<b>Introduction</b> . . . . .	ix
<b>Part 1. Traceability of Information and Knowledge Management</b> . . . . .	1
<b>Chapter 1. Intelligent Traceability of Equipment</b> . . . . .	3
1.1. Introduction . . . . .	3
1.2. State-of-the-art intelligent products . . . . .	5
1.2.1. Definition of intelligent products . . . . .	5
1.2.2. Research on intelligent products . . . . .	6
1.2.3. Infrastructure of an intelligent product and RFID . . . . .	7
1.3. Knowledge management approach . . . . .	8
1.3.1. Knowledge capitalization process . . . . .	8
1.3.2. PLM ontologies . . . . .	9
1.3.3. Proposition of IMAMO_RFID . . . . .	10
1.4. Intelligent product: data flow and distributed memory . . . . .	14
1.4.1. Architecture of an intelligent product . . . . .	14
1.4.2. Stream of data and information in the MOL phase . . . . .	15
1.4.3. Distributed memory: RFID tag and LIFE RECORD . . . . .	16
1.4.4. Stream of information during the MOL phase . . . . .	16

1.5. Support service for component's recycling . . . . .	20
1.5.1. Implementation of an intelligent equipment and decision support service . . . . .	21
1.6. Conclusion . . . . .	21
<b>Chapter 2. A Knowledge-oriented Maintenance Platform . . . . .</b>	<b>25</b>
2.1. Introduction . . . . .	25
2.2. Software architectures of maintenance support systems . . . . .	28
2.2.1. Exchanged data, information, knowledge and competence . . . . .	28
2.2.2. Relations between information systems . . . . .	29
2.2.3. Characterization of maintenance systems . . . . .	30
2.3. Projects and works on e-maintenance . . . . .	32
2.3.1. Projects and works on e-maintenance . . . . .	33
2.3.2. Overview of state-of-the-art e-maintenance systems and platforms . . . . .	34
2.3.3. Project platforms . . . . .	35
2.3.4. Academic platforms . . . . .	35
2.3.5. Summary . . . . .	37
2.4. Maintenance, e-maintenance, s-maintenance . . . . .	37
2.4.1. General . . . . .	37
2.4.2. E-maintenance . . . . .	38
2.4.3. Definitions of the e-maintenance concept . . . . .	39
2.4.4. S-maintenance . . . . .	41
2.4.5. S-maintenance platform . . . . .	42
2.5. Conclusion . . . . .	44
<b>Chapter 3. Intelligent Traceability Application . . . . .</b>	<b>47</b>
3.1. Introduction . . . . .	47
3.2. Description of the equipment to be maintained . . . . .	48
3.3. Infrastructure of intelligent equipment . . . . .	49
3.4. The s-maintenance platform . . . . .	50
3.5. Web services . . . . .	52
3.5.1. Communication between the platform and the mobile reader . . . . .	52
3.5.2. Web service: fixed RFID antenna-platform . . . . .	53

---

3.6. Service for monitoring diagnostic and prognostic . . . . .	54
3.7. Knowledge capitalization service . . . . .	55
3.7.1. Data model . . . . .	57
3.7.2. Simulation of the life record . . . . .	58
3.8. Decision support service for the recycling of hydraulic jacks . . . . .	60
3.9. Conclusion . . . . .	61
<b>Part 2. Post-prognostic Decision . . . . .</b>	<b>65</b>
<b>Chapter 4. Position of Decision within the PHM Context . . . . .</b>	<b>67</b>
4.1. Introduction . . . . .	67
4.2. Definition of post-prognostic decision . . . . .	68
4.3. Which objectives? . . . . .	68
4.4. Types of decisions . . . . .	69
4.4.1. Automatic control improved by prognostics . . . . .	70
4.4.2. Optimization of maintenance . . . . .	71
4.4.3. Adjustment of missions with respect to the equipment's health state . . . . .	73
4.5. The subject of a decision . . . . .	77
4.6. Typology of decisions in PHM (temporal, granularity and objective types) . . . . .	78
4.6.1. Typology of decisions within PHM . . . . .	78
4.7. Decision methods . . . . .	80
4.8. Summary . . . . .	81
<b>Chapter 5. Towards a Policy of Predictive Maintenance . . . . .</b>	<b>83</b>
5.1. Decision problem . . . . .	86
5.2. Hypotheses and data . . . . .	86
5.2.1. Equipment . . . . .	87
5.2.2. Maintenance operations . . . . .	88
5.2.3. Maintenance resources . . . . .	90
5.2.4. Costs of maintenance and production . . . . .	91
5.3. Implementation: an approach of maintenance planning supported by prognostic information . . . . .	92
5.3.1. Cost modeling . . . . .	93

5.3.2. Constraints to be satisfied . . . . .	95
5.3.3. Objective function . . . . .	96
5.3.4. Problem's solution . . . . .	96
5.4. Summary . . . . .	97
<b>Chapter 6. Maintenance in Operational Conditions . . . . .</b>	<b>99</b>
6.1. Statement of the problem . . . . .	99
6.1.1. Objective . . . . .	99
6.1.2. Hypotheses . . . . .	100
6.1.3. Modeling of running profiles . . . . .	100
6.1.4. Optimization problem MAXK . . . . .	102
6.1.5. Application example . . . . .	103
6.2. Properties and study of complexity . . . . .	105
6.2.1. Upper bound for $\text{MAXK}(\sigma, \rho_{i,j}, RUL_{i,j})$ . . . . .	106
6.2.2. Complexity of the problem $\text{MAXK}(\sigma, \rho, RUL_j)$ . . . . .	107
6.2.3. NP-completeness of the generic case . . . . .	110
6.3. Optimal approach . . . . .	110
6.3.1. Linear programming . . . . .	110
6.3.2. Optimal solution . . . . .	113
6.4. Sub-optimal solution . . . . .	113
6.4.1. Heuristics . . . . .	114
6.4.2. Improvement of the heuristics . . . . .	120
6.5. Simulation results . . . . .	123
6.5.1. Comparison with the upper bound UB . . . . .	124
6.5.2. Improvement by means of reparation . . . . .	126
6.6. Summary . . . . .	126
<b>Conclusion . . . . .</b>	<b>129</b>
<b>Bibliography . . . . .</b>	<b>135</b>
<b>Index . . . . .</b>	<b>147</b>
