<b>PREFACE</b> . . . . .	ix
<b>CHAPTER 1. A SINGULAR WORK OF THEATER</b> . . . . .	1
1.1. A unique history . . . . .	1
1.2. A story filled with catastrophes and recoveries. . . . .	6
1.3. Evolutionary radiations: major phenomena in the history of biodiversity . . . . .	11
<b>CHAPTER 2. THE FOSSIL RECORD</b> . . . . .	13
2.1. A treasure trove of fossils . . . . .	13
2.2. From organisms to fossils, and from biocenoses to taphocenoses. . . . .	16
2.3. Can the fossil record reveal relevant information? . . . . .	18
2.3.1. A question highlighted by Darwin . . . . .	18
2.3.2. One year later: John Phillips . . . . .	21
2.3.3. A few examples of bias in the fossil record. . . . .	23
2.3.4. Tools for controlling the fossil record and its sampling . . . . .	28
2.4. Construction and examples of paleontological databases . . . . .	33
2.4.1. Constructing a paleontological database to quantify biodiversity . . . . .	33

---

2.4.2. Examples of databases . . . . .	42
2.5. Yes, the fossil record can be used to study the history of biodiversity . . . . .	45
<b>CHAPTER 3. THE PHENOMENON OF EVOLUTIONARY RADIATION. . . . .</b>	<b>47</b>
3.1. What is an evolutionary radiation? . . . . .	47
3.1.1. Two examples of radiations, taken from organisms living in the world today . . . . .	48
3.1.2. Taxonomic diversification . . . . .	53
3.1.3. Morphological diversification . . . . .	55
3.2. The different categories of evolutionary radiations, and their causes . . . . .	58
3.2.1. Adaptive radiation . . . . .	59
3.2.2. Non-adaptive radiation . . . . .	61
3.2.3. Post-extinction radiation . . . . .	61
<b>CHAPTER 4. EXAMPLES OF EVOLUTIONARY RADIATIONS . . . . .</b>	<b>65</b>
4.1. A paleontological bestseller: the Cambrian explosion . . . . .	65
4.1.1. Previously on Planet Earth... . . . .	66
4.1.2. The strange biodiversity of the Cambrian . . . . .	68
4.1.3. The causes of the Cambrian diversification . . . . .	72
4.1.4. Areas of uncertainty . . . . .	76
4.2. Cascaded radiations: the case of ammonites . . . . .	79
4.2.1. A post-extinction radiation: the example of the Permian/Triassic boundary . . . . .	81
4.2.2. An adaptive radiation: the example of the lower Jurassic . . . . .	84
4.3. Floral success: the emergence and radiation of flowering plants . . . . .	91
4.3.1. In search of the first flower. . . . .	92
4.3.2. Radiation and dominance of angiosperms . . . . .	96
4.3.3. Why such success? . . . . .	97

4.4. Not-so-round sea urchins! . . . . .	100
4.4.1. Parallel worlds . . . . .	103
4.4.2. Anatomical innovation as the cause of evolutionary radiation . . . . .	106
<b>CONCLUSION</b> . . . . .	109
<b>APPENDIX</b> . . . . .	119
<b>BIBLIOGRAPHY</b> . . . . .	125
<b>INDEX</b> . . . . .	133
