Table of Contents

Introduction vii

Chapter 1. Technological Revolutions and Their Conceptual and Practical Consequences 1

1.1. Thematic cartography and the digital revolution 2
1.1.1. From computer-assisted cartography… 3
1.1.2. …to GISs. 10
1.1.3. The digital revolution: new functions for maps 16
1.2. The multimedia revolution and cartography 21
1.2.1. Multimedia: definitions and theoretical concepts 22
1.2.2. A component intrinsically linked to multimedia: interactivity . . . 28
1.2.3. A base component for dynamics: animation 38
1.2.4. Sensory components 58
1.3. The communication revolution: the World Wide Web and mobile platforms 69
1.3.1. Internet and World Wide Web 70
1.3.2. Maps on the Internet and the Web 72
1.3.3. New platforms, map supports, and mobile telephony. 82
1.4. Conclusion 90

Chapter 2. Towards a Spatio-Temporal Representation of Cartographic Objects 93

2.1. Time and space-time: from concepts to their impact on cartography . . 95
2.1.1. Cartography and time 95
2.1.2. Time 97
2.1.3. From time to space-time. 102
2.2. From the conceptual model to accessing data for a renewed representation 106
2.2.1. Spatio-temporal data: specific features and constraints. 107

2.2.2. The need for specific structuring: conceptual models of spatio-temporal data . . . 114
2.2.3. Towards a query interface opening out onto cartographic representations . . . 119
2.3. Spatio-temporal representations . . . 124
2.3.1. A brief historical overview of Time Cartography . . . 125
2.3.2. Approaches and procedures for representing spatio-temporal data . 126
2.3.3. Representation of attribute changes . . . 132
2.3.4. Representation of movements . . . 141
2.4. Conclusion . . . 152

Chapter 3. Thematic Cartography within the Framework of New Paradigms . . . 155

3.1. Visualization, geovisualization, virtual reality and cybercartography . . . 156
3.1.1. Visualization and scientific visualization . . . 157
3.1.2. From geovisualization to virtual reality . . . 160
3.1.3. Cybercartography . . . 163
3.2. From cartographic visualization to cybercartography . . . 163
3.2.1. Cartographic visualization, complementary terms . . . 164
3.2.2. Specific products of cartographic visualization . . . 165
3.2.3. A new pathway: cybercartography . . . 172
3.3. From geovisualization to virtual reality . . . 178
3.3.1. Geovisualization procedures . . . 178
3.3.2. Components of geovisualization . . . 183
3.3.3. Towards virtual reality and augmented reality . . . 193
3.4. A new field for cartography: concertation . . . 196
3.4.1. Notions with implications for cartography: sustainable development, governance, participation and subsidiarity . . . 197
3.4.2. An essential constraint: the development of “oriented” GISs . . . 201
3.4.3. Cartographic solutions through examples . . . 203
3.5. Conclusion . . . 209

Conclusion . . . 211

General Conclusion . . . 215

Bibliography . . . 221

Software Used . . . 281

List of Authors . . . 283

Index . . . 285

Summary of Other Volumes in the Series . . . 293
