<b>Foreword</b> . . . . .	ix
<b>Chapter 1. Life in the Soil: From Taxonomy to Ecological Integration</b> . . . . .	1
Manuel BLOUIN, Philippe HINSINGER, Patrick LAVELLE and Philippe LEMANCEAU	
1.1. Importance of soil organisms . . . . .	1
1.2. Historical perspective . . . . .	3
1.2.1. Fauna: convergence between soil science and ecology . . . . .	3
1.2.2. The root system of plants: the hidden side of plant ecology . . . . .	5
1.2.3. Microorganisms: from tool development towards conceptual developments in ecology and evolution . . . . .	7
1.3. Structure of this book . . . . .	11
1.4. References . . . . .	12
<b>Chapter 2. Diversity of Mechanisms Involved in Soil Ecological Interactions</b> . . . . .	17
Manuel BLOUIN	
2.1. Various interactions . . . . .	17
2.2. A diversity of ecological mechanisms . . . . .	21
2.2.1. Trophic relationships . . . . .	21
2.2.2. Physical modification . . . . .	25
2.2.3. Chemical modification . . . . .	25
2.2.4. Biochemical modification . . . . .	27
2.3. A unique conceptual framework for trophic and non-trophic interactions . . . . .	30

2.4. Research perspectives: the case of plant–earthworm–microorganism relationships . . . . .	31
2.5. References . . . . .	34
<b>Chapter 3. Biodiversity and Ecological Functioning of Soils . . . . .</b>	<b>39</b>
Jean-Christophe LATA, Sébastien BAROT, Julie LELOUP, Thomas LERCH, Naoise NUNAN and Xavier RAYNAUD	
3.1. Importance of biodiversity in the functioning of soils . . . . .	39
3.1.1. A diversity whose functional importance has been recognized late . . . . .	39
3.1.2. Impact of biodiversity on soil functioning . . . . .	42
3.2. Main current research questions. . . . .	43
3.2.1. Biodiversity–function links impacted by abiotic parameters and disturbances . . . . .	44
3.2.2. Biodiversity–functions and nutrient cycles . . . . .	46
3.2.3. Development of approaches and techniques . . . . .	49
3.2.4. Awareness of the importance of biodiversity in the functioning of soils for human societies . . . . .	52
3.3. References . . . . .	53
<b>Chapter 4. Plant–Microorganism Interactions in the Rhizosphere . . . . .</b>	<b>57</b>
Philippe LEMANCEAU, Matthieu BARRET, Manuel BLOUIN, Sylvie MAZURIER and Barbara PIVATO	
4.1. The rhizosphere: a site of multiple exchanges . . . . .	57
4.2. Recruitment of microorganisms in the rhizosphere . . . . .	59
4.3. Plant–microorganism interactions: a long history . . . . .	62
4.4. Rhizospheric microbiota: benefits for the plant. . . . .	66
4.5. Plant–microorganism interactions in agroecology . . . . .	69
4.6. Conclusion and perspectives. . . . .	72
4.7. References . . . . .	72
<b>Chapter 5. Interactions between Soil and Vegetation: Structure of Plant Communities and Soil Functioning. . . . .</b>	<b>83</b>
Grégoire T. FRESCHET, Cyrille VIOLLE, Catherine ROUMET and Éric GARNIER	
5.1. Introduction. . . . .	83
5.1.1. The soil–plant interactions at the core of ecosystems. . . . .	83
5.1.2. Characterizing the interactions between plants and soil: response traits, effect traits and feedback loops . . . . .	84
5.2. Soil as a major determinant of plant community structure and ecosystem properties. . . . .	85

5.2.1. Main determinants of the structure of plant communities . . . . .	85
5.2.2. Which soil variables influence vegetation? . . . . .	86
5.2.3. Role of spatial and temporal heterogeneities of the soil . . . . .	89
5.3. Effects of vegetation on soil functioning . . . . .	90
5.3.1. Biogeochemical cycles. . . . .	90
5.3.2. Macrostructure and aggregation . . . . .	97
5.3.3. Relationship with soil biodiversity. . . . .	98
5.4. Conclusion . . . . .	99
5.5. References . . . . .	100
<b>Chapter 6. Soil Fauna: Determinants of Community Structure and Impacts on Soil Functioning . . . . .</b>	<b>105</b>
Jérôme CORTET, Sophie JOIMEL, Johanne NAHMANI and Mickael HEDDE	
6.1. Soil fauna: classification and quantification. . . . .	105
6.1.1. Towards a systemic understanding of soil . . . . .	106
6.1.2. Towards a necessary intraguild description: example of soil microarthropods . . . . .	108
6.2. Abiotic and biotic determinants . . . . .	110
6.2.1. Pedoclimatic constraints. . . . .	110
6.2.2. Anthropogenic constraints. . . . .	111
6.3. Diversity–operation relations . . . . .	112
6.3.1. Taxonomic diversity . . . . .	112
6.3.2. Functional diversity based on traits: a tool in development . . . . .	114
6.4. Fauna: a bioindicator of soil quality . . . . .	115
6.5. References . . . . .	118
<b>Chapter 7. Molecular Ecology of Soil Organisms: The Case of Earthworms . . . . .</b>	<b>125</b>
Lise DUPONT	
7.1. Introduction. . . . .	125
7.2. Species identification . . . . .	127
7.3. Modes and systems of reproduction . . . . .	128
7.4. Population genetic structure . . . . .	129
7.4.1. Gene flow . . . . .	129
7.4.2. Genetic variation in populations . . . . .	132
7.5. Phylogeography . . . . .	133
7.6. Adaptative selection. . . . .	134
7.7. Conclusion . . . . .	134
7.8. References . . . . .	134

<b>Chapter 8. Feedback Loops in Soils: Evidence and Theoretical Implications</b> . . . . .	139
Jérôme MATHIEU	
8.1. Soils, complex or complicated systems? . . . . .	139
8.2. Importance of feedback loops in system operation. . . . .	141
8.2.1. Simple indirect interactions in ecosystems . . . . .	142
8.2.2. Feedback loops in soils . . . . .	144
8.3. Consequences of feedbacks on the systems . . . . .	149
8.3.1. Eco-evolutionary dynamics . . . . .	149
8.3.2. Emerging properties . . . . .	150
8.3.3. Hierarchical organization, ascending and descending causality . . . . .	151
8.3.4. Self-organization . . . . .	153
8.3.5. Hysteresis . . . . .	153
8.3.6. Stable alternative states . . . . .	154
8.3.7. Responses of complex systems to an external disturbance . . . . .	155
8.4. Conclusion . . . . .	158
8.5. References . . . . .	158
<b>Chapter 9. Actions and Feedback: Consequences for Soil Management.</b> . . . . .	163
Sébastien BAROT, Manuel BLOUIN and Philippe LEMANCEAU	
9.1. Emergence of an eco-evolutionary understanding of the functioning of soils . . . . .	163
9.2. Towards ecological and evolutionary soil engineering . . . . .	166
9.3. References . . . . .	169
<b>List of Authors</b> . . . . .	173
<b>Index</b> . . . . .	177
