<b>Preface</b> . . . . .	ix
<b>Introduction</b> . . . . .	xi
<b>Chapter 1. Fundamental Principles in Fluids</b> . . . . .	1
1.1. Introduction . . . . .	1
1.2. Incompressible and compressible fluids . . . . .	2
1.3. Fluid properties . . . . .	2
1.3.1. Density ( $\rho$ ) . . . . .	3
1.3.2. Specific weight ( $\gamma$ ) . . . . .	6
1.3.3. Relative density . . . . .	7
1.3.4. Pressure . . . . .	11
1.3.5. Compressibility . . . . .	12
1.3.6. Viscosity . . . . .	13
1.3.7. Specific volume . . . . .	20
1.4. Surface tension . . . . .	20
1.5. Surface tension applications . . . . .	21
1.6. Capillarity effect . . . . .	23
1.7. Newtonian and non-Newtonian fluids . . . . .	24
1.8. Vapor pressure . . . . .	27
1.9. Cavitation . . . . .	28
1.10. Formulae . . . . .	30
1.11. Questions . . . . .	37
1.12. Problems with solutions . . . . .	38
1.13. Problems to be solved . . . . .	47
<b>Chapter 2. Hydrostatics</b> . . . . .	51
2.1. Introduction . . . . .	51

---

2.2. Basic law of hydrostatic pressure . . . . .	52
2.3. Law of communicating vessels . . . . .	56
2.4. Forces applied by fluids on flat surfaces . . . . .	58
2.4.1. Forces applied on the horizontal bottom of a vessel . . . . .	58
2.4.2. Forces applied on the flat side walls of a vessel . . . . .	60
2.5. Forces applied by fluids on curved surfaces . . . . .	62
2.6. Archimedes' principle . . . . .	64
2.7. Consequences of Archimedes' principle . . . . .	66
2.7.1. Fully immersed body . . . . .	66
2.7.2. Partially immersed (floating) body . . . . .	69
2.8. Formulae . . . . .	70
2.9. Questions . . . . .	72
2.10. Problems with solutions . . . . .	72
2.11. Problems to be solved . . . . .	82
<b>Chapter 3. Aerostatics . . . . .</b>	<b>85</b>
3.1. Introduction . . . . .	85
3.2. General characteristics of gases . . . . .	86
3.3. Pressure applied by air . . . . .	86
3.3.1. Pressure caused by the motion of gas molecules . . . . .	87
3.3.2. Pressure caused by the weight of gases . . . . .	87
3.4. Buoyancy: Archimedes' principle . . . . .	88
3.4.1. Apparent weight of a body . . . . .	90
3.5. Hot air balloons . . . . .	90
3.6. Lifting force of a hot air balloon . . . . .	92
3.7. Basic aerostatic law . . . . .	93
3.8. Gas pressure variations: the Boyle–Mariotte law . . . . .	94
3.8.1. The Boyle–Mariotte law . . . . .	95
3.9. Changes in gas density . . . . .	96
3.10. The atmosphere . . . . .	97
3.10.1. International Standard Atmosphere (ISA) . . . . .	98
3.11. Formulae . . . . .	103
3.12. Questions . . . . .	105
3.13. Problems with solutions . . . . .	105
3.14. Problems to be solved . . . . .	114
<b>Chapter 4. Fluid Flow . . . . .</b>	<b>117</b>
4.1. Introduction . . . . .	117
4.2. Flow field . . . . .	117
4.3. Fluid velocity . . . . .	118
4.4. Fluid's acceleration . . . . .	119
4.4.1. Steady and unsteady flows . . . . .	121

---

4.4.2. Compressible and incompressible flows . . . . .	121
4.4.3. Subsonic and supersonic flows . . . . .	121
4.5. Streamlines . . . . .	122
4.6. Mass conservation (continuity equation) . . . . .	123
4.7. Continuity equation for flow in pipes . . . . .	126
4.8. Energy conservation for incompressible flows (Bernoulli equation) . . . . .	127
4.9. Applications of the Bernoulli law . . . . .	131
4.9.1. Venturi tube . . . . .	131
4.9.2. Pitot tube. . . . .	132
4.10. Euler equations . . . . .	134
4.11. Navier–Stokes equations. . . . .	136
4.12. Formulae . . . . .	138
4.13. Questions . . . . .	141
4.14. Problems with solutions . . . . .	142
4.15. Problems to be solved . . . . .	164
<b>Chapter 5. Flow in Pipes . . . . .</b>	<b>169</b>
5.1. Introduction . . . . .	169
5.2. Physical quantities . . . . .	170
5.3. Laminar and turbulent flows in pipes . . . . .	170
5.3.1. Reynolds number in pipes . . . . .	170
5.3.2. Average velocity and velocity distribution . . . . .	171
5.3.3. Shear stress in a horizontal cylindrical pipe . . . . .	172
5.3.4. Pressure drop in a horizontal cylindrical pipe . . . . .	174
5.3.5. Pressure drop in a horizontal non-cylindrical pipe . . . . .	174
5.3.6. Shear stress $\tau_0$ and friction coefficient $f$ . . . . .	175
5.3.7. Pressure drop and friction coefficient relationship for a horizontal pipe . . . . .	175
5.4. Basic equations . . . . .	176
5.4.1. Continuity equation. . . . .	176
5.4.2. Energy equation (Bernoulli equation). . . . .	177
5.5. Friction coefficient of a laminar flow of real fluid in a horizontal cylindrical pipe . . . . .	179
5.5.1. Inlet conditions . . . . .	183
5.6. Turbulent flow in pipes . . . . .	185
5.6.1. Turbulent flow in smooth pipes . . . . .	186
5.6.2. Turbulent flow in pipes with roughness. . . . .	187
5.6.3. The Moody diagram . . . . .	189
5.6.4. Calculation of relative roughness . . . . .	190
5.6.5. Empirical expressions for the friction coefficient . . . . .	191
5.6.6. Minor local losses. . . . .	193

---

5.6.7. K values . . . . .	195
5.6.8. Valves and other devices . . . . .	195
5.6.9. Total losses . . . . .	198
5.6.10. Solution of flow problems in pipes . . . . .	199
5.7. Categories of pipes' flow problems . . . . .	201
5.7.1. A' category flow problems . . . . .	201
5.7.2. B' category flow problems . . . . .	202
5.7.3. C' category flow problems . . . . .	203
5.8. Pipes' flow problems: numerical work examples . . . . .	205
5.8.1. A' category . . . . .	205
5.8.2. B' category . . . . .	206
5.8.3. C' category . . . . .	210
5.9. Energy and hydraulic grade lines . . . . .	214
5.10. Incompressible, viscid flow in connected pipes . . . . .	219
5.10.1. Simple pipelines . . . . .	221
5.10.2. Pipes connected in a row . . . . .	222
5.10.3. Parallel connection of pipes . . . . .	224
5.10.4. Mixed pipe connection . . . . .	226
5.10.5. Pipe branches . . . . .	228
5.11. Simple applications of pipeline networks . . . . .	233
5.11.1. Simple pipeline . . . . .	233
5.11.2. Pipes in a row . . . . .	236
5.11.3. Pipes in parallel . . . . .	245
5.11.4. Mixed pipe network . . . . .	252
5.11.5. Problem of the three tanks . . . . .	256
5.12. Formulae . . . . .	267
5.13. Questions . . . . .	283
5.14. Problems with solutions . . . . .	286
5.15. Problems to be solved . . . . .	350
<b>Appendices . . . . .</b>	<b>359</b>
<b>Appendix 1. Symbols and Units . . . . .</b>	<b>361</b>
<b>Appendix 2. Tables and Diagrams of Natural Values . . . . .</b>	<b>367</b>
<b>Appendix 3. Symbols and Basic Conversion Factors . . . . .</b>	<b>385</b>
<b>Bibliography . . . . .</b>	<b>387</b>
<b>Index . . . . .</b>	<b>389</b>
