Introduction	ix
Jeanne-Marie MEMBRÉ and Vasilis VALDRAMIDIS	
Chapter 1. Predictive Microbiology	1
Vasilis VALDRAMIDIS	
1.1. Introduction	1
1.2. Terminology	2
1.3. Classification	3
1.4. The modeling cycle	4
1.4.1. Planning	5
1.4.2. Data collection	5
1.4.3. Mathematical description	6
1.4.4. Model validation	7
1.5. Software	8
1.6. Conclusion	10
1.7. Bibliography	10
Chapter 2. Quantifying Microbial Propagation	17
Enda CUMMINS	
2.1. Introduction	17
2.2. Probability processes	18
2.2.1. Binomial	18
2.2.2. Beta distribution	21
2.2.3. Negative binomial	22
2.2.4. Poisson	24

2.3. Uncertainty (U) and variability (V)	26
2.3.1. Definition and interest of incorporating them in the model	26
2.4. Modeling propagation using a modular model	26
2.4.1. Incorporation of probability distributions into predictive models	27
2.4.2. Monte Carlo simulation	28
2.5. Separation of uncertainty and variability when building a model	29
2.6. Conclusion	30
2.7. Bibliography	31
Chapter 3. Modeling Microbial Responses: Application to Food Spoilage	33
Jeanne-Marie MEMBRÉ and Stéphane DAGNAS	
3.1. Introduction	33
3.2. Modeling spoilage: application to commercial sterility	35
3.2.1. Context: commercial sterility and <i>G. stearothermophilus</i>	35
3.2.2. Modeling framework: modular process risk model	36
3.2.3. Model set up: choices of inputs and simulation procedure	39
3.2.4. Probabilistic toolbox: second-order Monte Carlo analysis, sensitivity and scenario analysis	40
3.3. Modeling spoilage: application to best-before-date determination	42
3.3.1. Context: mould spoilage of food products	42
3.3.2. Factors affecting the mould growth on bakery-type products	43
3.3.3. Primary and secondary models developed (specifically) for mould spoilage	44
3.3.4. Use of models to derive management options which enable us to prevent/control food spoilage	47
3.4. Conclusion	51
3.5. Bibliography	52
Chapter 4. Modeling Microbial Responses: Application to Food Safety	61
Maria GOUGOULI and Konstantinos KOUTSOUMANIS	
4.1. Introduction	61
4.2. Risk-based food safety management	63
4.2.1. Predictive microbiology in a risk-based approach	65
4.2.2. Modeling microbial responses: application to food safety	70

4.3. Conclusion.	74
4.4. Bibliography.	75
Conclusion	83
Jeanne-Marie MEMBRÉ and Vasilis VALDRAMIDIS	
List of Authors	85
Index	87
