<b>Foreword</b> . . . . .	ix
<b>Acknowledgments</b> . . . . .	xi
<b>General Introduction</b> . . . . .	xiii
<b>Chapter 1. R&amp;D and New Competitive Challenges: Between Intensive Innovation Strategy and Internationalization</b> . . . . .	1
1.1. Strategy and R&D . . . . .	1
1.1.1. R&D's place in business strategies . . . . .	2
1.1.2. Different generations of R&D . . . . .	4
1.2. Environmental factors influencing business strategies in R&D and their consequences . . . . .	9
1.2.1. The major role of innovation in competition strategies. . . . .	9
1.2.2. The emergence of the consumer in R&D . . . . .	11
1.2.3. The effects of market globalization . . . . .	15
1.3. R&D strategies tested overseas: the example of China . . . . .	21
1.3.1. Western companies' choice to locate their R&D in China. . . . .	21
1.4. Conclusion . . . . .	26
<b>Chapter 2. Work in R&amp;D and its Transformations</b> . . . . .	29
2.1. Specifics of R&D work and its heterogeneity. . . . .	29
2.1.1. Non-routine and knowledge intensive work . . . . .	30
2.1.2. The work in R&D: between interactions and engagements with the surrounding environment . . . . .	35
2.1.3. A job characterized by a certain degree of autonomy and occupational regulations . . . . .	38

2.2. The main transformations of R&D work since 1990. . . . .	43
2.2.1. The advent of project management and of the concurrent engineering model . . . . .	43
2.2.2. A job which is more interactive and more dependent on the downstream. . . . .	48
2.2.3. Managerialization, bureaucratization and remoteness of technical work . . . . .	52
2.3. Current tensions and open questions as to the future of work in R&D . . . . .	56
2.3.1. Increasing pressure and strong focus in the short term: how sustainable is this in individual and collective terms?. . . . .	56
2.3.2. Relocation, internationalization, outsourcing and open innovation: what is the future of R&D work? . . . . .	61
2.3.3. The digital revolution: what is the impact on work in R&D? . . . . .	64
2.4. Conclusion . . . . .	67
<b>Chapter 3. Rationalization and Creativity: R&amp;D under Pressure . . . . .</b>	<b>69</b>
3.1. Permanent rationalizations and reduction of available resources in R&D . . . . .	70
3.1.1. The rationalization concept . . . . .	70
3.1.2. R&D struggling with permanent rationalization. . . . .	71
3.1.3. Rationalization as a slack reduction strategy. . . . .	72
3.2. Creativity: between individual attribute and social process. . . . .	77
3.2.1. Individual creativity . . . . .	78
3.2.2. Creativity as an idea production process . . . . .	81
3.2.3. Creativity as a social process . . . . .	83
3.3. Ingredients and negative effects of slack reductions on creativity. . . . .	84
3.3.1. Slack reduction components . . . . .	85
3.3.2. Human slack reduction effects . . . . .	85
3.3.3. “Financial slack” reduction effects. . . . .	91
3.3.4. Temporal slack reduction effects. . . . .	92
3.3.5. Spatial slack reduction effects . . . . .	94
3.4. Mechanisms linking slack reduction and creativity . . . . .	98
3.4.1. Focus of attention. . . . .	98
3.4.2. Ability to “travel through time” . . . . .	99
3.4.3. Support provided by the leader . . . . .	100
3.5. Conclusion . . . . .	101
<b>Chapter 4. Managing R&amp;D Professionals: HRM Practices and Current Challenges. . . . .</b>	<b>103</b>
4.1. HRM and R&D: complex relationships . . . . .	103

---

4.1.1. R&D: a world that has long remained foreign to HRM regulations . . . . .	104
4.1.2. Recurrent tension between standardization and differentiation . . . . .	108
4.1.3. Project organization: a necessary source of adaptation of HRM in R&D . . . . .	110
4.2. HRM development in R&D today . . . . .	111
4.2.1. Strategic HR planning . . . . .	111
4.2.2. Recruitment and integration. . . . .	113
4.2.3. Assignments and mobility. . . . .	118
4.2.4. Individual assessment . . . . .	121
4.2.5. Remuneration . . . . .	124
4.2.6. Careers . . . . .	127
4.2.7. Competence management and training . . . . .	131
4.3. The new challenges of HRM in R&D . . . . .	133
4.3.1. Moving beyond an instrumental approach and adapting to the diversity of contexts . . . . .	134
4.3.2. Renewing (or reinventing) HRM in open innovation models . . . . .	135
4.3.3. Going beyond individualized HRM by integrating the collective dimension. . . . .	137
4.4. Conclusion . . . . .	138
<b>Chapter 5. Collective Expertise: Forms and Methods of Management . . . . .</b>	<b>139</b>
5.1. Collective expertise in R&D. . . . .	140
5.1.1. The dual facet of expertise: individual attribute and collective process. . . . .	140
5.1.2. Collective expertise and its current status. . . . .	141
5.2. Two forms of structuring: “horizontal” and “vertical” . . . . .	142
5.2.1. Horizontal structuring: interdisciplinary communities of expertise . . . . .	142
5.2.2. Vertical structuring: monodisciplinary communities of expertise . . . . .	152
5.3. Conclusion . . . . .	157
<b>Chapter 6. Performance Management in R&amp;D . . . . .</b>	<b>159</b>
6.1. Performance in R&D . . . . .	159
6.1.1. A hard to define concept. . . . .	159
6.1.2. Management difficulties specific to R&D . . . . .	162

6.1.3. Performance challenges . . . . .	163
6.1.4. The delicate issue of measure. . . . .	164
6.2. Budgetary control of R&D departments . . . . .	169
6.3. Innovation project management control . . . . .	171
6.3.1. Economic assessment of projects: the two approaches . . . . .	171
6.3.2. Project management methods and tools. . . . .	175
6.4. Conclusion . . . . .	181
<b>Bibliography</b> . . . . .	183
<b>Index</b> . . . . .	197
