progressive development of the figure of the enhanced human in socio-digital networks . . . . .	146
6.3.2. Information design and data-visualization: the case of Fitbit and Existence . . . . .	147
6.3.3. Animism and anthropomorphism: a particular relationship to connected objects . . . . .	148
6.4. Critical perspective and avenues for reflection for reconsidering the use of connected objects and mobile applications in the field of health . . . . .	153
6.4.1. Ethical and social issues related to data governance . . . . .	153

---

6.4.2. The doctor-patient relationship transformed by connected objects and mobile health applications . . . . .	156
6.4.3. The necessity of considering the point of view of doctors and healthcare professionals . . . . .	158
6.4.4. Envisaging other paths for m-health technologies based on the anthropology of communication and social innovation by design. . . . .	160
6.5. Conclusion . . . . .	164
6.6. Bibliography . . . . .	165
<b>Chapter 7. Tweets from Fukushima: Connected Sensors and Social Media for Dissemination after a Nuclear Accident . . . . .</b>	<b>169</b>
Antonin SEGALTY, Frederico TAJARIOL and Ioan ROXIN	
7.1. Introduction. . . . .	169
7.2. The IoT: a shift in the development of digital services . . . . .	170
7.3. Social media and the dissemination of information during a catastrophe . . . . .	172
7.4. Context of the study. . . . .	174
7.5. Goals of our study . . . . .	177
7.6. Methodology . . . . .	177
7.7. Results. . . . .	178
7.7.1. Comprehensive overview . . . . .	179
7.7.2. Popularity of bots . . . . .	179
7.7.3. Completeness of the shared measurements. . . . .	180
7.7.4. Source of the measurements shared . . . . .	181
7.8. Discussions . . . . .	182
7.9. Conclusions. . . . .	183
7.10. Acknowledgements . . . . .	184
7.11. Bibliography . . . . .	184
<b>Chapter 8. Connected Objects: Transparency Back in Play . . . . .</b>	<b>189</b>
Florent DI BARTOLO	
8.1. Introduction. . . . .	189
8.2. Sensitive objects . . . . .	190
8.3. The myth of transparency . . . . .	195
8.4. Transparency of interfaces and opacity of processes . . . . .	200
8.5. Conclusion . . . . .	207
8.6. Bibliography . . . . .	208

---

<b>Chapter 9. Status of the Body within the Internet of Things: Revolution or Evolution?</b> . . . . .	211
Evelyne LOMBARDO and Christophe GUION	
9.1. Introduction. . . . .	211
9.2. Presence and absence of the body in the field of sports and e-health . . . . .	212
9.3. The traceability of the body or the integration of data by a digital coach . . . . .	212
9.4. The IoT creates a flow of information around the body: a present, readable and traceable cluster . . . . .	213
9.5. The body in interaction: sharing Clouds to inform the informational environment . . . . .	215
9.6. Clouds, persistence and trust: a mapped body without the right to be forgotten. . . . .	216
9.7. The body, an object communicating between hyper-control and non-control . . . . .	217
9.8. Conclusion . . . . .	218
9.9. Bibliography . . . . .	219
<b>List of Authors</b> . . . . .	221
<b>Index</b> . . . . .	223
